BACKGROUND

The Texas Health Care Information Council (THCIC) was created by Chapter 108 of the Texas Health and Safety Code (THSC) and is responsible, under Sections 108.011 through 108.0135, for collecting hospital discharge data from all state licensed hospitals except those that are statutorily exempt from the reporting requirement. Exempt hospitals include those located in a county with a population less than 35,000, or those located in a county with a population more than 35,000 and with fewer than 100 licensed hospital beds and not located in an area that is delineated as an urbanized area by the United States Bureau of the Census (Section 108.0025). Exempt hospitals also include hospitals that do not seek insurance payment or government reimbursement (Section 108.009).

PUBLIC USE DATA FILE (PUDF)

Section 108.011(a) and 108.012 of the THSC requires THCIC to provide public use data for computer-to-computer access. It also permits THCIC to charge the data requestor a standard fee for using the Public Use Data File (PUDF).

The PUDF contains patient-level information for inpatient hospital stays. These data are extracted from THCIC's Hospital Discharge Database (HDD). Data from 431 hospitals reporting for first quarter, 430 reporting for second quarter, 437 reporting for third quarter, and 438 reporting for fourth quarter have been released. One hospital failed to comply with the statutory and regulatory requirements to report per Section 108.014 for third quarter.

The 2002 PUDF is available in a text file, in fixed length format, with a logical record length of 761 bytes. The file is also available in tab-delimited format. The size of the files is as follows:

First quarter	691,818 records	Fixed field format 504 MB	Tab-delimited 213 MB
Second quarter	683,689 records	Fixed field format 498 MB	Tab-delimited 215 MB
Third quarter	699,596 records	Fixed field format 510 MB	Tab-delimited 219 MB
Fourth quarter	695,209 records	Fixed field format 506 MB	Tab-delimited 219 MB

It is recommended that the file be used on a personal computer with an Intel Pentium processor with a minimum of 64 MB RAM and a minimum of .5 GB free disk space for each quarter and additional free disk space for any subsets of the data the user chooses to create. The data must be imported into a software package. No software is included with the PUDF. The data file has been tested with several software packages, including Microsoft Access, SAS, and SPSS.

Following initial release of the PUDF, THCIC has made the following data elements available beginning with the quarter indicated:

- Record ID, available 1st quarter 2002
- Source of Secondary Payment, Code 1 (Non-Standard), available 3rd quarter 2000
- Source of Secondary Payment, Code 2 (Standard), available 3rd quarter 2000
- Revenue Code-23 (Total Revenue Code), available 3rd quarter 2000
- Total charges (all revenue code charges), line 23, available 3rd quarter 2000
- Non-covered Charges (all non-covered revenue code charges), available 3rd quarter 2000
- Accommodation Charge, Private Room Charge Amount, available 3rd quarter 2000
- Accommodation Charge, Semi-Private Room Charge Amount, available 3rd quarter 2000
- Accommodation Charge, Ward Charge Amount, available 3rd quarter 2000
- Accommodation Charge, Intensive Care Unit Charge Amount, available 3rd quarter 2000
- Accommodation Charge, Coronary Care Unit Charge Amount, available 3rd quarter 2000

- Ancillary Service Charge, Other Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Pharmacy Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Medical/Surgical Supply Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Durable Medical Equipment Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Used Durable Medical Equipment Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Physical Therapy Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Occupational Therapy Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Speech Pathology Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Inhalation Therapy Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Blood Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Blood Administration Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Operating Room Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Lithotripsy Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Cardiology Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Anesthesia Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Laboratory Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Radiology Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, MRI Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Outpatient Services Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Emergency Room Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Ambulance Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Professional Fee Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Organ Acquisition Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, ESRD Charge Amount, available 3rd quarter 2000
- Ancillary Service Charge, Clinic Visit Charge Amount, available 3rd quarter 2000
- Total Accommodations Charges, available 3rd quarter 2000
- Total Non-Covered Accommodations Charges, available 3rd quarter 2000
- Total Ancillary Charges, available 3rd quarter 2000
- Total Non-covered Ancillary Charges, available 3rd quarter 2000
- Attending Physician Uniform ID, available 1st quarter 2000
- Operating or other Physician Uniform ID, available 1st quarter 2000
- County, available 3rd quarter 1999
- Public Health Region, available 3rd quarter 1999
- Certification Status, available 3rd quarter 1999

DATA PROCESSING AND QUALITY

All reporting hospitals are required to submit discharged inpatient claims data on a quarterly basis, using the uniform bill (UB-92) format. The data are validated through a process of automated auditing and verification. Each individual hospital is responsible for the accuracy and completeness of its data. Even so, each record is subjected by THCIC to a series of audits that check for consistency and conformity with the definitions stated in the data specification manual. Records failing an audit check are returned to the hospital for correction and resubmission. Following the correction process, THCIC uses valid claims data to build files of “encounters” where one

encounter contains the final discharge and all related interim claims information for a patient. Then, each submitting hospital has an opportunity to review, to make additional corrections, and to certify the encounter data with or without comments. Finally, THCIC builds a final encounter file that includes all corrections submitted by the hospitals. The Council staff checks and adjusts for missing values and invalid codes in this file before the PUDF is generated. THCIC will not release encounters found to contain material errors, defined as invalid data in one or more of the following data element groupings: dates, diagnosis codes, and procedure codes. Uniform physician identifiers are included beginning with first quarter 2000 data; hospital charges and secondary payors are available with third quarter 2000 data. Admission source for newborns is not included in this release of the PUDF. Users are advised to examine every data element to be used for missing values and invalid codes and to read accompanying notes, comments, and other descriptive text.

PATIENT/PHYSICIAN CONFIDENTIALITY

The legislative intent behind the creation of the Hospital Discharge Database (HDD) was that the data and resulting information be used for the benefit of the public. This is specified in Section 108.013 of the Texas Health and Safety Code (THSC). The THSC also stipulates that the Council may not release and a person or entity may not gain access to any data that could reasonably be expected to reveal the identity of a patient or physician. Any effort to determine the identity of any person violates the THSC. In addition, under Section 108.013(e) and (f) of the THSC, patient and/or physician information in the HDD cannot be used for discovery, subpoena, or other means of legal compulsion or in any civil, administrative, or criminal proceeding. Pursuant to the THSC, THCIC excludes all direct personal and demographic identifiers (e.g., name, address, social security number, patient identifiers, admission and discharge dates) from the PUDF that might lead to the identification of a specific patient.

To protect patient identities, the Council has suppressed these data elements in this release of the PUDF:

- The last two digits of the patient's ZIP code are suppressed if there are fewer than thirty patients included in the ZIP code.
- The entire ZIP code is suppressed if a hospital has fewer than fifty discharges in a quarter.
- The ZIP code is changed to '88888' for patients from states other than Texas and the adjacent states.
- The entire ZIP code and gender code are suppressed if the ICD-9-CM code indicates alcohol or drug use or an HIV diagnosis.
- The entire ZIP code and provider name are suppressed if a hospital has fewer than five discharges of a particular gender, including 'unknown'. The provider ID is changed to '99998'.
- Age is represented by 22 age group codes for the general patient population and 5 age group codes for the HIV and alcohol and drug use patient populations.
- Race is changed to 'Other' and ethnicity is suppressed if a hospital has fewer than ten discharges of a race.
- All facility type indicators are suppressed if a hospital has fewer than fifty discharges in a quarter and the provider ID is changed to '99999'.

To protect physician identities, the THSC requires creation of a uniform identification number for physicians in practice. Uniform physician identifiers are available beginning first quarter 2000

except when the number of physicians represented in a DRG for a hospital do not exceed the minimum cell size of five.

It may be possible in rare instances, through complex analysis and with outside information, to ascertain from the PUDF the identity of individual patients. Considerable harm could result if this were done. PUDF users are required to complete the THCIC Hospital Discharge Data Use Agreement in the Application before shipment of the PUDF.

RESTRICTIONS ON DATA USE

Section 108.010(c) of the THSC prohibits THCIC from releasing provider quality reports until one year of data is available. Users of the PUDF are cautioned about using less than a year of data to make any hospital quality assumptions.

Sections 108.013(c)(1) and (2) and 108.013 (g) of the Texas Health and Safety Code (THSC) prohibit the Texas Health Care Information Council (THCIC) from releasing, and a person or entity from gaining access to, any data that could reveal the identity of a patient or the identity of a physician unless specifically authorized by the Act. Any effort to determine the identity of any person or to use the information for any purpose other than for analysis and aggregate statistical reporting violates the THSC and the Data Use Agreement. By virtue of the Agreement, the signer agrees that the data will not be used to identify an individual patient or physician. Because of these restrictions, under no circumstances will users of the data contact an individual patient or physician or hospital for the purpose of verifying information supplied in the THCIC Hospital Discharge Data sets. Any questions about the data must be referred to THCIC only. Data analysis assistance is not provided by THCIC. The data are protected by United States copyright laws and international treaty provisions.

In the Data Use Agreement, the purchaser and end-user of the data are referred to as the “licensee”. To acquire the data the licensee must give the following assurances with respect to the use of THCIC Hospital Discharge Data sets:

- The licensee will not release nor permit others to release the individual patient records or any part of them to any person who is not a staff member of the organization (specified below), except with the written approval of THCIC;
- The licensee will not attempt to link nor permit others to attempt to link the hospital stay records of patients in this data set with personally identifiable records from any other source;
- The licensee will not release nor permit others to release any information that identifies persons, directly or indirectly;
- The licensee will not attempt to use nor permit others to use the data to learn the identity of any physician;
- The licensee will not nor permit others to copy, sell, rent, license, lease, loan, or otherwise grant access to the data covered by this Agreement to any other person or entity, unless approved in writing by THCIC;
- The licensee agrees to read the User Manual and to be cognizant of the limitations of the data;

- The licensee will use the following citation in any publication of information from this file:
Texas Hospital Inpatient Discharge Public Use Data File, [quarter and year of data]. Texas Health Care Information Council, Austin, Texas. [date of publication];
- The licensee will indemnify, defend, and hold the THCIC, its members, employees, and the Council's contract vendors harmless from any and all claims and losses accruing to any person as a result of violation of this agreement; and
- The licensee will make no statement nor permit others to make statements indicating or suggesting that interpretations drawn from these data are those of THCIC.

The licensee understands that these assurances are collected by THCIC to assure compliance with its statutory confidentiality requirement. The signature on behalf of the licensee indicates the licensee's agreement to comply with the above-stated requirements with the knowledge that under Sections 108.014 and 108.0141 of the Texas Health and Safety Code to knowingly or negligently release data in violation of this agreement is punishable by a fine of up to \$10,000 and an offense is a state jail felony. By signing the Data Use Agreement, the PUDF user has been informed that the potential for both civil and criminal penalties exists.

Users of report generating software to access the PUDF are required to purchase a license to use the data.

DATA LIMITATIONS

(Users are advised to become familiar with the data limitations.)

- The THSC requires that the uniform bill (UB-92) format be used for reporting purposes. Because this is a billing form, the data collected is administrative data and not clinical data.
- Records with MDC codes of 15 (newborns and other neonates with conditions originating in the perinatal period), 20 (alcohol/drug induced organic mental disorders), or 22 (burns) and Patient Status codes of 62 (discharged/transferred to inpatient rehabilitation), 71 (discharged/transferred to other outpatient service), or 72 (discharged/transferred to institution outpatient service) contain an APR-DRG of 956 (ungroupable). These Patient Status codes were not valid when version 15 of the 3M APR-DRG Grouper was developed. A valid Patient Status code is required for these MDC codes for APR-DRG assignment and Risk of Mortality and Severity of Illness scoring.
- Hospital charges data are available third quarter 2000. Earlier data were not reported correctly by some hospitals.
- Secondary source of payment data are available third quarter 2000. Earlier data were not reported correctly by some hospitals.
- Gender is suppressed for patients with an ICD-9-CM code that indicates drug or alcohol use or an HIV diagnosis.
- The last two digits of the ZIP code are suppressed if there are thirty or fewer patients included in the zip code. All of the ZIP code is suppressed for patients with an ICD-9-CM code that indicates drug or alcohol use or an HIV diagnosis or if a hospital has fewer than five discharges of a particular gender, including 'unknown'. ZIP code is changed to '88888' for patients from a state other than Texas and not from an adjacent state. If ZIP is '88888' the state abbreviation is changed to 'ZZ'. ZIP code is suppressed if a hospital has fewer than five patients of a particular gender, including 'unknown'.

- Admission Source as reported by hospitals is suppressed, as recommended by the Council, when the Admission Type is ‘newborn’. Data users can use ICD-9-CM codes to correctly identify the clinical status of newborns.
- Uniform identification numbers for physicians are available first quarter 2000 except for cases which do not exceed the minimum cell.
- Hospitals must submit data no later than 60 days after the close of a calendar quarter. Depending on hospitals’ collection and billing cycles, not all discharges may have been billed or reported. This can affect the accuracy of source of payment data, particularly self-pay and charity that may later qualify for Medicaid or other payment sources.
- The number of diagnosis codes collected per patient is limited to 9 and the number of procedure codes to 6. Because of these limitations, sicker patients and the hospitals that treat them may not be accurately represented in the data. This may also result in total volume and percentage calculations for diagnoses and procedures not being complete.
- Race and ethnicity data are generally not collected by hospitals and may be subjectively captured.
- Some hospitals have stated that Discharge Status has been reported incorrectly. These inaccuracies are addressed in the hospitals’ comments.
- County of residence is not collected by hospitals. County Federal Information Processing Standard (FIPS) codes are assigned by THCIC based on patient ZIP code.
- THCIC assigns the Risk of Mortality and Severity of Illness scores using methodology designed by 3M. These scores may be affected by the limited number of diagnoses and procedure codes collected by THCIC and may be understated.
- Comparability of length of stay (LOS) across hospitals is affected by factors such as case-mix and severity complexity, payer-mix, market areas and hospital ownership, affiliation or teaching status. Any analysis of LOS at the hospital level should consider the above factors.
- Length of stay is limited to 999 days.
- Any analysis of mortality should note that the data reflect only patients who died in the hospital and not those who died after discharge from the hospital.
- Conditions present at time of admission cannot be distinguished from those occurring during hospitalization.
- THCIC collects data from all hospitals in the state not specifically exempted by statute. This hospital mix should be considered when drawing conclusions about the data or making comparisons with other data.
- Any conclusions drawn from the data are subject to errors caused by the inability of the hospital to communicate complete data due to form constraints, subjectivity in the assignment of codes, system mapping, and normal clerical error. The data are submitted by hospitals as their best effort to meet statutory requirements.

HOSPITAL COMMENTS

(Users are advised to consider hospital comments in any analysis of the data.)

Included with the PUDF is a separate file containing the unedited comments submitted by hospitals at the time of data certification. Comments relating to individual data elements should be considered in any analysis of those data elements. These comments express the opinions of individual hospitals and are not necessarily the views of the THCIC. Hospitals that submitted comments are identified in ‘Reporting Status of Texas Hospitals’.

References:

There are currently three major versions of the Diagnosis Related Groups (DRGs) in use. The basic DRGs are used by the Health Care Financing Administration (HCFA) for hospital payment for Medicare beneficiaries. The All Patient DRGs (AP-DRGs) are an expansion of the basic DRGs to be more representative of non-Medicare populations such as pediatric patients. The All Patient Refined DRGs (APR-DRGs) incorporate severity of illness and risk or mortality subclasses into the AP-DRGs. The basic HCFA DRGs and the APR-DRGs are included in this data.

The reference for HCFA-DRGs is:

DRG Guidebook, 1999. St. Anthony Publishing, 1998.

The reference for APR-DRGs is:
