**Subject:** Another question

Mr. Jansky,

I have additional questions to add to the list you received from the EMS/Air Medical Committee at last weeks meetings.

I would request that you get the opinion of the FAA to the following:

Can individual states, in their licensing process, ensure that FAA Standards/Rules are being adhered to?

Can individual states, in their licensing process, review records and documents pertaining to FAA regulations and requirements and include compliance of those along with other state standards to issue or withhold state licensure to operate as an air medical service.

I understand that timely responses from other agencies is beyond your control, but if we could get a reply in the same time frame set forth with the list you received last week I would be most appreciative.

Thanks for your help.

Shirley Scholz

Chair, Air Medical Committee of
