

BEM Type Structure

PROS

- Direct line of authority
- Improve and shorten rule making process (shorter approval process)
- Improve levels of service by adding regional office staff (local support)
- Would keep people/staff with institutional knowledge
- Improve consistency amongst staff / regions
- EMS / Trauma Focused
- State controlled certification and licensure (not farmed out)
- It would be the EMS authority
- EMS Authority per region
- One stop shop

CONS

- Increase cost / staff
- politically not supported (upwards)
- Consistency at regional levels was
- Not enough funding to do it all
