PREFACE

This Standardization and Certification Retail Food Inspection Training Officers Procedures Manual establishes the procedures for the Standardization and Certification of retail food inspectors in Texas.

Local health jurisdictions who have adopted the Texas Food Establishment Rules (TFER) should submit the Standardization Verification Nomination Form (Annex 1) to request standardization of their training officer. A local health jurisdiction with 5 or more employees can have one training officer to every 15 employees standardized by Texas Department of State Health Services. That training officer(s) will then be able to standardize their employees. For local health jurisdictions with less than 5 employees, Texas Department of State Health Services will standardize all employees and act as the training officer.

Through the procedures described in this document, the candidate will demonstrate thorough knowledge and expertise in their understanding, application, and interpretation of the Retail Food Establishment Inspection Report, public health interventions, foodborne illness risk factors, and HACCP principles. They will also demonstrate the use of essential inspection equipment and the necessary communication skills in conducting a retail food establishment inspection. Candidates are expected to have basic inspection skills and baseline knowledge of these elements before requesting standardization.

The standardization process consists of a field exercise which includes 8 joint inspections of retail food establishments selected by the standardization officer (standard). Facilities selected for inspection will include four high risk facilities, two medium risk facilities, one highly susceptible population facility, and one facility with an existing HACCP plan.

This manual was adopted for use by the Texas Department of State Health Services, Public Sanitation and Retail Food Safety Group from the U. S. Food and Drug Administration (FDA) Standardization and Certification Procedures Manual.

1-104 Identifying Applicants

1-101 Introduction.

The main goal of the Texas food safety program is the reduction and prevention of foodborne illness. To that end, the Texas Department of State Health Services (DSHS) provides several approaches, one of which is the STANDARDIZATION and CERTIFICATION of retail food inspection personnel. This process provides regulatory personnel the opportunity to demonstrate their knowledge and skills related to the Texas Food Establishment Rules (TFER) provisions in a uniform system of measurement. The process and criteria for demonstrating proficiency in the required performance areas are described in the DSHS Procedures for Standardization and Certification of Retail Food Inspection / Training Officers.

The procedures are based on the TFER and are updated to reflect current provisions and to include a more refined focus on foodborne illness RISK FACTORS, PUBLIC HEALTH INTERVENTIONS, and application of the principles of HAZARD ANALYSIS CRITICAL CONTROL POINT (HACCP).

It is critical that FOOD safety personnel become STANDARDIZED and
subsequently CERTIFIED through this process to ensure that retail FOODS are safe, unadulterated, and honestly presented at retail throughout Texas. CERTIFICATION as a DSHS-CERTIFIED INSPECTION / TRAINING OFFICER is issued to all CANDIDATES who successfully complete the STANDARDIZATION process.

1-102 Purpose.

Through the application of the procedure, the CANDIDATE will demonstrate knowledge and expertise in the understanding, application, and interpretation of PUBLIC HEALTH INTERVENTIONS, foodborne illness RISK FACTORS, and HACCP PRINCIPLES; and in the use of essential inspection equipment; and will exhibit necessary communication skills in conducting a FOOD ESTABLISHMENT inspection. This procedure is not intended to provide basic training to individual CANDIDATES.

The CANDIDATE shall meet all the requirements of the procedure in order to be CERTIFIED by DSHS. Chapter 2 of the procedure describes the qualifications required of the CANDIDATE; Chapter 3 describes the field requirements; and Chapter 4 describes the communication requirements to convey the purpose and the findings of the inspection.

CANDIDATES who are successful in achieving CERTIFICATION by DSHS are expected to use the procedure to train or STANDARDIZE other inspectors within their regulatory agency.

1-103 Scope.

The procedures describe the process used by the DSHS STANDARD in CERTIFYING qualified FOOD safety inspection personnel in retail FOOD ESTABLISHMENT inspection techniques, based on the TFER, which lead to CERTIFICATION as an DSHS-CERTIFIED INSPECTION / TRAINING OFFICER.

1-104 Identifying Applicants.

Each local REGULATORY AUTHORITY for retail FOOD ESTABLISHMENTS, as broadly defined by the TFER that has 5 or more inspection personnel is encouraged to select at least 1 individual for every 15 inspection personnel to be STANDARDIZED and CERTIFIED by DSHS as the DSHS-CERTIFIED INSPECTION / TRAINING OFFICER. Regulatory authority with less than 5 inspection personnel, TEXAS DEPARTMENT OF STATE HEALTH SERVICES will act as the training officer and STANDARDIZED ALL INSPECTION PERSONNEL.

heat-treated or consists of raw seed sprouts; cut leafy greens;
cut melons; and garlic-in-oil mixtures that are not modified in a
way that results in mixtures that do not support growth as
specified under subparagraph (A) of this paragraph; and a food
whose pH/aw interaction is designated as TCS in one of the
tables listed in subparagraph (D) of §228.102(74) of the TFER,
unless a product assessment or vendor documentation
acceptable to the regulatory authority is provided.

(b) The term does not included an air-cooled hard-boiled egg with
shell intact, or a shell egg that is not hard-boiled, but has been
treated to destroy all viable Salmonellae; a food whose pH/aw
interaction is designated as non-TCS in one of the tables in
subparagraph (D) of §229.102(74) of the TFER; a food, in an
unopened hermetically sealed container, that is commercially
processed to achieve and maintain commercial sterility under
conditions of non-refrigerated storage and distribution; a food for

required and that may contain a preservative, other barrier to the
growth of microorganisms, or a combination of barriers that
inhibit the growth of microorganisms; or a food that does not
support the growth of microorganisms as specified under
subparagraph (A) of §229.102(74) of the TFER even though the
food may contain an infectious or toxigenic microorganism or
chemical or physical contaminant at a level sufficient to cause
illness. The term does not include food that, because of pH,
water activity (aw), or the interaction of pH and aw is considered
non-TCS in Table A or Table B of §229.102(74) of the TFER.
2-101 Objectives.

This chapter explains the prerequisite training and experience requirements for CANDIDATES to qualify for DSHS CERTIFICATION. In order for DSHS to engage in the process of field inspections for the purpose of STANDARDIZATION and CERTIFICATION, the CANDIDATE must qualify by fulfilling the training and experience requirements specified in this chapter. These eligibility requirements only apply to first time APPLICANTS for DSHS STANDARDIZATION and CERTIFICATION. Once CERTIFIED, CANDIDATES for recERTIFICATION only need to meet the CERTIFICATION maintenance requirements (see Section 3-403).

2-102 Eligibility.

   During all joint field retail FOOD ESTABLISHMENT inspections, the CANDIDATE shall take the lead. The CANDIDATE shall make introductions and determine who the PERSON IN CHARGE is at the beginning of each inspection.
The CANDIDATE shall record all observations and inspection data collected during the inspection. For the purpose of tracking temperature patterns, it is recommended that the CANDIDATE perform a preliminary survey of FOOD temperatures early in each inspection.

At various times during the field exercise the CANDIDATE shall be directed to perform specific tasks, such as explaining TFER requirements, citing code provisions, calibrating inspection equipment, and preparing flow charts or reviewing HACCP records to demonstrate proficiency in each area.

(B) Performance Areas:
During the inspection, the STANDARD shall observe and evaluate the CANDIDATE, based on the CANDIDATE’S interpretation and application of DSHS TFER provisions. Five performance areas are included in the evaluation:

(1) GOOD RETAIL PRACTICES;
(2) RISK-BASED INSPECTION;
(3) Application of HACCP PRINCIPLES;
(4) Inspection equipment; and
(5) Communications.

NOTE: The Regulatory Authority may include additional performance areas as necessary.

(C) Determining TFER Provisions:
It is required that the CANDIDATE document and/or cite the appropriate TFER provisions corresponding to each violation observed. For this section only, scoring is not used and does not impact the outcome of the CANDIDATE’s performance.

(D) Comparison of Findings:
Following each joint FOOD ESTABLISHMENT inspection, the CANDIDATES shall compare their findings with the STANDARD, and the differences shall be thoroughly discussed before proceeding to the next inspection (See Annex 2). The STANDARD shall retain the CANDIDATE’S inspection reports, flow charts, and CORRECTIVE ACTION PLAN to document satisfactory completion of CERTIFICATION requirements (See Annexes 2 and 3).

At the conclusion of the field exercise, the STANDARD shall
tabulate and review the CANDIDATE's inspection results and other observations to determine if the CANDIDATE has successfully completed the requirements for CERTIFICATION (See Annex 5).

(A) Risk-Based Inspection and Good Retail Practices:

(1) Inspection Report:
At the conclusion of each inspection the CANDIDATE shall complete the DSHS STANDARDIZATION Inspection Report (Annex 2, Section 1), based on observations and data collected during the inspection. The CANDIDATE shall determine which items on the inspection report form were in or out of compliance, not observed, and/or not applicable based on the observations.

(2) Candidate Scoring:
The STANDARD shall grade each DSHS STANDARDIZATION Inspection Report (Annex 2, Section 1), by circling each incorrectly marked item and discussing these items with the CANDIDATE after each inspection. At the conclusion of each inspection, the STANDARD shall determine the number of disagreements on items and record that number in the chart provided in Annex 5. At the completion of the final inspection, the STANDARD shall total the number of disagreements for all FOOD ESTABLISHMENTS inspected.

(a) To satisfy the “RISK-BASED INSPECTION” performance area, the CANDIDATE shall not disagree with the STANDARD on more than 11 items in any one ESTABLISMENT in this section of the STANDARDIZATION Inspection Report and have an average score of at least 90%.

(b) To satisfy the “GOOD RETAIL PRACTICES” performance area, the CANDIDATE shall not disagree with the STANDARD on more than 5 items in any one ESTABLISMENT in this section of the STANDARDIZATION Inspection Report and have an average score of at least 85%.
(B) Application of HACCP Principles:

During the FOOD ESTABLISHMENT inspections, the CANDIDATE shall demonstrate the proper inspection approach for FOOD ESTABLISHMENTS. With preexisting HACCP PLANS and those without HACCP PLANS. Each CANDIDATE shall demonstrate an understanding of HACCP by:

(1) Flow Charts: (Required for initial CERTIFICATIONS; optional for re-CERTIFICATIONS)

(a) Preparing Process Flow Charts:
During the joint inspections, the STANDARD shall select an example of each of the three types of food preparation processes for the CANDIDATE to describe on a flow chart (Annex 4, Section 3). The CANDIDATE shall develop a flow chart for the process and identify the HAZARDS, CCPs, and CLs for every CCP on each flow chart.

(b) Requirements:
The STANDARD shall grade the flow charts based on the correct identification of HAZARDS, CCPs, and CLs. To satisfy this requirement, each flow chart may contain no more than 2 errors or omissions. The FDA Retail HACCP Guide: "Managing Food Safety, A Guide for the Voluntary Use of HACCP Principles for Operators of Food Service and Retail Establishments" and the current edition of the DSHS TFER will be the reference documents for this exercise.

(2) Corrective Action Plan: Required for both initial CERTIFICATIONS and re-CERTIFICATIONS)

(a) Developing a CORRECTIVE ACTION PLAN:
During at least 1 of the joint inspections, the STANDARD will select a CCP that the CANDIDATE has determined is not in compliance with CLs set by the TFER. The CANDIDATE shall develop a mock CORRECTIVE ACTION
PLAN with the PERSON IN CHARGE. The CORRECTIVE ACTION PLAN should stress simple control measures that can be integrated into the daily routine of the FOOD ESTABLISHMENT. The plan should be brief and address the following points:

(i) What HAZARD needs to be controlled?
(ii) How the HAZARD will be controlled;
(iii) Who is responsible for control; and
(iv) What monitoring, record keeping, and corrective actions are required?

(b) Requirements:
To satisfy the requirements, all 4 points shall be addressed in the CORRECTIVE ACTION PLAN. The CANDIDATE is not required to ask the PERSON IN CHARGE to commit to implementation of the CORRECTIVE ACTION PLAN (Annex 3, Section 1).

(3) HACCP Plans: (Required for both initial CERTIFICATIONS and re-CERTIFICATIONS)

(a) Verification of HACCP Plans:
During the joint inspections, the CANDIDATE shall select at least 1 FOOD ESTABLISHMENT to inspect that has implemented a HACCP PLAN. The CANDIDATE shall demonstrate the ability to verify that the HACCP PLAN is implemented by reviewing the FOOD ESTABLISHMENT’s monitoring procedures and record keeping; verifying that CLs are met, and by substantiating that corrective actions are taken when the CLs are not met. The STANDARD shall select at least 1 CCP for the CANDIDATE to verify.

The CANDIDATE shall review the records for the selected CCPs for 3 specific twenty-four hour periods, which shall include records for the current day and 2 additional days selected at random. Based on this review, the CANDIDATE shall make the following determinations regarding monitoring, record keeping, and the performance of corrective action for a total of 9 HACCP PLAN record answers (Annex 4, Chart #2):
(i) Required monitoring was performed on the 3 selected dates;
(ii) Accurate and consistent records appear for the selected dates; and
(iii) Corrective action was documented in accordance with the plan when CLs were not met on each of the 3 selected dates (CANDIDATE shall select the 3 days of records through discussions with the FOOD ESTABLISHMENT management).

(b) **HACCP Principles:**
The CANDIDATE shall orally communicate to the STANDARD the HACCP PRINCIPLES and how they would apply to the FOOD ESTABLISHMENT’s operation.

(c) **Requirement:**
The CANDIDATE shall record the determination under "Status" on the DSHS STANDARDIZATION Inspection Report (Annex 2, Section 1, Foodborne Illness Interventions and Risk Factors #14); and document findings on the HACCP PLAN Verification Summary Chart (Annex 4, Section 2, Chart #2). To satisfy this requirement, the CANDIDATE and the STANDARD shall be in agreement in at least 8 out of the 9 HACCP PLAN record answers on the HACCP PLAN Verification Summary Chart.

(C) **Inspection Equipment:**
The CANDIDATE shall have essential equipment (listed in 3-202) available for use during each inspection and shall demonstrate knowledge of necessary equipment to conduct a FOOD ESTABLISHMENT inspection. The CANDIDATE shall know how to properly use and maintain the equipment. Specifically, the CANDIDATE shall demonstrate that the temperature measuring device is accurate at 0 °C (32 °F) and 100 °C (212 °F).

(D) **Communications:**
In accordance with Chapter 4 of this procedure, the CANDIDATE shall take the lead in communicating with industry personnel during each of the inspections in 3 areas:

(1) Introduction;
(2) Person in Charge Interview; and
(3) Exit Conference.
During the inspections, the CANDIDATE shall demonstrate by example the concepts of FOOD safety such as washing hands at the appropriate place and time and wearing the proper inspection apparel. The STANDARD shall observe and evaluate the CANDIDATE by focusing attention on communication skills that relay to the PERSON IN CHARGE, the compliance status and any observations, concerns, and alternatives for compliance. Satisfactory performance is achieved if this information is conveyed in a way that is understood, accepted, and acted upon.

3-303 Assessment - Level of Agreement with Performance Criteria.

(A) Chart 3 in Annex 5 can be used to tally the number of disagreements on the items between the STANDARD and the CANDIDATE in the "RISK-BASED INSPECTION" and "GOOD RETAIL PRACTICES" sections of the STANDARDIZATION Inspection Report.

(B) Criteria for Success:

(1) To achieve CERTIFICATION, the CANDIDATE shall meet minimum requirements for the 3 Performance Areas described in 3-302 (A) and (B). The CANDIDATE may receive "Needs Improvement" classification in the Equipment and Communications Performance Areas and still be CERTIFIED.

(2) When one or both of these Performance Areas is classified as needing improvement, the CANDIDATE and the CANDIDATE's supervisor shall be notified that the "Needs Improvement" area or areas must be satisfactorily addressed before reCERTIFICATION is granted. Prior to reCERTIFICATION, the CANDIDATE's supervisor must notify the STANDARD that the area or areas or concern have been addressed.

Subparts

4-101 Objective
4-102 Introduction
4-103 Interview with the Person in Charge
4-104 Exit Conference

4-101 Objective.

Skillful communication is essential to the inspection process in order to effectuate needed changes by the PERSON IN CHARGE. This chapter highlights the importance of communication skills during an inspection. Activities and responsibilities involved in a retail FOOD inspection program require a person to speak and to listen effectively.

Many different types of communication skills and approaches are necessary and valuable during the inspection process. The CANDIDATE shall be required to take the lead in communicating with industry personnel during all inspections and the STANDARD shall evaluate the CANDIDATE'S communication skills.

4-102 Introduction.

(A) The CANDIDATE shall be required to make all introductions. A complete introduction consists of:

(1) Introducing all persons participating in the inspection;
(2) Presenting credentials or identification;

(3) Describing the purpose and flow of the inspection;

(4) Identifying and explaining to the PERSON IN CHARGE that it will be necessary to ask questions about the operation during the inspection; and

(5) Explaining that this is not intended as a regulatory inspection and that there will be no written report left at the end of the inspection; however, significant findings will be brought to the attention of the PERSON IN CHARGE.

(B) In addition to verbal and written communication, the CANDIDATE shall also use the inspection process to communicate and demonstrate FOOD safety concepts by example. Activities such as proper handwashing, SANITIZING thermometers before probing FOODS, and wearing the proper inspection apparel should be used to reinforce spoken and written communications.

4-103 Interview with the Person in Charge.

The CANDIDATE shall conduct a discussion with the PERSON IN CHARGE to determine:

(A) If a HACCP PLAN exists, and if so, whether the PERSON IN CHARGE understands the principles of the HACCP PLAN and is ensuring that the EMPLOYEES are effectively using the plan;

(B) What training is provided for EMPLOYEES and managers that is relevant to applying the PUBLIC HEALTH INTERVENTIONS and controlling foodborne illness RISK FACTORS;

(C) What EMPLOYEE health policies are in effect; and

(D) What POTENTIALLY HAZARDOUS FOODS are on the menu and what production activities are ongoing at the time of inspection.

4-104 Exit Conference.

At the exit conference, the CANDIDATE shall clearly:
(A) Convey and discuss in detail with the PERSON IN CHARGE the inspection findings including:

1. The compliance status of the FOOD ESTABLISHMENT describing each significant violative condition and, where appropriate, acceptable compliance alternatives,

2. The response and plans of the PERSON IN CHARGE for correcting violations, including a CORRECTIVE ACTION PLAN, and

3. Corrective actions observed during the inspection. Such proactive food safety measures should be commended.

(B) Explain the public health significance of the RISK FACTORS and PUBLIC HEALTH INTERVENTIONS, GRPS, and the CCPS which do not meet the CLs as established in the TFER; and

(C) Demonstrate the ability to discuss and resolve in a courteous and professional manner, issues that the PERSON IN CHARGE might not agree with or clearly understand.

CORRECTIVE ACTION PLAN (EXAMPLE)

II. The following corrective action plan will be implemented to establish active managerial control of the identified uncontrolled hazards. (The plan identifies the corrective action when critical limits are not met; who is responsible; what action is necessary; how the plan is implemented; when action is taken; what records are maintained; and what if any training is necessary.)

Plan for Hazard #1 - Cooking temperature of hamburgers

Temperature checks of hamburger patties will be taken on the first batch of hamburgers cooked.
Sam Jones will record the temperatures on his production chart.
Hamburgers with a temperature below 68 °C (155 °F) will be returned to the grill for further cooking to internal temperature of 68 °C (155 °F).
Temperature records will be faxed to Jane Smith each Friday for 4 weeks.

Plan for Hazard #2- Reheat of leftover chili for hot holding.

Leftover chili will be reheated on the stove.
Sam Jones will check the temperature of the chili before placing it on the steam table.
The temperatures will be recorded on his production chart.
Chili with a temperature below 74 °C (165 °F) will be placed back on the stove until it reaches 74°C (165 °F). The records will be held for Jane Smith=s review on 8/26/99.

Plan for Hazard #3 - Proper handwashing

All employees will review the handwashing training tapes.
Employees will sign log, indicating they have received training on handwashing.
Sam Jones will keep a record of those employees who have reviewed the tapes.
Employees will record each time they wash their hands for one week.
Sam Jones will monitor and maintain this record.
On 8/26/08 this record will be mailed to Jane Smith.

As manager of the _______ Hamburger Heaven ______ located at _______ 1234 Anywhere Street ________, I have reviewed and understand the provisions of this voluntary Corrective action plan.

Total # of record answers that are in Disagreement with the Standard = _______ (This box for Completion by Standard only)

The use of a HACCP plan by a food establishment can be verified through a review of food establishment records and investigating the following information:

1. Does the food establishment’s HACCP documentation indicate that required monitoring was recorded on the 3 selected dates? An “IN” answer would indicate that all required monitoring was documented. If any required monitoring was not documented, an “OUT” answer would be circled in this section.

2. Does the food establishment’s HACCP documentation for the selected dates appear accurate and consistent with other observations? An “IN” answer would indicate that the record appears accurate and consistent. An “OUT” answer would indicate that there is inaccurate or inconsistent HACCP documentation.

3. Was corrective action documented in accordance with the HACCP plan when CLs were not met on each of the 3 selected dates? An “IN” answer would indicate that corrective action was documented for each CL not met for each of the 3 selected dates. An “IN” can also mean that no corrective action was needed. An “OUT” answer would indicate any missing or inaccurate documentation of corrective action.

The purpose of the following chart is to tally the disagreement between the Candidate's and the Standard's responses on the DSHS Standardization Inspection Report (Annex 2 Section 1). The Standard determines whether the Candidate properly identified and categorized violative conditions on each of the "Interventions/Risk Factors" and the "Good Retail Practices (GRPs)" portions of the DSHS Standardization Inspection Report.

INSTRUCTIONS FOR SCORING AND DETERMINING PERFORMANCE

RISK-BASED INSPECTION:

To pass this section, the Candidate must achieve an average score of 90 percent (no more than 45 disagreements for all 8 establishments) with no more than 11 disagreements per establishment.

STEP 1. Determine the number of disagreements per establishment and record it in the chart (Performance Criteria Tally of Disagreements).

If the disagreements/establishment is <12, proceed to STEP 2.
If the disagreements/establishment is ≥12 stop inspections. Candidate fails.

STEP 2. Total the number of disagreements on Interventions/Risk Factors for all the establishments.

If the disagreements are ≤45 for 8 establishments, the Candidate passes.
If the disagreements are >45 for 8 establishments, the Candidate fails.
If the disagreements are ≤33 for 6 establishments, the Candidate passes.
If the disagreements are >33 for 6 establishments, the Candidate fails.

GOOD RETAIL PRACTICES:

To pass this section, the Candidate must achieve an average score of 85 percent (no more than 32 disagreements for all 8 establishments) and have no more than 5 disagreements on GRPs per establishment.

STEP 1. Determine the number of disagreements per establishment.

If the disagreements/establishment are <6, proceed to STEP 2.
If the disagreements/establishment are ≥6, stop inspections. Candidate fails.

STEP 2. Total the number of disagreements on GRPs for all establishments.

If the disagreements are ≤ 32 for 8 establishments, the Candidate passes.
If the disagreements are > 32 for 8 establishments, the Candidate fails.
If the disagreements are ≤ 24 for 6 establishments, the Candidate passes.
If the disagreements are > 24 for 6 establishments, the Candidate fails.

HACCP PRINCIPLES: A "satisfactory" score is required to pass.

In this example, the Candidate passes both the Risk-Based Inspection and the Good Retail Practices portions. The number of disagreements for any one establishment did not exceed the maximum and the total number of disagreements for all the establishments also did not exceed the maximum number.
Here the Candidate fails the Risk Based Inspection portion of this exercise. The Candidate was close to the maximum number of disagreements for any one establishment in the first two facilities and exceeded this maximum number of disagreements in the third establishment.
