

Project: Fight HIV
Title: "Put Together"
Medium: Radio :60

NINA: Oh, I see you. You're so put together. Your new shoes match your new handbag and your hair is all done just right. That's coz you're a proud woman. Yeah, you've got family and friends depending on you. You're the pillar of strength in your community so you do what you gotta do to remain strong, even if something like HIV gets in your way. You take precautions – practice safer sex, like carry your own protection. Even get tested to see if you're HIV positive or negative. Coz no matter how the test comes back, you know you can stay healthy and strong to do the things you love. You're still the one person everyone in your life can look up to.

ANNCR: HIV doesn't stand a chance against strong black women. So get tested and live your life, healthy and strong. Do it for your partner, your family, for all the things you love. Call 211 toll-free or text the word FIGHT to triple 7 triple 1 to find the nearest HIV testing center. Fight HIV.
