**“When I Look at You” (2008)**

---

**WOMAN:** When I look at you, I see a woman who takes care of her business; a woman so put together, so on top of her game, it's no wonder so many people look up to you. It's only natural. That's why you get tested for H-I-V. Because you do what you gotta do to remain healthy and strong. You're not afraid. You carry your own condoms and you take the precautions you need to keep yourself safe. Every time. You get tested regularly because you know that no matter how that test comes back, you're always the one we can count on, the one we're always gonna turn to. And that's not gonna change.

**DJ:** H-I-V is no match for strong black women. Get tested now. Do it for your family, your health, for all the things you love. Visit the web at H-I-V TEST dot org or call 2-1-1 toll-free to get all the confidential information about H-I-V testing you need to stay safe. Fight H-I-V. This message brought to you by the Texas Department of State Health Services.
