

Mental Health Services Standards of Care

Definition:

Mental Health Services include psychological and psychiatric treatment and counseling services offered to individuals with a diagnosed mental illness, conducted in a group or individual setting, based on a detailed treatment plan, and provided by a mental health professional licensed or authorized within the State to provide such services, typically including psychiatrists, psychologists, and licensed clinical social workers.

Limitations:

None

Services:

Mental health counseling services includes outpatient mental health therapy and counseling (individual and family) provided solely by Mental Health Practitioners licensed in the State of Texas.

Mental health services include:

- Mental Health Assessment
- Treatment Planning
- Treatment Provision
- Individual psychotherapy
- Family psychotherapy
- Conjoint psychotherapy
- Group psychotherapy
- Psychiatric medication assessment, prescription and monitoring
- Psychotropic medication management
- Drop-In Psychotherapy Groups
- Emergency/Crisis Intervention

General mental health therapy, counseling and short-term (based on the mental health professionals judgment) bereavement support is available for non-HIV infected family members or significant others.

All mental health interventions must be based on proven clinical methods and in accordance with legal and ethical standards. The importance of maintaining confidentiality is of critical importance and cannot be overstated unless otherwise indicated based on Federal, state and local laws and guidelines (i.e. abuse, self or other harm). All programs must comply with the Health Insurance Portability and Accountability Act (HIPAA) standards for privacy practices of protected health information (PHI) information.
