

Giving All the Doses

Younger than 12 Months of Age

One way to give 5 doses at one visit

IM - Intramuscular
SQ - Subcutaneous

(*If necessary, SQ injections may be given in the arm.)

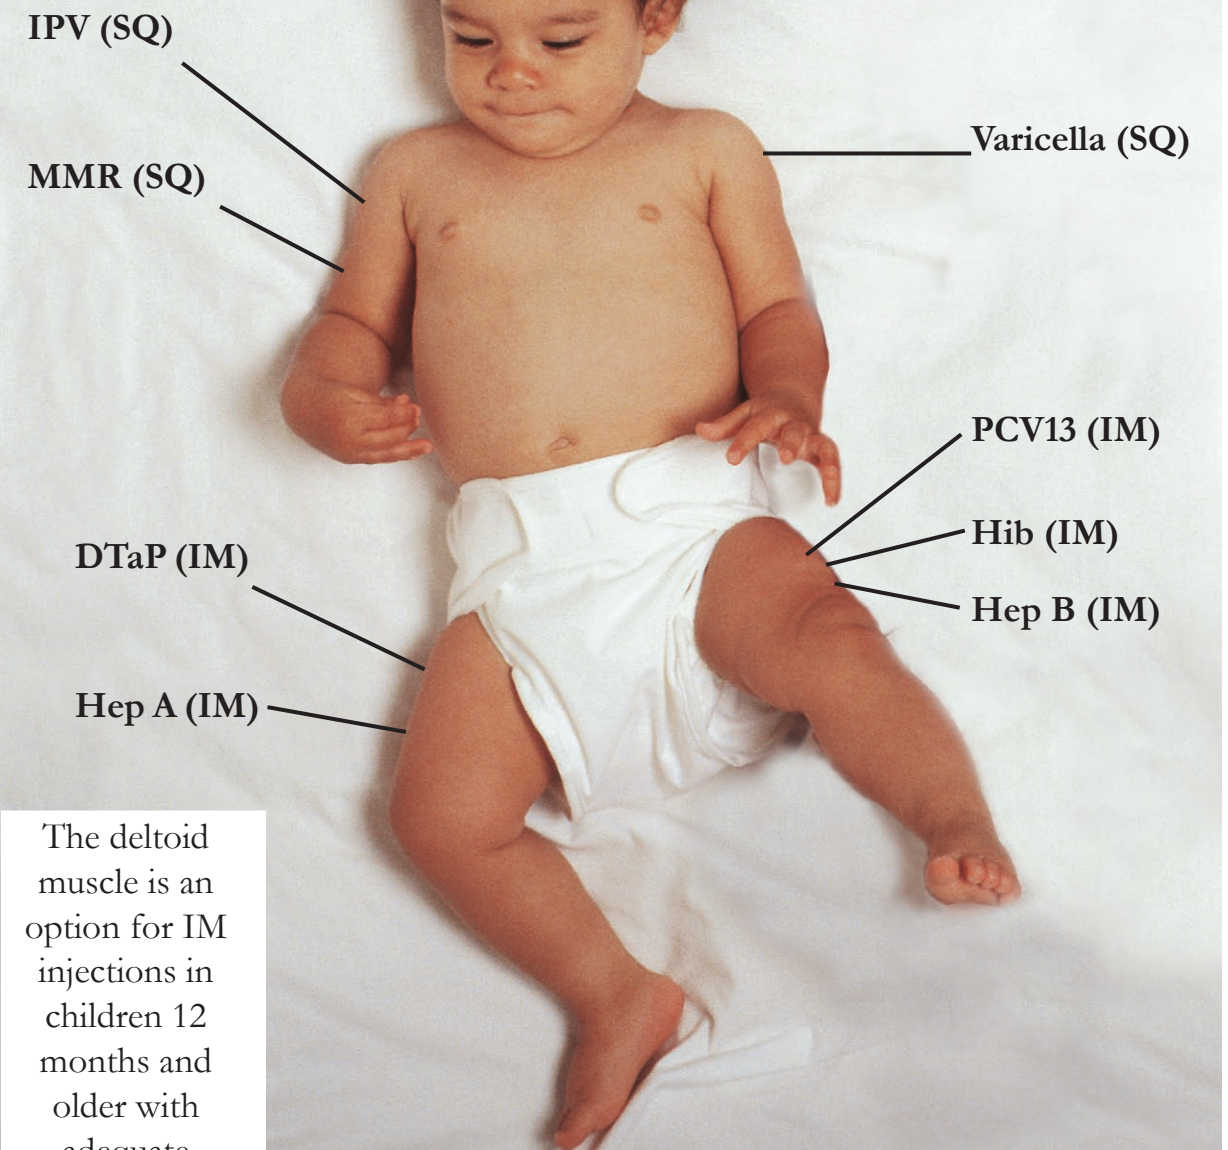

- Injection sites should be separated by 1-2 inches
- IM injections are not recommended in infant's arms

Giving All the Doses

12 Months of Age and Older

One way to give 7 doses (if needed) at one visit

IM - Intramuscular
SQ - Subcutaneous

The deltoid muscle is an option for IM injections in children 12 months and older with adequate muscle mass
