

BRADFORD THERRELL, JR, PHD

Bradford Therrell, Jr., Ph.D., is the director of the National Newborn Screening and Genetics Resource Center (NNSGRC) and a professor in the Department of Pediatrics at The University of Texas Health Science Center at San Antonio. He previously worked at the Texas Department of Health Bureau of Laboratories for over 28 years, where he was in charge of newborn screening and other biochemical screening programs. Dr. Therrell was one of the founding members of the International Society for Neonatal Screening, serving as its first Secretariat and later as President.

Dr. Therrell was awarded the prestigious Guthrie Award by the Society for outstanding international contributions in newborn screening. He has been actively involved in providing reviews and expert advice to newborn screening programs in the U.S. as part of the activities of the Health Resources and Services Administration and in assisting developing countries as part of the activities of the International Atomic Energy Agency.
