Frequency of Errors - Allows the user to verify the number of claims System13 received and verify that the dates are the same as the user submitted for the quarter. Frequency of Error Report provides the user information on the number of claims processed, number of claims in error, number of fields in error, error summary and accuracy rate.

Hardcopy Report - shows every error and warning on each claim.

Summary Report - use this report to validate if the data for the period is correct, such as record counts, min/max/average charges, admission type and source, payer type, patient age, gender, race, and ethnicity.

Data Analysis Report - shows counts per month, types of bills, and other data items, and makes suggestions for continuing, such as removing duplicates, correcting invalid data, etc.

Claim Count for First Physician - Use this to determine if the physicians (attending, operating, other) who utilize your facility are represented correctly. This report will give a claim count by physician name, sorted by name. It will also include the physician ID, but will not include patient information.

Claim Count for Second Physician - Use this to determine if the second physicians (attending, operating, other) who utilize your facility are represented correctly. Data Analysis Report, makes suggestions concerning the MRR and DR functions. It is also recommended that when choosing to run the MRR and DR processes, other facility users should not be in the system to avoid undesired results if records are locked by users and those same records need to be removed by the MRR or DR process.
