BACKGROUND

The Texas Health Care Information Council (THCIC) was created by Chapter 108 of the Texas Health and Safety Code (HSC) and was responsible, under Sections 108.011 through 108.0135, for collecting hospital discharge data. THCIC became part of the Texas Department of State Health Services (DSHS) effective September 1, 2004, and the DSHS Center for Health Statistics is now responsible for the collection and release of hospital discharge data.

OUTPATIENT RESEARCH DATA FILE (RDF)

Health and Safety Code §108.011(k) of the HSC permits DSHS to disclose data collected under this chapter that is not included in public use data to any department or commission program if the disclosure is reviewed and approved by the DSHS Institutional Review Board (IRB) under HSC, §108.0135. These data are provided as Research Data File (RDF) contains protected patient-level information for outpatient events occurring in hospitals or ambulatory surgery centers and shall be used only for the benefit of the public subjected to specific limitations defined by HSC, §108.0135.

The outpatient RDF data elements list includes all the variables in Outpatient Public Use Data File (PUDF)

(https://www.dshs.texas.gov/thcic/OutpatientFacilities/OutpatientPUDF.shtm) and the additional patient sensitive or confidential data variables. Only data elements approved by the DSHS IRB and DSHS Executive Steering Committee will be released to the requestor with their approved data elements in a custom-built RDF.

The RDF is available in fixed length format text files, tab-delimited or SAS format. The data must be imported into a software package. No software is included with the RDF. The data file has been tested with several software packages, including Microsoft Access 2010 Microsoft Excel (one quarter), SAS, R, and SPSS.

Any questions about the data must be referred to DSHS only. Data analysis assistance is not provided by DSHS. The data are protected by United States copyright laws and international treaty provisions.

PATIENT/PHYSICIAN CONFIDENTIALITY

The legislative intent behind the creation of the outpatient RDF was that the data and resulting information be used for the benefit of the public. This is specified in HSC, §108.013. The HSC, §108.013 also stipulates that DSHS may not release and a person or entity may not gain access to any data that could reasonably be expected to reveal the identity of a patient or physician. Any effort to determine the identity of any person violates the HSC, §108.013. In addition, under HSC, §\$108.013(e) and (f), patient and/or physician information in the RDF cannot be used for discovery, subpoena, or other means of legal compulsion or in any civil, administrative, or criminal proceeding.

To protect physician identities, the HSC, §§108.009(d) and 108.013(h) requires creation of a uniform identification number for physicians in practice. Uniform physician identifiers are available except when the number of physicians represented in a DRG for a hospital is less than the minimum cell size of five.

It may be possible in rare instances, or through complex analysis and with outside information, to ascertain from the RDF the identity of individual patients of physicians or other health practitioners. Considerable harm could result if this were done. RDF users are required to sign and comply with the DSHS Data Use Agreement in the Application before shipment of the RDF. The Data Use Agreement prohibits attempts to identify individual patients or physicians. Any effort to determine the identity of any person or to use the information for any purpose other than for analysis and aggregate statistical reporting violates the HSC, Chapter 108 and the Data Use Agreement. By virtue of the Agreement, the signer agrees that the data will not be used to identify an individual patient or physician. Because of these restrictions, under no circumstances will users of the data contact an individual patient or physician or hospital for the purpose of verifying information supplied in the DSHS Outpatient Surgical and Radiological Procedure Data sets.

RESTRICTIONS ON DATA USE

Health and Safety Code §108.010(c) prohibits DSHS from releasing provider quality reports until one year of data is available. Users of the RDF are cautioned about using less than a year of data to make any hospital quality assumptions.

2022	Page	
www.dshs.texas.gov/THCIC	3	Last Updated: January, 2023

In the Data Use Agreement, the requestor and end-user of the data are referred to as the "licensee". To acquire the data the licensee must give the following assurances with respect to the use of DSHS Outpatient Surgical and Radiological Procedure Data sets:

- The licensee will not release nor permit others to release the individual patient records or any part of them to any person who is not a staff member of the organization that has acquired the data, except with the written approval of DSHS;
- The licensee will not attempt to link nor permit others to attempt to link the outpatient event records of patients in this data set with personally identifiable records from any other source,
- The licensee will not release nor permit others to release any information that identifies persons, directly or indirectly;
- The licensee will not attempt to use nor permit others to use the data to learn the identity of any physician;
- The licensee will not nor permit others to copy, sell, rent, license, lease, loan, or otherwise grant access to the data covered by the approved IRB request and the Data Use Agreement to any other person or entity, unless approved in writing by DSHS;
- The licensee agrees to read the Outpatient Data User's Manual and to be cognizant of the limitations of the data;
- The licensee will use the following citation in any publication of information from this file:

Texas Outpatient Surgical and Radiological Procedure Public Use Data File, [quarter and year of data]. Texas Department of State Health Services, Center for Health Statistics, Austin, Texas. [date of publication];

- The licensee will indemnify (unless other laws prohibit indemnity), defend, and hold the DSHS, its members, employees, and the Department's contract vendors harmless from any and all claims and losses accruing to any person as a result of violation of this agreement; and
- The licensee will make no statement nor permit others to make statements indicating or suggesting that interpretations drawn from these data are those of DSHS.

2022	Page		
www.dshs.texas.gov/THCIC	4	Last Updated: January, 2023	

The licensee understands that these assurances are necessary for DSHS to assure compliance with its statutory confidentiality requirement. The signature on behalf of the licensee indicates the licensee's agreement to comply with the above-stated requirements and that the licensee has knowledge that under HSC, §§108.014 and 108.0141 civil and criminal penalties may be assessed should the licensee or others that knowingly or negligently access or release data in violation of this agreement is punishable by a fine of up to \$10,000 and an offense is a state jail felony. By signing the Data Use Agreement, the RDF user has been informed that the potential for both civil and criminal penalties exists.

Users of report generating software to access the RDF are required to purchase a license to use the data.

HOSPITAL COMMENTS

(Users are advised to consider hospital comments in any analysis of the data.)

Included with the RDF is a separate file containing the unedited comments submitted by hospitals or ambulatory surgery centers at the time of data certification. Comments relating to individual data elements should be considered in any analysis of those data elements. These comments express the opinions of individual hospitals or ambulatory surgery centers and are not necessarily the views of the DSHS. Hospitals or ambulatory surgery centers that submitted comments are identified in 'Reporting Status of Texas Hospitals'.

CITATION

Any statistical reporting or analysis based on the data shall cite the source as the following:

Texas Outpatient Surgical and Radiological Procedure Public Use Data File, [quarter and year of data]. Texas Department of State Health Services, Center for Health Statistics, Austin, Texas. [date of publication].

OUTPATIENT RDF DATA DICTIONARY

The following information is provided:

Field	Unique, abbreviated name of the data element and brief explanation of the data element.			
Data Source	Provided by the health care facility on the claim form (Claim)			
	Assigned by DSHS (Assigned)			
	Calculated by DSHS (Calculated)			
Type	Alphanumeric or numeric			
Coding scheme	Valid codes for a data field. Values taken from specifications manuals.			

Any data provided by a facility that has been determined to be invalid has been assigned the value `(accent mark). Any data element that is blank should be interpreted as 'missing', no data provided, unless otherwise noted.

BASE DATA FILE

Field 1:	SERVICE_QUARTER						
	Quarter durin	ig which service occurred.	Year and quarter of	service. <i>yyyyQn</i> .			
	1st Quarter (YYYYQ1): 1st January-31st March of that corresponding year.						
	2nd Quarter (YYYYQ2): 1st April – 30th June of that corresponding year.

Clinical Classifications Software Refined (CCSR) classification of PRIN_DIAG_CODE (the principal diagnosis, i.e., the condition established after study to be chiefly responsible for causing the hospitalization) into a clinically meaningful diagnosis category. Developed at the Agency for Healthcare Research and Quality (AHRQ) as part of the Healthcare Cost and Utilization Project (HCUP), Clinical Classifications software is a tool to cluster ICD-9/10 (International Classification of Diseases – Revision 9/10) coded patient diagnoses and procedures into a manageable number of clinically meaningful categories to aid in cost, utilization, and outcome analysis.

FACILITY TYPE INDICATOR FILE

A facility is a hospital or ambulatory surgical center required to report under the Health and Safety Code, Chapter 108, Facility type indicators are provided by the facilities. A facility type indicator provides information to the data use as to the type of facility or the primary health services delivered at that facility (e.g., Hospital-based Ambulatory Surgical Unit, Hospitals with an Emergency Dept, or Ambulatory Surgical Centers) A facility may have more than one indicator.
