Intracranial Gland**CS Site-Specific Factor 1****World Health Organization (WHO) Grade Classification**

Note: See page A-151

Note 1: The World Health Organization (WHO) classification system for tumors of the central nervous system combines tumor nomenclature with an associated grading system, so the actual histologic diagnosis directly correlates with the histologic grade of the tumor. The histologic grade used for staging purposes is not the same code that is assigned as the differentiation code in the sixth digit of the ICD-O morphology code and recorded in the traditional registry Grade field.

Note 2: Code the WHO grade classification as documented in the medical record.

| Code | Description |
|------|-------------|
| 010 | Grade I |
| 020 | Grade II |
| 030 | Grade III |

| Code | Description |
|-------------|--|
| 040 | Grade IV |
| 988 | Not applicable: Information not collected for this case; (If this item is required by your standard setter, use of code 988 will result in an edit error.) |
| 998 | No histologic examination of primary site |
| 999 | Not documented in medical record Unknown; WHO grade not stated |
