

## 2014 Texas Selected Cancer Facts

Texas Selected Cancer Facts are provided by the Texas Cancer Registry (TCR), Texas Department of State Health Services. The TCR is a statewide population-based registry that serves as the primary source of Texas cancer data. These data are used to measure the Texas cancer burden, progress in cancer prevention and control, and support a wide variety of cancer research.

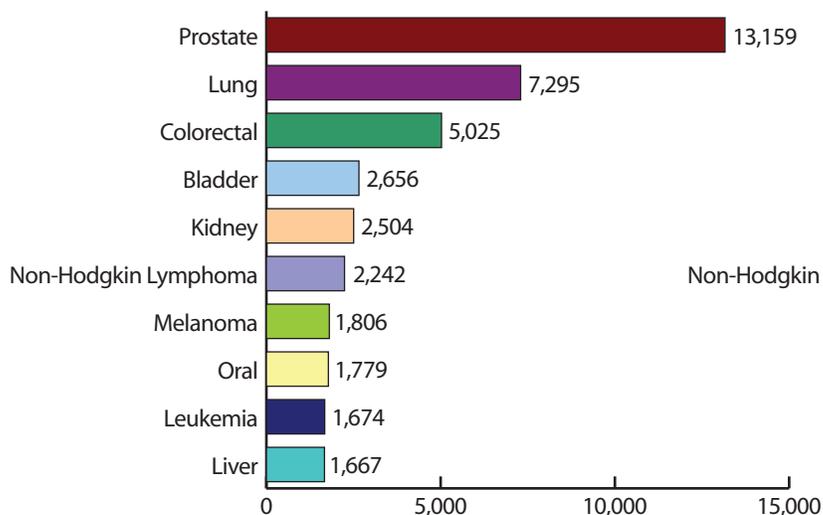

### Cancer remains a significant public health issue in Texas:

- Cancer is the leading cause of death for Texans aged 85 years and younger.
- Cancer is the leading cause of death from disease among Texas children aged 1 to 14 years.
- In 2014, it is estimated that 119,115 Texans will be newly diagnosed with cancer and 44,150 will die of the disease.
- For 2011, it is estimated that there were 500,257 cancer survivors in Texas who were diagnosed between 2001 and 2010.
- The estimated cost of cancer in Texas for 2010 is \$25.3 billion.\*

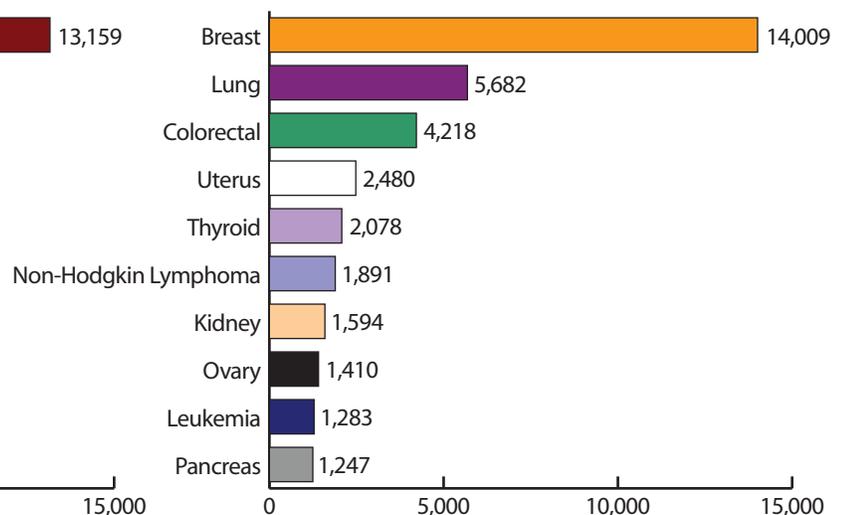

### Average Annual Number of New Cancer Cases, 10 Leading Sites, Texas, 2007–2011

## Cancer Rates by Race, Ethnicity and Sex, Texas, 2007–2011

## Trends in Cancer Incidence and Mortality, Texas, 2006–2010

- Although rates of new cancer cases and deaths are declining, the numbers of new cases and deaths are increasing because our population is aging and growing.

This fact sheet was prepared by the Cancer Epidemiology and Surveillance Branch, Texas Department of State Health Services. Incidence data were from the 1995-2011 Cancer Incidence File, (Cut-off 11-30-2013). Mortality data were from the 1990-2011 Mortality File, (Created 02/06/14). Note that the trend lines end with 2010 data, to account for reporting delay. For questions about this fact sheet, or for more detailed information on specific Texas cancer data, contact the Cancer Epidemiology Group by phone: 1-800-252-8059, or e-mail: CancerData@dshs.state.tx.us. More detailed data are also available on our website: <http://www.dshs.state.tx.us/tcr>.
