

COMPARISON OF DATA SETS

Definitions:

Required Data Set (R): Commission-approved programs must record the required data set items using the codes and definitions specified in the FORDS manual.

Supplementary Data Set (S): The supplementary data set contains additional data items that are important for the efficient operation of a cancer registry.

Surveillance, Epidemiology, and End Results Program (SEER): Required data elements for a central registry affiliated with the National Cancer Institute's SEER Program.

National Program of Cancer Registries (NPCR): Refers to requirements and recommendations of the NPCR regarding data items that should be collected or computed by NPCR state registries.

Commission on Cancer (CoC): Refers to requirements and recommendations of the Commission on Cancer of ACoS.

Texas Cancer Registry (TCR): Refers to the requirements and recommendations of the Texas Cancer Registry.

Exchange Elements for Hospital to Central and Central to Central: Items required for facilities reporting to central registries (labeled Hosp>Central), and items that central registries should use when sending cases to other central registries (labeled Central>Central).

Codes for Recommendations:

Left blank indicates that this data field is not currently collected by the TCR and other entities.

D = Derived

R = Required

RH = historically collected and currently transmitted

RC = Collected by SEER from CoC-approved hospitals

RS = Required, site specific

S = Supplementary/recommended

T = Data is vital to complete exchange record

TH = Cases diagnosed before 2004, transmit data if available in exchange record

* = When available

^ = These text requirements may be met with one or several text block fields

• = No recommendations

= Central registries may code using SEER or COC data item and associated rules

+ = Central registries may collect either SER Summary Stage 2000 or Collaborative Stage

√ = Populated by TCR
