Note: Code 20 describes excision (removal) of the primary tumor, or “debulking” (less than full removal of the tumor). Most primary brain surgery is code 20.

30 Radical, total, gross resection of tumor, lesion or mass in brain

40 Partial resection of lobe of brain, when the surgery can not be coded as 20-30.

Note: Use this code to describe partial resection of a lobe.

55 Gross total resection of lobe of brain (lobectomy)

Note: Use this code to describe gross total resection of a lobe. This code should seldom be used.**Codes 30 - 55 are not applicable for spinal cord or spinal nerve primary sites.****Specimen sent to pathology from surgical events 20–55.**
