

Ameda One-Hand Manual Breast Pump

Troubleshooting

1. Check to make sure all pieces are correctly placed together (no extra pieces, like the diaphragm)
2. Check valve for damage and make sure it is in place
3. Make sure handle is attached correctly

Medela Harmony Manual Breast Pump

Troubleshooting

1. Make sure white membrane is not damaged and is flat on the yellow valve
2. Double check the stem assembly to make sure the pump handle is pressed all the way into the pump body, ensuring the white o-ring is in place in the stem handle
3. Check the assembly of the stem/diaphragm to make sure the oval base of the stem is properly seated in the oval base of the diaphragm
4. Make sure the diaphragm is pushed all the way onto the circular rim of the underside of the handle

Ameda Elite Multi Electric Pump

Troubleshooting

1. Make sure all the pieces are placed together properly, motor unit is plugged into outlet
2. Check tubing adapter to make sure it is connected to the motor unit. Make sure it is properly set for double/single-sided pumping.
3. Check valve for damage and make sure it is in place

Ameda Purely Yours Electric Pump

Troubleshooting

1. Make sure all the pieces are placed together properly, motor unit is plugged into outlet
2. Check tubing adapter to make sure it is connected to the motor unit. Make sure it is properly set for double/single-sided pumping.
3. Check valve for damage and make sure it is in place
