Nurse Case Manager Consultant  
Tuberculosis and Refugee Health Services Branch  
Texas Department of State Health Services

**Justin Irving**

Data Reporting Manager  
TB/HIV/STD Epidemiology and Surveillance  
Texas Department of State Health Services

# THISIS

- 
- **THISIS stands for : TB, HIV, & STD Integrated System (THISIS)**
  - Statewide database system that will house all TB, HIV and STD client information.
    - Serves as a single TB/HIV/STD application that facilitates detection and management of TB/HIV comorbidity
  - Will be used for electronic TB reporting, epidemiologic assessment and TB case management.

# THISIS

- 
- Will be used by all state, local and regional health departments in Texas.
    - Supports data entry at regional and local health departments
  - Includes a clinic scheduling component
  - Will replace TBPAM and all other TB databases currently in use statewide.

# THISIS

---

- The TB Program will use THISIS to further develop and manage:
  - Contact Investigation Program
  - Cluster Investigation and Genotyping Program
  - Drug Resistant Program
  - Jail / Inmate Positive Reactor Database
  - Jail Screening Plans
  - TB Nurse Case Management and Consultation

# THISIS

---

- THISIS is currently under development
- Phased rollout:
  - **April 2016 (central office only)**
    - RVCT requirements and basic TB case management
  - **Early Fall 2016 (central office only)**
    - complex TB case management, TB program evaluation, epidemiological analysis
  - **Late Fall 2016 (statewide)**
    - begin training for statewide use by local and regional TB programs
