Motor Vehicle Injury	1	----	18.5
Homicide	0	----	6.2
Suicide	0	----	10.4
Work-related Injury	0	----	3.1
Infant Deaths	0	----	5.7
Fetal Deaths ¹	0	----	5.6

¹ All births and deaths are by county of residence. Low birth weight represents live-born infants weighing less than 2,500 grams at birth. Late prenatal care refers to mothers who did not receive prenatal care during the first trimester of pregnancy. Fetal deaths are those occurring after 20 weeks gestation and prior to birth.

² Mortality data reported for 2000 are not comparable with data reported prior to 1999. Since 1999, TDH has followed the National Center for Health Statistics guidelines for reporting mortality statistics that include coding data using the International Statistical Classification of Diseases and Related Health Problems, 10th Revision and age adjustments using the 2000 Standard Population.

³ Fertility rates are per 1,000 women ages 15 - 44. Infant death rates and fetal death rates are per 1,000 live births. Work-related injury death rates are per 100,000 population age 16+. The remaining death rates have been age-adjusted to the 2000 U.S. standard population per 100,000 population. Communicable disease rates are also per 100,000 population. Rates and percents have not been calculated if 20 or fewer births, deaths or cases occurred, as indicated by "----".

Note
