

OVERNIGHT YOUTH CAMP OPERATORS AND STAFF: Page 6 of 6

- Personal fans should only be pointed at one camper; ceiling fans are permissible.
- Campers should sleep head to toe in upper and lower bunks. Bunk beds should be spaced as far apart as feasible in cabin. Air circulation through open windows and fans is encouraged.
- Develop and implement a Program Activity Hygiene Plan to include:
 - Sanitization of all program areas
 - Sanitization of equipment before and after use
 - Hand washing or hand sanitizing before and after activities
- Excursions away from the camp are strongly discouraged, and should be limited or eliminated where feasible. To the extent those excursions continue, develop and implement Transportation Protocols to include:**
 - One individual per seat and every other row in a vehicle
 - Staggered seating for maximum distancing
 - All campers and staff sanitize hands upon boarding and exiting the vehicle
- Develop a management plan for infectious outbreaks, including COVID-19:
 - Identify appropriate isolation facilities at the camp. If possible, the medical area should include multiple rooms, including a waiting area, a room or rooms to isolate those individuals exhibiting new or worsening signs or symptoms of possible COVID-19, and a separate room for individuals seeking other medical attention.
 - Guidelines for caring for ill campers or staff, and for isolating those individuals from the healthy population.
- Deep clean and sanitize the camp prior to the start of a new camp session.
