

CHECKLIST FOR AMUSEMENT PARK OPERATORS

Amusement parks contained in counties with less than 1,000 cumulative positive cases of COVID-19 may operate up to 50% of the normal operating limits as determined by the amusement park operator. Effective June 19, 2020, all amusement parks may operate up to 50% of the normal operating limits as determined by the amusement park operator. All employees and customers must wear a face covering (over the nose and mouth) wherever it is not feasible to maintain six feet of social distancing from another individual not in the same household or, for those engaging in physical activities outdoors, wherever the individual is not able to maintain a safe physical distance from others not in the same household.

The following are the minimum recommended health protocols for all amusement parks choosing to operate in Texas. Amusement parks may adopt additional protocols consistent with their specific needs and circumstances to help protect the health and safety of all employees, contractors, and customers.

The virus that causes COVID-19 can be spread to others by infected persons who have few or no symptoms. Even if an infected person is only mildly ill, the people they spread it to may become seriously ill or even die, especially if that person is 65 or older with pre-existing health conditions that place them at higher risk. Because of the hidden nature of this threat, everyone should rigorously follow the practices specified in these protocols, all of which facilitate a safe and measured reopening of Texas. The virus that causes COVID-19 is still circulating in our communities. We should continue to observe practices that protect everyone, including those who are most vulnerable.

Please note, public health guidance cannot anticipate every unique situation. Operators of amusement parks should stay informed and take actions based on common sense and wise judgment that will protect health and support economic revitalization. Operators of amusement parks should also be mindful of federal and state employment and disability laws, workplace safety standards, and accessibility standards to address the needs of both workers and customers.

Health protocols for your employees and contractors:

- Train all employees on appropriate cleaning and disinfection, hand hygiene, and respiratory etiquette.
- Screen employees and contractors before coming into the amusement park for each shift:
 - Send home any employee or contractor who has any of the following new or worsening signs or symptoms of possible COVID-19:

| | |
|---|--|
| – Cough | – Sore throat |
| – Shortness of breath or difficulty breathing | – Loss of taste or smell |
| – Chills | – Diarrhea |
| – Repeated shaking with chills | – Feeling feverish or a measured temperature greater than or equal to 100.0 degrees Fahrenheit |
| – Muscle pain | – Known close contact with a person who is lab confirmed to have COVID-19 |
| – Headache | |
 - Do not allow employees or contractors with new or worsening signs or symptoms listed above to return to work until:
 - In the case of an employee or contractor who was diagnosed with COVID-19, the individual may return to work when all three of the following criteria are met: at least 3 days (72 hours) have passed *since recovery* (resolution of fever without the use of fever-reducing medications); and the individual has *improvement* in symptoms (e.g., cough, shortness of breath); and at least 10 days have passed *since symptoms first appeared*; or

- In the case of an employee or contractor who has symptoms that could be COVID-19 and does not get evaluated by a medical professional or tested for COVID-19, the individual is assumed to have COVID-19, and the individual may not return to work until the individual has completed the same three-step criteria listed above; or
 - If the employee or contractor has symptoms that could be COVID-19 and wants to return to work before completing the above self-isolation period, the individual must obtain a medical professional's note clearing the individual for return based on an alternative diagnosis.
- Do not allow an employee or contractor with known close contact to a person who is lab-confirmed to have COVID-19 to return to work until the end of the 14-day self-quarantine period from the last date of exposure (with an exception granted for healthcare workers and critical infrastructure workers).
- Conduct temperature checks on all employees and contractors at the beginning of their shift.
- Conduct temperature checks on those guests willing to have their temperature taken.
- Have employees and contractors wash or sanitize their hands upon entering the premises and between interactions with visitors.
- Have employees and contractors maintain at least 6 feet of separation from other individuals. If such distancing is not feasible, other measures such as face covering, hand hygiene, cough etiquette, cleanliness, and sanitation should be rigorously practiced.
- If the amusement park provides a meal for employees and/or contractors, the amusement park is recommended to have the meal individually packed for each individual.

Health protocols for your facilities:

- If the amusement park operator or their representative association has submitted documents to the Open Texas Strike Force with protocols they would follow, then to the extent the protocols are more stringent in any respect to these protocols, the operator should follow the more stringent protocols.**
- If 6 feet of separation is not available between employees, contractors, and/or customers inside the facility, consider the use of engineering controls, such as dividers between individuals, to minimize the chances of transmission of COVID-19 such as at points of sale.
- Employees should be instructed to understand that young children and persons who are unable to adjust or remove face coverings should not be regarded as suitable candidates for wearing face coverings. The decision is up to the individual or their parent, guardian, or attendant.**
- Regularly and frequently clean and disinfect any regularly touched surfaces, such as doorknobs, tables, chairs, and restrooms.
- Disinfect any items that come into contact with visitors. This includes, as much as possible, disinfecting touches surfaces that comes into contact with guests between rides.
- Make hand sanitizer, disinfecting wipes, soap and water, or similar disinfectant readily available to employees, contractors, and customers.

- Consider placing [readily visible signage](#) at the business to remind everyone of best hygiene practices.
- Consider having an individual wholly or partially dedicated to ensuring the health protocols adopted by the amusement park are being successfully implemented and followed.
- Modify areas to enable distancing while employees are on lunch or during break periods.
- For rides that have individuals seated in rows, alternate the rows, allowing guests only in every other row. Do not seat individuals in the same row if they are not attending the amusement park together (eg, strangers).
- Separate vehicles in the parking lot by keeping at least 2 open spaces laterally from each vehicle that is parking at or near the same time.

If you serve food and/or beverages:

- Groups maintain at least 6 feet of distance from other groups at all times, including while waiting to be seated in the food area. A group is defined as no more than 10 persons including the members of the household and those persons who traveled together to the facility.
- Make a hand sanitizing station available upon entry to the food area.
- No tables of more than 10 people.
- Contactless payment is encouraged. Where not available, contact should be minimized. Both groups should wash or sanitize hands after the payment process.
- For waiter-provided food service:
 - Do not leave condiments, silverware, flatware, glassware, or other traditional table top items on an unoccupied table.
 - Provide condiments only upon request, and in single use (non-reusable) portions, or in reusable containers that are cleaned and disinfected after each use.
 - Clean and disinfect the area used for dining (table, etc.) after each group of customers depart the theater.
 - Use disposable menus (new for each patron), or clean and disinfect reusable menus after each use.
 - If you allow customers to write down their food orders, provide take-home pencils and notepads that cannot be used by other customers.
 - Have wait staff sanitize or wash hands between interactions with customers.
- For counter food service:
 - Provide condiments or flatware only in single use, individually-wrapped items, and provide condiments only upon request.
 - Have employees and contractors follow proper food-handling protocols.
 - Disinfect any items that come into contact with customers.
- Clean and disinfect the area used for dining (table, etc.) after each group of customers depart, including the disinfecting of tables, chairs, stalls, and countertops.

Health protocols if you have video game equipment:

- Assign at least one employee or contractor full time to disinfect the video games and other interactive amusements. **Continuous disinfecting is needed to protect customers.**
- Disinfect all gaming equipment before and after customer use, if at all possible.
- Provide equipment disinfecting products throughout facility for use on equipment.
- Ensure only one player can play a game at a time.
- Provide for at least 6 feet of separation between games.
- Provide hand sanitizer throughout the video game area.
