

Indicators as a Tool for System Assessment

Prereview Questionnaire

- 1. Has a multidisciplinary stakeholder group participated in the scoring and consensus process associated with the BIS tool? If not, are there plans to do so?**

Yes. The Southwest Texas RAC-Trauma Service Area P completed the scoring and consensus process associated with the BIS tool in 2005.

- 2. If the process has been completed, how were the findings used?**

They were not used.

- 3. Is there a date (year/month) set for a reassessment using the BIS tool to mark progress toward agreed-on goals or benchmarks?**

No, there has been no date set for a reassessment using the BIS tool.

Documentation Required

Before the site visit:

- No additional documentation required

On-site:

- Copies of recommendations or actions emanating from the BIS process
- Notes or minutes from any multidisciplinary stakeholder group that applied the BIS do not exist and will not be available for on-site documentation.
