

## **George Peck, MS, PhD**

State Medical Entomologist, Zoonosis Control Branch

---

Dr. Peck attended CSU Long Beach and the University of California, Riverside where he earned an MS in biology and a PhD in entomology, respectively. His research focused on mosquito ecology and integrated mosquito management.

He has worked in various roles since, including as an NIH postdoctoral fellow at the Arbovirus Field Station at UC Davis, a research associate at Washington State University, and a contracted research entomologist at the Walter Reed Army Institute of Research in Maryland. He has also held positions in mosquito control districts and in commercial pest control. In his current role at DSHS, Dr. Peck performs consultative and support services to stakeholders in government, academia, and industry.
