The overall high blood pressure prevalence in Texas is 35.1% (95% CI: 33.2-37.0).

Data Classification: Quantiles
Data Source: 2016 Texas Behavioral Risk Factor Surveillance System, Center for Health Statistics, Texas Department of State Health Services
High blood pressure is defined as a "Yes" response to the question "Have you ever been told by a doctor, nurse or other health professional that you have high blood pressure?"
Definition does not include borderline high blood pressure, pre-hypertension, or high blood pressure only during pregnancy.
