

Annual Report of Immunization Status of Students 2018-2019 School Year DSHS Immunization Unit

Background

Texas requires public school districts and accredited private schools to annually submit a report of students' immunization status (Title 25 Health Services, Texas Administrative Code, §§97.61-97.72). The Annual Report of Immunization Status is a self-reported survey that is used to measure immunization coverage among kindergarten and 7th grade students. Information on the reason kindergarten and 7th grade students are not vaccinated is also collected. Additionally, the number of all students (K-12) with a conscientious exemption affidavit on file is collected. The results of this report assist the Immunization Unit in identifying schools, districts, and counties with low immunization coverage rates and those with high rates of non-compliance (i.e. students delinquent for requirements).

Methods

In September 2018, the Annual Report of Immunization Status was mailed to 1,182 public school districts and 948 accredited private schools in Texas. The survey captures the immunization status of students on the survey's snapshot date, the last Friday in October. The survey collects aggregated data on the immunization status of the students, including the reasons why a child is not vaccinated according to the Texas school entry requirements, and the total number of conscientious exemption affidavit forms filed at the public school district or private school. More detailed information by vaccine is collected for Kindergarten and 7th grade students. Reports are prepared and submitted by staff at each public school district and accredited private school.

Results

Over 94% of the surveyed facilities submitted the report. Of the schools responding to the 2018-2019 annual report, 64,176 kindergarten through 12th grade students were reported as having a conscientious exemption for

at least one vaccine on file at the school. This number represents 1.20% of the number of students reported enrolled by schools in the survey.

Tables 1 and 2 show aggregated statewide results from the Fall of 2018 for Kindergarten and 7th grade respectively. The percent completely and incompletely immunized are shown for each vaccine. Immunization coverage was above 95% for each vaccine in both grades. Reasons for not completing the vaccine series are also reported.

Tables 3 and 4 represent students who are completely vaccinated for each vaccine by region and their respective grade levels.

Figure 1 illustrates the percentage of kindergarten through 12th grade students with a conscientious exemption for one or more vaccines by county as reported by participating school districts and accredited private schools.

Conclusion

Overall, Texas schools reported high rates of coverage for each vaccine. Compared to the 2017-2018 school year, kindergarten students have slightly lower coverage as reports of conscientious exemptions increased slightly in 2018-2019, while delinquency and provisional enrollment decreased. For most vaccines, kindergarten coverage decreased by approximately 0.1 percentage points from the previous school year. Kindergarten conscientious exemption rates increased by at least 0.3 percentage points in every vaccine category while delinquency rates decreased by 0.11 to 0.20 percentage points. For 7th grade students, vaccination coverage improved in the 2018-2019 school year for the Tdap, meningococcal and varicella vaccines. Seventh grade conscientious exemption rates increased slightly, by 0.1 percentage points for most vaccines while delinquency rates decreased by 0.01 to 0.7 percentage points.

Table 1. Texas Kindergarten Annual Report of Immunization Status, School Year 2018-2019

Vaccine Category	Percent Completely Vaccinated	Reported Reasons for Lack of Completion by Vaccine			
		Conscientious Exemptions	Medical Exemptions	Provisional Enrollment	Delinquent
		%	%	%	%
DTaP (<i>Diphtheria, tetanus, and acellular pertussis</i>)	96.69%	1.92%	0.09%	0.49%	0.81%
Hepatitis A	96.59%	1.85%	0.08%	0.90%	0.58%
Hepatitis B	97.56%	1.79%	0.06%	0.18%	0.41%
MMR (<i>Measles, mumps, and rubella</i>)	96.93%	1.99%	0.11%	0.16%	0.81%
Polio	96.90%	1.95%	0.08%	0.27%	0.80%
Varicella* (<i>Chickenpox</i>)	96.27%	1.99%	0.13%	0.44%	0.89%

* An additional 0.28% of Kindergarten students met school entry requirements through reported history of varicella (chickenpox) disease.

Table 2. Texas 7th Grade Annual Report of Immunization Status, School Year 2018-2019

Vaccine Category	Percent Completely Vaccinated	Reported Reasons for Lack of Completion by Vaccine			
		Conscientious Exemptions	Medical Exemptions	Provisional Enrollment	Delinquent
		%	%	%	%
Tdap (<i>Tetanus, diphtheria, and acellular pertussis</i>)	97.03%	1.22%	0.06%	0.13%	1.56%
Hepatitis A	98.33%	0.86%	0.05%	0.41%	0.35%
Hepatitis B	98.77%	0.82%	0.03%	0.09%	0.29%
MCV4 (<i>Meningococcal conjugate</i>)	96.94%	1.21%	0.06%	0.10%	1.69%
MMR (<i>Measles, mumps, and rubella</i>)	98.85%	0.80%	0.05%	0.04%	0.26%
Polio	98.68%	0.87%	0.04%	0.10%	0.31%
Varicella* (<i>Chickenpox</i>)	97.34%	0.89%	0.07%	0.12%	0.34%

* An additional 1.24% of 7th grade students met school entry requirements through reported history of varicella (chickenpox) disease.

Table 3. Percent of Kindergarten Students Completely Vaccinated by Public Health Region, School Year 2018-2019

Vaccine	Public Health Region							
	1	2/3	4/5N	6/5S	7	8	9/10	11
DTaP (<i>Diphtheria, tetanus, and acellular pertussis</i>)	96.52%	96.85%	96.47%	96.90%	96.04%	97.35%	96.71%	98.99%
Hepatitis A	96.20%	95.66%	96.51%	96.83%	95.80%	97.32%	97.22%	98.79%
Hepatitis B	97.81%	96.89%	97.71%	97.62%	96.71%	98.13%	98.24%	99.42%
MMR (<i>Measles, mumps, and rubella</i>)	96.83%	96.24%	96.87%	96.95%	96.21%	97.56%	97.47%	99.06%
Polio	96.82%	96.17%	96.75%	96.89%	96.18%	97.70%	97.27%	99.14%
Varicella* (<i>Chickenpox</i>)	96.04%	95.44%	96.48%	96.32%	95.58%	97.14%	96.64%	98.44%

* This percentage does not reflect kindergarten students who met school entry requirements through reported history of varicella (chickenpox) disease.

Table 4. Percent of 7th Grade Students Completely Vaccinated by Public Health Region, School Year 2018-2019

Vaccine	Public Health Region							
	1	2/3	4/5N	6/5S	7	8	9/10	11
Tdap (<i>Tetanus, diphtheria, and acellular pertussis</i>)	97.14%	97.08%	97.57%	95.88%	96.45%	98.19%	97.30%	99.04%
Hepatitis A	98.50%	98.22%	98.64%	97.94%	97.91%	98.77%	98.55%	99.38%
Hepatitis B	98.82%	98.72%	98.95%	98.42%	98.39%	99.09%	99.18%	99.70%
MCV4 (<i>Meningococcal conjugate</i>)	97.17%	97.20%	97.52%	95.17%	97.14%	98.21%	97.06%	99.06%
MMR (<i>Measles, mumps, and rubella</i>)	98.97%	98.84%	98.99%	98.53%	98.47%	99.10%	99.17%	99.69%
Polio	98.73%	98.59%	98.82%	98.35%	98.27%	98.99%	99.11%	99.68%
Varicella* (<i>Chickenpox</i>)	97.50%	97.42%	98.06%	97.01%	96.72%	97.93%	97.81%	97.47%

* This percentage does not reflect 7th grade students who met school entry requirements through reported history of varicella (chickenpox) disease.
