**Vaccine Management** — Recommendations for Storage and Handling of Selected Biologicals

---

**DPT – Pediat – Diphtheria, Tetanus, and Pertussis Vaccines**

**Shipment Requirements:**
- Shipment must be made at or below 8˚C.
- Shipment should be made as soon as possible after receipt of the consignment.
- The stored vaccine must be at or below 8˚C at the time of delivery.
- The consignee should take immediate action to deliver the vaccine to the end user.
- Vaccine must be delivered to an end user capable of maintaining the vaccine at or below 8˚C.

**Storage Requirements:**
- Vaccine should be stored at or below 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

**Special Instructions:**
- Vaccine should be stored at or below 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

---

**IPV – Inactivated Poliacide Virus Vaccines**

**Shipment Requirements:**
- Shipment must be made at or below 2˚ to 8˚C.
- Shipment should be made as soon as possible after receipt of the consignment.
- The stored vaccine must be at or below 8˚C at the time of delivery.
- The consignee should take immediate action to deliver the vaccine to the end user.
- Vaccine must be delivered to an end user capable of maintaining the vaccine at or below 2˚ to 8˚C.

**Storage Requirements:**
- Vaccine should be stored at or below 2˚ to 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

**Special Instructions:**
- Vaccine should be stored at or below 2˚ to 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

---

**HSV-1 – Herpes Simplex Virus type 1 (Varicella-Zoster Virus)**

**Shipment Requirements:**
- Shipment must be made at or below 2˚ to 8˚C.
- Shipment should be made as soon as possible after receipt of the consignment.
- The stored vaccine must be at or below 8˚C at the time of delivery.
- The consignee should take immediate action to deliver the vaccine to the end user.
- Vaccine must be delivered to an end user capable of maintaining the vaccine at or below 2˚ to 8˚C.

**Storage Requirements:**
- Vaccine should be stored at or below 2˚ to 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

**Special Instructions:**
- Vaccine should be stored at or below 2˚ to 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

---

**MCRA – Meningococcal Conjugate Vaccine**

**Shipment Requirements:**
- Shipment must be made at or below 2˚ to 8˚C.
- Shipment should be made as soon as possible after receipt of the consignment.
- The stored vaccine must be at or below 8˚C at the time of delivery.
- The consignee should take immediate action to deliver the vaccine to the end user.
- Vaccine must be delivered to an end user capable of maintaining the vaccine at or below 2˚ to 8˚C.

**Storage Requirements:**
- Vaccine should be stored at or below 2˚ to 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

**Special Instructions:**
- Vaccine should be stored at or below 2˚ to 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

---

**MCVC – Meningococcal Conjugate Vaccine**

**Shipment Requirements:**
- Shipment must be made at or below 2˚ to 8˚C.
- Shipment should be made as soon as possible after receipt of the consignment.
- The stored vaccine must be at or below 8˚C at the time of delivery.
- The consignee should take immediate action to deliver the vaccine to the end user.
- Vaccine must be delivered to an end user capable of maintaining the vaccine at or below 2˚ to 8˚C.

**Storage Requirements:**
- Vaccine should be stored at or below 2˚ to 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

**Special Instructions:**
- Vaccine should be stored at or below 2˚ to 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

---

**MMR – Measles, Mumps, Rubella Vaccines**

**Shipment Requirements:**
- Shipment must be made at or below 2˚ to 8˚C.
- Shipment should be made as soon as possible after receipt of the consignment.
- The stored vaccine must be at or below 8˚C at the time of delivery.
- The consignee should take immediate action to deliver the vaccine to the end user.
- Vaccine must be delivered to an end user capable of maintaining the vaccine at or below 2˚ to 8˚C.

**Storage Requirements:**
- Vaccine should be stored at or below 2˚ to 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

**Special Instructions:**
- Vaccine should be stored at or below 2˚ to 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

---

**PCV – Pneumococcal Conjugate Vaccines**

**Shipment Requirements:**
- Shipment must be made at or below 2˚ to 8˚C.
- Shipment should be made as soon as possible after receipt of the consignment.
- The stored vaccine must be at or below 8˚C at the time of delivery.
- The consignee should take immediate action to deliver the vaccine to the end user.
- Vaccine must be delivered to an end user capable of maintaining the vaccine at or below 2˚ to 8˚C.

**Storage Requirements:**
- Vaccine should be stored at or below 2˚ to 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

**Special Instructions:**
- Vaccine should be stored at or below 2˚ to 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

---

**RotaVax – Rota Virus Vaccine**

**Shipment Requirements:**
- Shipment must be made at or below 2˚ to 8˚C.
- Shipment should be made as soon as possible after receipt of the consignment.
- The stored vaccine must be at or below 8˚C at the time of delivery.
- The consignee should take immediate action to deliver the vaccine to the end user.
- Vaccine must be delivered to an end user capable of maintaining the vaccine at or below 2˚ to 8˚C.

**Storage Requirements:**
- Vaccine should be stored at or below 2˚ to 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

**Special Instructions:**
- Vaccine should be stored at or below 2˚ to 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

---

**Varicella – Varicella-Zoster Vaccines**

**Shipment Requirements:**
- Shipment must be made at or below 2˚ to 8˚C.
- Shipment should be made as soon as possible after receipt of the consignment.
- The stored vaccine must be at or below 8˚C at the time of delivery.
- The consignee should take immediate action to deliver the vaccine to the end user.
- Vaccine must be delivered to an end user capable of maintaining the vaccine at or below 2˚ to 8˚C.

**Storage Requirements:**
- Vaccine should be stored at or below 2˚ to 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

**Special Instructions:**
- Vaccine should be stored at or below 2˚ to 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

---

**Vaccines for Children (VFC) Program: Public Health Region 7**

**Public Health Region 7 Immunization Program**

**MCRA – Meningococcal Conjugate Vaccine**

**Shipment Requirements:**
- Shipment must be made at or below 2˚ to 8˚C.
- Shipment should be made as soon as possible after receipt of the consignment.
- The stored vaccine must be at or below 8˚C at the time of delivery.
- The consignee should take immediate action to deliver the vaccine to the end user.
- Vaccine must be delivered to an end user capable of maintaining the vaccine at or below 2˚ to 8˚C.

**Storage Requirements:**
- Vaccine should be stored at or below 2˚ to 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

**Special Instructions:**
- Vaccine should be stored at or below 2˚ to 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

---

**Public Health Region 13**

**MCRA – Meningococcal Conjugate Vaccine**

**Shipment Requirements:**
- Shipment must be made at or below 2˚ to 8˚C.
- Shipment should be made as soon as possible after receipt of the consignment.
- The stored vaccine must be at or below 8˚C at the time of delivery.
- The consignee should take immediate action to deliver the vaccine to the end user.
- Vaccine must be delivered to an end user capable of maintaining the vaccine at or below 2˚ to 8˚C.

**Storage Requirements:**
- Vaccine should be stored at or below 2˚ to 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.

**Special Instructions:**
- Vaccine should be stored at or below 2˚ to 8˚C for up to 7 days after delivery.
- Vaccine should be stored at 2˚ to 8˚C for up to 2 weeks after delivery.
