Blood Lead Surveillance Branch

Data Considerations

1. Analysis is based on a current dataset (02/18/2026) and is considered provisional and subject to change.
2. Rates per 100.
3. Rates that cannot be calculated are indicated with "~".
4. In October of 2021, the Center for Disease Control and Prevention (CDC) recommended lowering the blood lead reference levels (EBLL). Texas DSHS implemented the lower BLRV in 2023. Data tables for 2023 utilize a BLRV of 3.5 µg/dL to identify individuals with an EBLL.
5. Each person is represented once at the date of the highest test for the given calendar year.
6. Each person's residential geography is represented by the address at the time of the highest test per calendar year.
7. Because BLSB only actively gathers addresses for individuals with blood lead levels 3.5 µg/ dL or greater, persons with blood lead levels less than 3.5 µg/dL may be underrepresented geographically due to the lack of availability of address information.
8. Caution should be used when interpreting data with a small count (i.e., less than 20).
9. Cell sizes of 1-4 are expressed as "< 5" to protect the identity of individuals.
10. Population data is obtained from Texas Demographic Center, located at <https://demographics.texas.gov/Data/TPEPP/>

Identification of Persons/Entities with Blood Lead Data:

- 1 No person will attempt to use these data to identify any person or entity.
- 2 If the identity of a person or entity should be discovered inadvertently:
- 3 No use will be made of this knowledge.
- 4 The Blood Lead Surveillance Branch will be notified immediately of the incident via phone at (800) 588 – 1248 or email at TexasBloodLead@dshs.texas.gov
- 5 The information that would identify the individual or entity will be destroyed, as requested by the Blood Lead Surveillance Branch.
- 6 No one else will be informed of the discovery.
