# Stay “Up to date on” your COVID-19 Vaccination

**CDC now uses the phrase “up to date” when talking about COVID-19 vaccination.**

- CDC recommends that individuals stay “**up to date**” by receiving **any additional or booster doses they are eligible for**, according to CDC’s recommendations, to ensure they have optimal protection against COVID-19.
- The technical definition of “fully vaccinated” – two doses of an mRNA vaccine or one dose of the J&J vaccine – has not changed. Individuals are considered fully vaccinated once they have received their primary series.
