ZIKA VIRUS DISEASE	-	0	0	0	0	0	0	0	0	0	0	-

Note: Per Emerging and Acute Infectious Disease Unit Data Suppression policy, beginning with data published after September 2021, subgroup case counts of 1-4 and fatalities counts of 1-9 are not provided (-). Additional counts (--) are suppressed to prevent back-calculation of suppressed small counts.

¹ Age is calculated based on date of birth and event date, which is onset date if known.

² Diseases listed reflect those that were notifiable in Texas each year based on Texas Administrative Code and where cases were reported in the current reporting year. Counts are reported by Texas DSHS age groupings. Case counts are presumed to be underestimates of true disease incidence due to incomplete reporting. Data in this table may not match tables in articles in this publication that were written prior to completion of data review for this report, or other previously published materials.

- ³ Amebic Central Nervous System (CNS) infections include primary amebic meningoencephalitis (PAM) caused by *Naegleria fowleri* and CNS infections caused by other amebae.
- ⁴ Neglected tropical diseases reportable effective for 2016 are ancylostomiasis (hookworm), ascariasis, echinococcosis, fascioliasis, paragonimiasis, and trichuriasis.
- ⁵ Infant botulism cases are for patients under 1 year of age by definition.
- ⁶ Effective in 2016, *Haemophilus influenzae* type b infection, invasive was expanded to all invasive *Haemophilus influenzae* regardless of type.
- ⁷ Includes all cases of invasive *Neisseria meningitidis* including cases of meningitis, septicemia, and joint infections.
- ⁸ The "Rickettsiosis, unspecified" condition was added to the Epi Case Criteria Guide in 2016 to capture rickettsial cases that could not be definitively classified as either flea-borne typhus or spotted fever rickettsiosis.
- ⁹ Vancomycin-intermediate resistant *Staphylococcus aureus* (VISA)--*Staphylococcus aureus* with a vancomycin minimum inhibitory concentration (MIC) of 4 µg/mL through 8 µg/mL.
