<sup>&</sup>lt;sup>1</sup>California Serogroup includes California encephalitis, Jamestown Canyon, Keystone, La Crosse, snowshoe hare, and trivittatus viruses.

<sup>3</sup>For weekly case counts and additional information related to Zika virus, please visit <u>www.texaszika.org</u>.

<sup>&</sup>lt;sup>2</sup>PVD - Presumptive viremic blood donors are people who had no symptoms at the time of donating blood through a blood collection agency, but whose blood tested positive when screened for the presence of West Nile virus or Zika virus . Unless they meet the case reporting criteria, they are not counted as a case for official reporting purposes and are not included in the "Total" column.
