Pharmacy Search

- Pharmacy selection is handled by agency staff. You may search for the pharmacy that is most convenient for the client and select that pharmacy for their prescriptions.
- A client must have a pharmacy assigned to them before they can receive medication. Medications are ordered in the Pharmacy Portal by pharmacy staff or by THMP and sent to the pharmacy for pick up.
- Only THMP Admins can create new pharmacies in TCT.

Pharmacy Search

You may use the **Pharmacy** tile to research nearby pharmacies.

- 1 To search for a pharmacy, select the **Pharmacy** tile.

Pharmacy Search

- 2 To find a pharmacy, begin your search by using both the location filters: City and Zip Code. If that does not work, you can search by pharmacy code or name.

NOTE: Keep in mind that only certain user roles may change a pharmacy assignment for a client.

Pharmacy Search

- 3 If you want to change the pharmacy for a client and have the correct permissions, navigate back to Client Search to update their pharmacy assignment.

NOTE: The client is unable to make this change from the Client Portal but can request a change through their case worker.

A nighttime photograph of a river scene, likely the San Antonio River Walk. The river is calm, reflecting the lights. On the left, there are colorful umbrellas and outdoor seating. On the right, there are stone bridges and a large red sculpture. The background shows buildings and trees illuminated with various lights.
