

Texas Newborn Screening (NBS) Courier Service

Did you know the Texas Department of State Health Services (DSHS) Public Health Laboratory offers courier service at **no additional cost**?

To improve timely delivery of specimens, submitters should avoid using regular United States Postal Service (USPS) for submitting NBS specimens for testing. Specimens sent through standard mail often arrive too late for testing and do not include tracking.

Submitters that are using USPS may enroll in the DSHS NBS courier program at no additional cost. Submitters can enroll by completing the Courier Expansion Enrollment Form at bit.ly/49bixDb or scanning the QR code below.

After submitting the form, the DSHS Courier Coordinator will contact the submitter with the next steps for enrollment.
