Quality Assurance and Improvement for TVFC Responsible Entities (RE)

Quality Assurance and Improvement (QAI) Team

TEXAS
Health and Human
Services

Texas Department of State
Health Services

DISCLAIMER

The information presented today is based on CDC's most recent guidance and may change.

February 22, 2024

Agenda

TEXAS
Health and Human
Services

- Quality Assurance (QA) and Quality Improvement (QI)
- Compliance – Provider Education Assessment and Reporting system (PEAR)
- Immunization Quality Improvement for Providers (IQIP) – REDCap
- Program Oversight
- Program Goals

TEXAS
Health and Human
Services

Texas Department of State
Health Services

Quality Assurance

Sejal Patel
Immunization Unit QAI Team Lead

Purpose of QA

- The purpose of QA is to assess, support, and educate the staff regarding TVFC policies and procedures.
- Provider failure to comply and take corrective action will lead to suspension from program.

TEXAS
Health and Human Services

Texas Department of State
Health Services

Quality Assurance: PEAR

- The Quality Assurance and Improvement (QAI) team uses the PEAR software to document, review, and monitor all TVFC provider site compliance visits.
- PEAR-generated reports are used for quality assurance evaluations of providers' compliance to TVFC programs policies.

TEXAS
Health and Human Services

Texas Department of State
Health Services

Types of QA Visits

- **VFC Compliance Visit:** For Texas, VFC compliance visits occur every 12 months with no less than 11 months in between.
- **Unannounced Storage and Handling (USH) Visits:** USH visits can occur at any time within the project year as often as a provider needs assistance; however, there must be at least three months between visit types.
- **Enrollment Visit:** All new program provider enrollees receive the enrollment visit. The new program provider can order vaccines only after this enrollment visit is conducted and completed.

TEXAS
Health and Human Services

Services

Texas Department of State
Health Services

Quality Improvement: REDCap

Immunization Quality Improvement for Providers (IQIP)

Purpose of IQIP

- IQIP seeks to increase on-time vaccination among child and adolescent patients according to the ACIP routine immunization schedule.
- IQIP gives providers technical assistance and four strategies proven to increase vaccine uptake.
- IQIP ensures that providers receive personalized improvement plans, assessments, training, and resources.

TEXAS
Health and Human Services

Texas Department of State
Health Services

Strategies to Increase Vaccine Uptake

The provider will select two of the following components to improve upon:

- Facilitating return for vaccination
- Leveraging IIS functionality to improve immunization practices
- Strengthening vaccine communication
- Giving a strong vaccine recommendation (including HPV)

Quality Assurance: Compliance Processes

Fiona Price, QAI Coordinator

Storage and Handling: Overview

- CDC Vaccine Storage and Handling Resources:
 - Visit [CDC Healthcare Providers: Vaccine Storage and Handling](#).
 - Review the [CDC Vaccine Storage and Handling Toolkit - January 2023](#).
- Storage and Handling Practices and Procedures:
 - Food and beverages should never be stored in the unit with vaccines.
 - Do not store any vaccines in a dormitory-style or bar-style combined refrigerator/freezer unit under any circumstances.
 - Never leave a vaccine shipping container unpacked and unattended.

TEXAS
Health and Human Services

Texas Department of State
Health Services

Storage and Handling: Overview (Continued)

- Data Loggers:
 - Recommend different expiration dates for back-up Data Loggers.
 - Maintain Certificates of Calibration and Service Records for all Data Loggers.
- Vaccine Management Plans:
 - Include current clinic information, such as key staff updates, pertinent contacts, and annual updates to vaccine management plans.

TEXAS
Health and Human Services

Texas Department of State
Health Services

Storage and Handling: Temperature Ranges

- **Refrigerators:** Must maintain temperatures between 36.0° F and 46.0° F (2.0° C and 8.0° C).
- **Freezers:** Must maintain temperatures between -58.0° F and +5.0° F (-50.0° C and -15.0° C).

TEXAS
Health and Human Services

Texas Department of State
Health Services

Knowledge Check

TEXAS

Health and Human Services

Texas Department of State
Health Services

Why is storage and handling important?

- A. Maintains patient confidence in vaccines and decreases the need for providers revaccinating patients
- B. Prevents financial loss due to wasted vaccines
- C. Ensures vaccine potency
- D. All the above

Temperature Recording Form for Refrigerator – Fahrenheit

Monitor temperatures closely!

1. Write your initials below in "Staff Initials," and note the time in "Exact Time."
2. Record temps twice each workday.
3. Record the min / max temps once each workday—preferably in the morning.
4. Put an "X" in the row that corresponds to the refrigerator's temperature.
5. If any out-of-range temp, see instructions to the right.
6. After each month has ended, save each month's log for 5 years.
7. Enter the data logger expiration date.

Month / Year January 2024 VFCPIN 061829

Facility Name DSHS

TVFC Coordinator Fiona Price

Take action if temp is out of range—too warm (above 46°F) or too cold (below 36°F).

1. Label exposed vaccine "do not use," and store it under proper conditions as quickly as possible. Do not discard vaccines unless directed to by your state / local health department and / or the manufacturer(s).
2. Record the out-of-range temps and the room temp in the "Action" area on the bottom of the log.
3. Notify your vaccine coordinator, or call the immunization program at your state or local health department for guidance.
4. Document the action taken on the "Vaccine Storage Troubleshooting Record" on page 3.

Day of Month	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Staff Initials	FP	FP													
Exact Time	8:05														
Min / Max (°F)	39.2 / 41.3														
Danger! Temperatures above 46°F are too warm! Write any out-of-range temps and room temp on the lines below and call your state or local health department immediately!															
TEMPERATURES	46°F														
	45°F														
	44°F														
	43°F														
	42°F														
	41°F														
	40°F	.3	.3												
	39°F														
ACCEPTABLE	38°F														
	37°F														
	36°F														
	Danger! Temperatures below 36°F are too cold! Write any out-of-range temps and room temp on the lines below and call your state or local health department immediately!														
ACTION	Write any out-of-range temps (above 46°F or below 36°F) here:														
	Room Temperature	72.3													

If you have a vaccine storage issue, also complete "Vaccine Storage Troubleshooting Record" found on page 3.

Emergency Transport

Minh Tri Dinh, QAI Coordinator

Emergency Transport Overview

- Transport for a maximum of 8 hours.
- Transport diluents with their corresponding vaccines.
- Facility should have a sufficient supply of materials.
- The facility must record the temperature throughout all stages of transport.

TEXAS
Health and Human Services

Texas Department of State
Health Services

Emergency Transport Unit Process

TEXAS
Health and Human Services

Texas Department of State
Health Services

Packing Vaccines for Transport during Emergencies

Be ready BEFORE the emergency

Equipment failures, power outages, natural disasters—these and other emergency situations can compromise vaccine storage conditions and damage your vaccine supply. **It's critical to have an up-to-date emergency plan with steps you should take to protect your vaccine.** In any emergency event, activate your emergency plan immediately. Ideally, vaccine should be transported using a portable vaccine refrigerator or qualified pack-out. However, if these options are not available, you can follow the emergency packing procedures for refrigerated vaccines below:

1 Gather the Supplies

Hard-sided coolers or Styrofoam™ vaccine shipping containers

- Coolers should be large enough for your location's typical supply of refrigerated vaccines.
- Can use original shipping boxes from manufacturers if available.
- Do NOT use soft-sided collapsible coolers.

Conditioned frozen water bottles

- Use 16.9 oz. bottles for medium/large coolers or 8 oz. bottles for small coolers (enough for 2 layers inside cooler).
- Do NOT reuse coolant packs from original vaccine shipping container, as they increase risk of freezing vaccines.
- Freeze water bottles (can help regulate the temperature in your freezer).
- Before use, you must condition the frozen water bottles. Put them in a sink filled with several inches of cool or lukewarm water until you see a layer of water forming near the surface of bottle. The bottle is properly conditioned if ice block inside spins freely when rotated in your hand (this normally takes less than 5 minutes).

Insulating material — You will need two of each layer

- **Insulating cushioning material** - Bubble wrap, packing foam, or Styrofoam™ for a layer above and below the vaccines, at least 1 in thick. Make sure it covers the cardboard completely. Do NOT use packing peanuts or other loose material that might shift during transport.
- **Corrugated cardboard** - Two pieces cut to fit interior dimensions of cooler(s) to be placed between insulating cushioning material and conditioned frozen water bottles.

Temperature monitoring device - Digital data logger (DDL) with buffered probe. Accuracy of $\pm 1^\circ\text{F}$ ($\pm 0.5^\circ\text{C}$) with a current and valid certificate of calibration testing. Pre-chill buffered probe for at least 5 hours in refrigerator. Temperature monitoring device currently stored in refrigerator can be used, as long as there is a device to measure temperatures for any remaining vaccines.

Why do you need cardboard, bubble wrap, and conditioned frozen water bottles?

Conditioned frozen water bottles and corrugated cardboard used along with one inch of insulating cushioning material such as bubble wrap keeps refrigerated vaccines at the right temperature and prevents them from freezing. **Reusing vaccine coolant packs from original vaccine shipping containers can freeze and damage refrigerated vaccines.**

health department.

CDC/MS17-101, August 2018

Packing Vaccines for Transport during Emergencies

2 Pack for Transport

Conditioning frozen water bottles (this normally takes less than 5 minutes)

- Put frozen water bottles in sink filled with several inches of cool or lukewarm water or under running tap water until you see a layer of water forming near surface of bottle.
- The bottle is properly conditioned if ice block inside spins freely when rotated in your hand.
- If ice "sticks," put bottle back in water for another minute.
- Dry each bottle.
- Line the bottom and top of cooler with a single layer of conditioned water bottles.
- Do NOT reuse coolant packs from original vaccine shipping container.

NOTE:
This pack-out can maintain appropriate temperatures for up to 8 hours, but the container should not be opened or closed repeatedly.

Close lid - Close the lid and attach DDL display and temperature log to the top of the lid.

Conditioned frozen water bottles - Fill the remaining space in the cooler with an additional layer of conditioned frozen water bottles.

Insulating material - Another sheet of cardboard may be needed to support top layer of water bottles.

Insulating cushioning material - Cover vaccines with another 1 in. layer of bubble wrap, packing foam, or Styrofoam™.

Vaccines - Add remaining vaccines and diluents to cooler, covering DDL probe.

Temperature monitoring device - When cooler is halfway full, place DDL buffered probe in center of vaccines, but keep DDL display outside cooler until finished loading.

Vaccines - Stack boxes of vaccines and diluents on top of insulating material.

Insulating cushioning material - Place a layer of bubble wrap, packing foam, or Styrofoam™ on top (layer must be at least 1 in. thick and must cover cardboard completely).

Insulating material - Place 1 sheet of corrugated cardboard over water bottles to cover them completely.

Conditioned frozen water bottles - Line bottom of the cooler with a single layer of conditioned water bottles.

3 Arrive at Destination

Before opening cooler - Record date, time, temperature, and your initials on vaccine temperature log.

Storage - Transfer boxes of vaccines quickly to storage refrigerator.

Troubleshooting - If there has been a temperature excursion, contact vaccine manufacturer(s) and/or your immunization program before using vaccines. Label vaccines "Do Not Use" and store at appropriate temperatures until a determination can be made.

Emergency Transport: Frozen Vaccines

If frozen vaccines must be transported, use a portable vaccine freezer unit or qualified container and packout that maintains temperatures between -58.0° F and +5.0° F (-50.0° C and -15.0° C).

Steps for transporting frozen vaccines:

- Place a DDL (preferably with a buffered probe) in the container as close as possible to the vaccines.
- Immediately upon arrival at the destination, unpack the vaccines and place them in a freezer at a temperature range between -58.0° F and +5.0°F (-50.0° C and -15.0° C). Any stand-alone freezer that maintains these temperatures is acceptable.

TEXAS
Health and Human Services

Texas Department of State
Health Services

Emergency Transport: Appropriate Materials

Appropriate materials include:

- Portable vaccine refrigerator/freezer units (preferred option)
- Qualified containers and packouts
- Hard-sided insulated containers or Styrofoam (Use in conjunction with the Packing Vaccines for Transport during Emergencies* tool. This system is only to be used in an emergency.)
- Coolant materials such as Phase Change Materials (PCMs) or frozen water bottles that can be conditioned to 39.0° F to 41.0° F (4.0° C to 5.0° C)
- Insulating materials such as bubble wrap and corrugated cardboard with enough to form two layers per container
- Data Logger for each container

PEAR Suspension

Emily Lai, QAI Coordinator

Follow-Up Actions

- At the end of every Compliance Site Visit or Storage and Handling Visit, the reviewer will discuss any follow-up action items with the Primary Vaccine Coordinator (PVC), the Backup Vaccine Coordinator (BVC), and the Signing Clinician (SC). Follow-up action items need to be resolved to avoid Suspension.

Example of Follow-Up Action Items after a Compliance or Storage and Handling Site Visit:

REQUIRED FOLLOW-UP ACTIONS

Below is a list of actions that are required to be taken as a result of your recent site visit. This list, along with a timeline for completion, is intended to support your office/clinic with successfully implementing the VFC Program. Please also review the full list of *2022-2023 VFC Compliance Visit Requirements & Recommendations* at the end of this document.

1. VACCINE ADMINISTRATION FEE

The VFC provider's vaccine administration fee for non-Medicaid, VFC-eligible children must not exceed the state/territory vaccine administration fee cap established by the Centers for Medicare & Medicaid Services (CMS). For current fee caps, refer to www.gpo.gov/fdsys/pkg/FR-2012-11-06/pdf/2012-26507.pdf.

- **Due Date:** 02/22/2022
Required Action: In accordance with CDC Requirements, submit documentation for an established vaccine administration fee charged to non-Medicaid, VFC-eligible patients

TEXAS
Health and Human Services

Texas Department of State
Health Services

Compliance Follow-up Action items

Overdue: Follow-up action items that have NOT been resolved by the due date post site visit

TEXAS

Health and Human Services

Texas Department of State
Health Services

Content Area: Displays the section of the PEAR Reviewers Guide where compliance question and direction is found

Follow-up Type: Immediate Action item is a non-compliant action that site reviewer must correct with the provider at the time of visit.

Reviewer Action Completed on: Date entered by site reviewer for an immediate action item **OR** by the Responsible Entity (RE) if the due date is at later time

FOLLOW-UP ACTION LIST TABLE

SAVE

- 2.1.2024 TVFC Provider Suspension Notification.pdf 120 KB
- 2.1.2024 Warning TVFC Provider Suspensions Notification.pdf 120 KB

Good evening Responsible Entities (REs),

We have completed another round of suspensions regarding overdue PEAR items. We have also notified providers who will have overdue PEAR items if they are not completed by midnight of 02/29/2024. After this date they will be suspended.

Attached are:

- The PEAR Suspension Report spreadsheet which includes:
 - List of newly suspended providers
 - List of currently suspended providers
 - List of providers who will be overdue after 02/29/2024
- Copy of Suspension Notification sent to providers
- Copy of the Suspension Warning Notification sent to providers

If you have any questions, please reach out.

PEAR Suspension Report

PEAR Suspension Reports are generated on the first business day of each month to reflect:

- PINs that have overdue PEAR follow-up items, which will appear as suspended. They will receive a suspension notice.

Suspension Notice:

Your TVFC Program Site is currently in non-compliance

- PINs that have PEAR follow-up items that are due in the current month of the suspension report. They will receive a warning notice.

Warning Notice:

Your TVFC Program Site will soon be out of compliance

New Suspensions

Already Suspended

Will be Suspended after 31Jan24

To Be Reviewed

Suspension Notice

A Suspension Notice is sent to newly suspended providers.

 TEXAS Health and Human Services Texas Department of State Health Services	<u>Suspension Notice:</u> Your TVFC Program Site is currently in <u>non-compliance</u>
<p style="text-align: right;">January 2, 2024</p>	
<p>Dear Texas Vaccines for Children (TVFC) Provider,</p> <p>Clinic Name: «Provider_Name» PIN: «Provider_PIN»</p>	
<p>Thank you for your participation in the TVFC Program and completing your site visit.</p>	
<p>Our records indicate that your facility currently has overdue follow-up activities from your recent TVFC Program Compliance or Storage & Handling site visit in PEAR database that have not been addressed before December 31, 2023, deadline. Organizations with overdue follow-up activities are non-compliant per TVFC Program policies. Therefore, your organization is suspended after this date until all overdue follow-up activities are completed. Your facility will not be allowed to order more TVFC vaccine while you are under suspension status.</p>	
<p>As a TVFC Program provider, your organization is responsible for ensuring that you maintain compliance with all TVFC Program policies. Please work with your TVFC Program Responsible Entity (RE) to complete all follow-up activities and get your facility back in compliance with the TVFC Program, as outlined in the 2023 TVFC and ASN Provider Manual.</p>	
<p>To reduce vaccine preventable diseases in Texas, it is our mission at DSHS to maintain as many TVFC Program providers as possible. It is equally important to ensure TVFC Program enrolled providers administer properly stored vaccines and adhere to all the Centers for Disease Control and Prevention (CDC) and TVFC Program guidelines and policies.</p>	
<p style="text-align: right;">For any additional questions concerning program compliance, please contact the Texas Department of State Health Services Central Office at IQIP@dshs.texas.gov.</p>	
<p>Sincerely,</p> <p><i>Crystal Mena</i></p> <p>Crystal Mena, Manager Vaccine Operations Unit – IQIP/Quality Assurance and Improvement Immunizations Program Texas Department of State Health Services 1100 W. 49th Street, Austin, Texas 78756</p>

Suspension Warning Notice

A Suspension Warning Notice is sent to providers who have follow-up action items due by the end of the month.

 TEXAS Health and Human Services	Warning Notice: Your TVFC Program Site will soon be out of <u>compliance</u>
--	---

January 2, 2024

Dear Texas Vaccines for Children (TVFC) Provider,

Clinic Name: «Provider_Name» PIN: «Provider_PIN»

Thank you for your participation in the TVFC Program and completing your site visit.

Our records indicate that your facility will have overdue follow-up activities from your recent TVFC Program Compliance or Storage & Handling site visit in the PEAR database. You have until midnight of **January 31, 2024**, to complete these items. Organizations with overdue follow-up activities are non-compliant per TVFC Program policies. Therefore, your organization will be suspended after this date until all overdue follow-up activities are completed. During this suspension, your organization will not be allowed to order TVFC vaccine.

As a TVFC Program provider, your organization is responsible for ensuring that you maintain compliance with all TVFC Program policies. **Please work with your TVFC Program Responsible Entity (RE) to complete all follow-up activities to keep your facility in compliance with the TVFC Program**, as outlined in the [2023 TVFC and ASN Provider Manual](#).

To reduce vaccine preventable diseases in Texas, it is our mission at DSHS to maintain as many TVFC Program providers as possible. It is equally important to ensure TVFC Program enrolled providers administer properly stored vaccines and adhere to all the Centers for Disease Control and Prevention (CDC) and TVFC Program guidelines and policies.

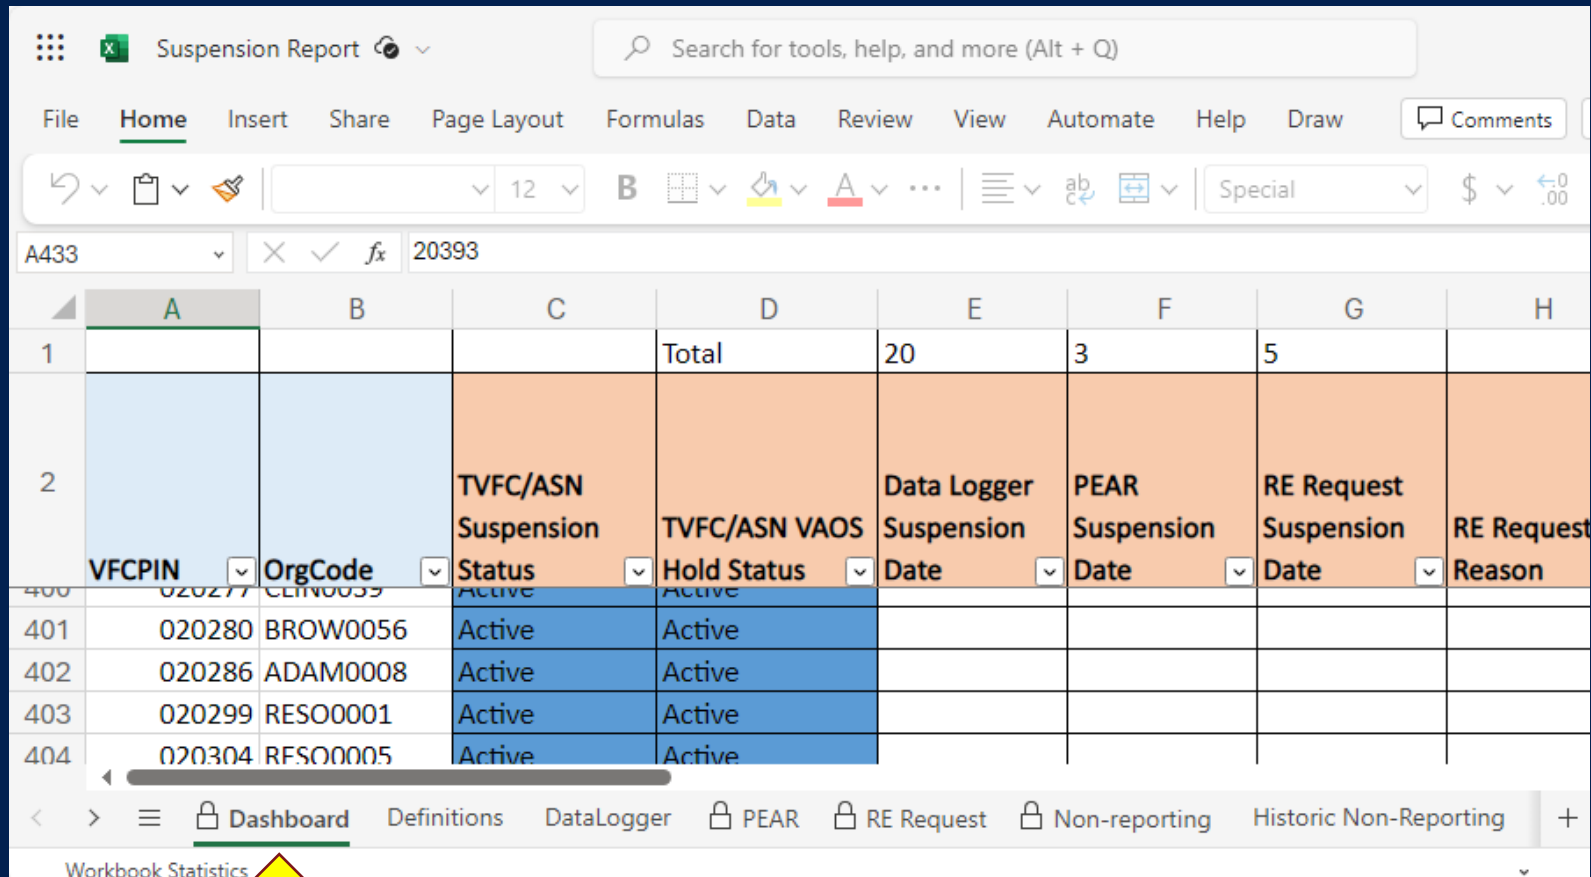

For any additional questions concerning program compliance, please contact the Texas Department of State Health Services Central Office at IQIP@dshs.texas.gov.

Sincerely,
Crystal Mena

Crystal Mena, Manager
Vaccine Operations Unit – IQIP/Quality Assurance and Improvement
Immunizations Program
Texas Department of State Health Services
1100 W. 49th Street, Austin, Texas 78756

Suspension Status Tracker

Review the Suspension Status Tracker: [Suspension Report in Sharepoint](#).

The screenshot shows a Microsoft Excel spreadsheet titled "Suspension Report". The ribbon includes tabs for File, Home, Insert, Share, Page Layout, Formulas, Data, Review, View, Automate, Help, Draw, and Comments. The formula bar shows "A433" and "20393". The spreadsheet has columns A through H. Row 1 contains summary data: Total (20), 3, and 5. Row 2 contains headers for TVFC/ASN Suspension, TVFC/ASN VAOS Hold Status, Data Logger Suspension, PEAR Suspension, RE Request Suspension, and RE Request Reason. Rows 3 through 6 contain data for various entities, all with "Active" status. The bottom of the screen shows a navigation bar with tabs: Dashboard, Definitions, DataLogger, PEAR, RE Request, Non-reporting, and Historic Non-Reporting. A yellow arrow points to the "Dashboard" tab.

Steps to Resolve PEAR Suspension (continued)

1. RE will address all overdue follow-up action items with provider.
2. Enter in completion dates for each follow-up action item (do not change dates of immediate action items).
3. Email your assigned QAI Coordinator and CC IQIP@dshs.Texas.gov to report completion of overdue follow-up action items.
4. The appropriate QAI team member will verify and unsuspend PIN as appropriate, notifying the RE and the provider.

Immunization Quality Improvement for Providers (IQIP)

Danielle Orbach, QAI Coordinator

IQIP Cycle

TEXAS
Health and Human Services

Texas Department of State
Health Services

1

Site visit

- Provider's vaccination workflow is observed, and initial coverage is reviewed
- QI strategies are selected
- Technical assistance is provided by the IQIP consultant
- Action items are chosen for strategy implementation plan

2

Two and six month check-ins

- Progress toward strategy implementation is reviewed
- Technical assistance is provided by the IQIP consultant
- Strategy implementation plan is updated

3

12-month follow-up

- Progress toward strategy implementation is reviewed
- Technical assistance is provided by the IQIP consultant
- Year-over-year coverage change is reviewed

Rev 01/24

IQIP Core Strategies

IQIP involves four core immunization strategies:

1. Facilitate return for vaccination
2. Leverage Immunization Information System (IIS) functionality to improve immunization practices
3. Strengthen vaccine communication
4. Give a strong vaccine recommendation

TEXAS
Health and Human Services

Texas Department of State
Health Services

IQIP Coverage Assessment Rates

- Coverage Assessment Rates are sent out via a monthly report.
 - Report will show patient population compared to percentage of population that is vaccinated for each respective vaccine.
 - Report will cover a years' worth of rates.
 - Report will show rates for childhood vaccines and adolescent vaccines.

TEXAS
Health and Human Services

Texas Department of State
Health Services

Coverage and Goals: Childhood

Initial Coverage	Suggested 12-Month Coverage Goal
0 percent to less than 80 percent	Increase by 10 percentage points
80 percent to less than 85 percent	Increase to 90 percent
85 percent to less than 90 percent	Increase by 5 percentage points
90 percent to less than 95 percent	Increase to 95 percent
95 percent and greater	Maintain initial percentage

Health Services

Reviewing TMF Reports

Monthly reports from TMF (DSHS Contractors):

- Temp excursions
- Out-of-range temp excursions
- Expired vaccines or within 90 days
- Overcrowding
- Borrowing
- Nonfunctional data logger
- Dorm style unit with vaccines onsite
- Thermometer probe on the unit wall (permanent)
- Missing emergency supplies

TEXAS
Health and Human Services

Texas Department of State
Health Services

TMF Site Visit Report

- TMF emails the “Site Visit Report” report on a weekly basis.
- The “Site Visit Report” shows completed and scheduled site visits.
- The report is used by regions to determine which provider PINs need their site visit reviewed and completed in PEAR system.
- The TMF Site Visit Report helps region determine future workload for REs.
- The TMF Site Visit Report is an oversight tool for timely completion of compliance visits for private providers.

TEXAS
Health and Human Services

Texas Department of State
Health Services

PEAR Compliance Visit: Action Items

- PEAR Compliance Action Items are the RE's responsibility.
- If Compliance Actions Items cannot be completed by the assigned LHD or RE, the PHR Manager will be responsible for completing or delegating the Compliance Actions Items appropriately.

TEXAS
Health and Human Services

Texas Department of State
Health Services

PEAR Compliance Visit: Action Items (Continued)

- PEAR: Reports→ Follow-up Action Details→ Filter appropriately and select “Apply Filter”
- TMF sends the “Site Visit List” weekly to PHR Managers and listed Regional IQIP Consultants.
