HL7 Data Exchange On-Boarding for Health Plans

Texas Immunization Registry

Interoperability Team : 1-800-348-9158 Option 3

ImmTracMU@dshs.Texas.gov

Introductions

- Yiuliana Rodriguez – Interface Analyst

Overview

- HL7 vs IHQ
- HL7 Onboarding Process
 - The Bidirectional Readiness Checklist
 - Bidirectional ROI
 - Testing
 - Production
- Resources

Terminology

Terminology we will use in this presentation:

- BiDX = Bidirectional data exchange
- Registry = Texas Immunization Registry
- Orgs = Providers, healthcare entities, organizations
- EHR = Electronic Health Records systems
- POC = Your Org's registered Point of Contact

HL7 vs IHQ

TEXAS
Health and Human
Services

Texas Department of State
Health Services

IHQ Process

- Plain text file sent via FTP
- Requests sent in batches quarterly or annually
- Long resource intensive processing time
- IHR returned containing immunization records
- IHQ standard no longer maintained

HL7 Process

- Message formatted using the CDC HL7 specifications
- HL7 is a set of standards for sending clinical data between software applications
- Records requested one at a time
- Requests sent monthly or quarterly
- Records returned from ImmTrac2 in real-time

Bidirectional Readiness

TEXAS
Health and Human
Services

Texas Department of State
Health Services

The Bidirectional Readiness Checklist

- The Bidirectional Readiness Checklist:
 - Contains a list of requirements to participate in BiDX
 - Can be found on Forms & Documents Webpage
 - Must be reviewed before contacting the registry
 - Requirements met prior to Registration of Intent (ROI)
 - The Bidirectional Readiness Checklist ensures that your organization is in a good position to begin BiDX

Requirements (1 of 2)

- Org's EHR must be able to meet each of the below requirements:
 - Have bidirectional messaging capabilities
 - Send messages using HL7 version 2.5.1 Release 1.5
 - HL7 is an electronic health records messaging standard
 - Be up-to-date with all relevant system upgrades
 - Testing cannot stop for a system upgrade. Removal from testing.
- Orgs must speak with EHR vendor for information

Requirements (2 of 2)

- All sites must be registered with ImmTrac2
- All sites must have up-to-date site agreements
- Parent-child relationships must be correct

Additional Preparation (1 of 2)

- BiDX testing is time-limited
- All necessary resources should be planned for in advance
- Designate a Subject Matter Expert (SME) to oversee testing
- Testing participants have been identified
 - Able to devote one week to testing
- EHR vendor has technical resources ready and available

Additional Preparation (2 of 2)

- Workflows have been analyzed and future state planned
- Monitoring and error management plan prepared
- Organization wide training plans prepared

Bidirectional ROI

TEXAS
Health and Human
Services

Texas Department of State
Health Services

What is the Registration of Intent? (1 of 2)

- Allows organizations to inform the registry of their readiness to begin bidirectional data exchange.
- Captures key information about your organization and EHR vendor.
- Identifies which bidirectional features your organization will use
- Provides your agreement to follow registry policies

What is the Registration of Intent? (2 of 2)

- The bidirectional ROI is a new registration
 - If your organization **previously** submitted a unidirectional (batch file) ROI, you will need to submit a new ROI for BiDX
- The ROI must be completed by an authorized representative of your organization's parent/stand-alone site

Completing the BiDX ROI

TEXAS
Health and Human
Services

Texas Department of State
Health Services

Completing the ROI

- The Bidirectional ROI contains six sections that must be completed:
 - Organization information
 - Primary Contact Person
 - Secondary Contact Person
 - Bidirectional Exchange Readiness
 - Query and Reporting Immunizations
 - Electronic Signature

Completing the ROI: Organization Information

- Enter the name and address of your organization's parent/stand-alone site
 - You will also need your parent TXIIS ID
 - Contact the registry for assistance identifying your parent site or TXIIS ID
- Will you report for multiple facilities?
 - If you are a stand-alone org, the answer should be *No*
 - If you have a parent/child structure the answer should be *Yes*

Completing the ROI: Primary Contact Person

- Identify and provide contact information for the individual who will take lead of your BiDX setup
- This individual must:
 - Be an employee of your organization
 - NOT an EHR vendor employee
 - Participate in all BiDX setup activity
- Should be the registered Point of Contact

Completing the ROI: Secondary Contact Person

- This individual will act as a back-up to the Primary Contact Person
- This person must:
 - be an employee of your organization
 - participate in all BiDX setup activities
 - Be prepared and capable of taking lead if needed
- Consider selecting your Primary Registry Contact

Completing the ROI: Bidirectional Exchange Readiness (1 of 3)

- This section identifies your capabilities and readiness for BiDX
 - Speak with your EHR vendor before completing this section
- Are you currently sending HL7 files to the registry?
 - If you are participating batch file data exchange, answer *Yes*
 - Otherwise, answer *No*

Completing the ROI: Bidirectional Exchange Readiness (2 of 3)

- Is your facility and EHR ready to participate in BiDX?
 - Only answer *Yes* if:
 - your organization has all necessary technical capabilities in place
 - Your EHR has all necessary updates installed
 - Can send and receive SOAP messages
 - If your answer is *No*, do not submit your ROI

Completing the ROI: Bidirectional Exchange Readiness (3 of 3)

- Which Method of BiDX will your organization use?
 - This question identifies which BiDX feature you will use
 - Query Only
 - Query and Reporting

Bidirectional Exchange Readiness: Query Only

- Real-time record requests and forecasting
- NOT able to report new or historical immunization records
- Should only be chosen by organizations that do not administer immunizations

Completing the ROI: Electronic Signature

- The ROI can be:
 - Signed electronically
 - Printed, signed, and scanned as a PDF
- The ROI should be signed by the Primary Contact Person or an individual authorized by the organization
- The signed ROI should be emailed to ImmTracMU@dshs.texas.gov

ROI Processing

- Once received by the registry, ROIs are processed within 3-4 business days.
- The registry may contact the Primary Contact Person with follow-up questions
- Once processed, the registry will provide the Primary Contact Person with next steps and timeframes.

Testing Preparation

TEXAS
Health and Human
Services

Texas Department of State
Health Services

Purpose of Testing

- BiDX Testing ensures:
 - Connection is set up correctly
 - HL7 messages are formatted correctly
 - EHR functions as expected
 - Workflow analyzed and prepared

Goal of BiDX Testing

- The goal of Bidirectional Data Exchange Testing is to:
Complete all testing scenarios without errors

Requirements

- Testing team identified:
 - Org staff and EHR support
 - Org Subject Matter Experts (SME)
 - Available for 1 week of testing
 - Who will need ImmTrac2 test access?
- EHR BiDX functionality ready

Credentials & Resources

- Webservice credentials sent to POC
 - Includes Webservices URL
- ImmTrac2 test access sent to individuals
- Resources sent to testing team
 - Test Plan
 - Test Patient List

Resources in Detail

- Test Plan
 - List of scenarios that must be tested
 - All scenarios must be successful
- Test Patient List
 - QBP Only Orgs: Full list of patients to test with

Test Scenarios

TEXAS
Health and Human
Services

Texas Department of State
Health Services

Connection Testing

- Simple test to confirm:
 - EHR can connect to the registry
 - Webservice credentials are correct

QBP Testing

- Send QBP messages for each test scenario
- Was a response received without error?
- Review the returned records in the EHR
- Compare results to the record in ImmTrac2 test

Troubleshooting

- The Data Exchange Error Guide
 - Explains all errors returned by the registry
 - Offers solutions to many errors
- Review your documentation and the scenario
- Collaborate with your EHR Vendor
- Contact the registry if your team cannot resolve the error

Completing Testing

TEXAS
Health and Human
Services

Texas Department of State
Health Services

Finishing Testing

- Plan “Go-Live Date”
 - Discuss anticipated records request volume
- Once all Test Scenarios are successful
 - Contact the registry for review
 - List of each scenario tested for each patient
- The registry will validate test results
- Your team will be notified of successful completion

Production

TEXAS
Health and Human
Services

Texas Department of State
Health Services

What is BiDX Production?

- Production is live BiDX
- Real records exchanged with the Registry
 - No more test records
- Ongoing live connection

Credentials

- Credentials sent to POC
 - Includes production webservice URL
- Testing credentials disabled
 - ImmTrac2 Test access disabled

Sending Production Files

- Confirm “Go-Live” date
- Query Request
 - Send first “batch load” record request
 - Send on-going history requests as needed
 - Response from registry sent in real time

Monitoring & Maintenance

- Develop monitoring and maintenance workflows
- Regularly monitor BiDX activity
 - Messages sent and received successfully
 - Review errors returned
- Contact the registry if assistance is needed
