## Form Instructions

This tool is based on the activities listed in the Fiscal Year 2024 DSHS Immunization Contractors Guide and should be used for desk reviews after August 1, 2023. Each activity is noted as one of the following:

- Required – activities essential to the implementation and/or operation of an Immunization Program. These activities are assigned performance metrics.
- Standard (Universal) – activities that are normal/standard to the implementation and/or operation of an Immunization Program. Performance measures are not required.
- Suggested – activities recommended but not required.

For each item reviewed, the reviewer must select Yes, No, Not Applicable (N/A) or Not Reviewed (N/R) where appropriate.

- Yes - standard met fully; reviewer can acknowledge successes and best practices in the comment section.
- No - standard met; reviewer must describe the discrepancy and note any education or technical assistance provided.
- NA - item was not applicable or not reviewed at site visit.
- NR – provide a brief explanation of why the item was not reviewed.

The local health department (LHD) must provide a written response for each item checked “No” that is not immediately corrected during the site visit and produce a Corrective Action Plan (CAP) as directed by DSHS that encompasses proposed solutions for all items marked as “No.” The CAP should be submitted within 30 days of the site or desk review.

Any additional information such as issues, concerns, challenges, successes, collaborations, etc. should also be documented in the tool. Naming convention - please save the document as LHD\_FY Year\_Contract Review Tool.
