# Renew ImmTrac2 Access

**TEXAS**  
Health and Human  
Services

Texas Department of State

# Renew Your ImmTrac2 Access

ImmTrac2 access needs to be renewed annually.

- Remember to:
  - Login to ImmTrac2 the day before leaving for summer or winter breaks.
  - Renew your access for the organizational site you are currently working at and not a previous site.

You will receive several reminders 90, 60, 30, 15, and 10 days prior to your access expiring.

# IAMOnline

Okta error message:

If users are getting an error when clicking on the “Activate Account” button in the email they received:

- Please ask your IT folks to whitelist “noreply@okta.com” on your organization infrastructure. Email server security setups that review links from [noreply@okta.com](mailto:noreply@okta.com) could be triggering the ‘Activate Account’ token within the email message, which will make it invalid when the user clicks on it.

# Nurses as Full Access Providers

# ImmTrac2 User Roles

## **View Only Non-Provider**

- View and print immunization records
- Create and print school report lists
- Manage account or reset password
- Submit registrations and renewals

## **Full Access Provider**

Same as View Only Non-Provider, but with additional ability to:

- Add and edit client information
- Add, edit, and delete immunizations

# Update to Full Access Provider

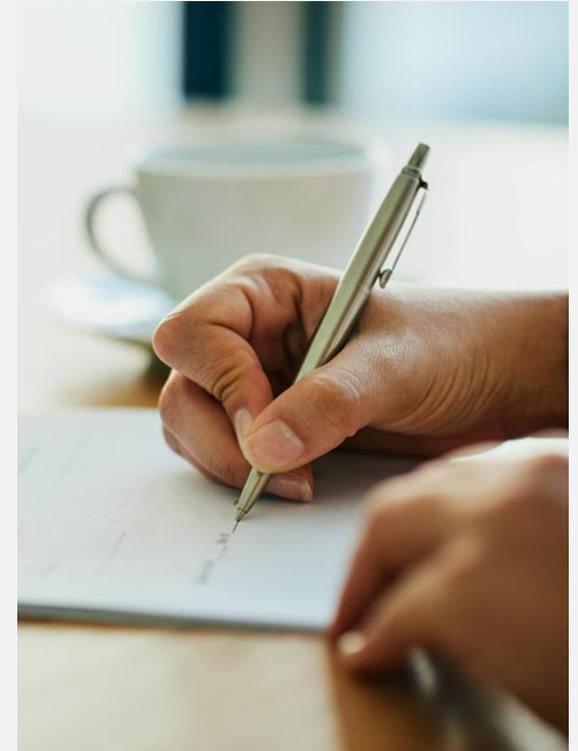

- “To update to a Full Access Provider, email your nurse’s license number to [ImmTrac2@dshs.texas.gov](mailto:ImmTrac2@dshs.texas.gov). Include ‘Attn: Review for Full Access’ in the subject line.”
- The ImmTrac2 Customer Service Support Team will confirm your license number is active and change user to Full Access Provider in ImmTrac2.

# Consents

# Disaster Consents

- Disaster consent – Disaster immunizations are sent to ImmTrac2 regardless of whether there is a consent on file for that client. Without a disaster consent, we can only retain those immunizations for 5 years after the disaster has ended.
- Once a disaster is declared over, clients and their disaster immunizations will not be visible to providers nor other ImmTrac2 users without a disaster consent on file.
- Disaster consents can be signed at any time, you don't have to be in a disaster.

# When a Minor becomes an Adult

- Once the client turns 18, they become a pending adult. As a pending adult (PA), they must sign an adult standard consent by the age of 26 to retain childhood immunizations for life.
- If the adult standard consent is not signed by the age of 26, the client's childhood records are purged from the ImmTrac2.
- In addition, when a client turns 18, their standard immunization records become inaccessible to providers until the client signs an adult standard consent.
- Have clients sign both standard and disaster consents.

# Consent Best Practices

- Minor Standard consent - Parent or legal custodian signs to keep their child's childhood immunizations in ImmTrac2.
- Adult Standard consent - Client or legal custodian signs an adult consent; ImmTrac2 stores their standard immunizations for life.
- Disaster consent - Client signs a disaster consent; ImmTrac2 stores disaster immunizations will be stored for life.
- Consents can be signed at any time.
