

Immunization Workflow Assessment – Part I

Vaccination Restart and Catch-Up

Points to consider:

1. Who reviews the patient's vaccination history and determines **due or past due** vaccines? When is this done? What source is used (IIS or EHR)?
2. Who discusses vaccines with the patient/parents? **Are they trained on both the ACIP routine and catch-up schedules?**
3. Which staff can play a part in making or reinforcing a strong vaccine recommendation?
4. When are vaccination data documented in the IIS or EHR?
5. When and by whom are the due dates for future vaccination discussed?
6. When and by whom is the next immunization appointment made?
7. Are there systems in place for patient reminders **or recall for vaccines that are past due?**

All staff can engage in activities throughout the clinic workflow to support catch-up vaccination and recall.
