

Subject Line: TVFC/ASN Program Update – Td Vaccine in Limited Supply

Texas Vaccines for Children (TVFC) and Adult Safety Net (ASN) Program Providers,

The Centers for Disease Control and Prevention (CDC) announced that the Td (Tetanus, Diphtheria) vaccine is currently in limited supply due to an interruption in the distribution of TDVAX that occurred between December 2022 and early March 2023. The following Td vaccines are currently being monitored and limited for ordering:

Vaccine Name	NDC	Target Age	Vaccine Program
TDVAX SDV 1 Pack; Ped	13533-0131-01	PED	TVFC
Tenivac SDV 1 Pack; Ped	49281-0215-10	PED	TVFC
Tenivac PFS 1 Pack; Ped	49281-0215-15	PED	TVFC
TDVAX SDV 1 Pack; Adu	13533-0131-01	ADU	ASN
Tenivac SDV 1 Pack; Adu	49281-0215-10	ADU	ASN
Tenivac PFS 1 Pack; Adu	49281-0215-15	ADU	ASN

The Tdap (Tetanus, Diphtheria, Pertussis) vaccine remains available.

The CDC recommends that providers transition to the use of the Tdap vaccine in lieu of the Td vaccine whenever possible. For more information about the limited supply, the CDC has published [temporary guidance on Tdap use while Td supplies are limited](#).

The Texas Department of State Health Services (DSHS) Immunization Program will continue to monitor Td vaccine orders and communicate any updates or changes.

If you have any questions, contact your TVFC/ASN Program Responsible Entity (RE).

Thank you for your continued support and participation in the TVFC/ASN Program(s).
