

Texas Vaccines for Children (TVFC) program providers,

Hiberix, a GlaxoSmithKline (GSK) Haemophilus influenzae type b (Hib) vaccine, is changing its presentation from a vial and vial presentation to a vial and pre-filled syringe (PFS) presentation. Providers will be able to order the Hiberix PFS presentation in the Vaccine Allocation and Ordering System (VAOS) starting March 1, 2024.

The new national drug code (NDC) information for Hiberix is:

Manufacturer	NDC	Brand	Description
GSK	58160-0726-15	Hiberix PFS	10 pack – single-dose vial

Additional information:

- TVFC providers are no longer able to order the previous Hiberix single-dose vial (SDV) presentation in VAOS.
- This is not a change in the authorization of Hiberix.
- The SDV presentation of Hiberix is still authorized.
- Providers should continue using their current supply until it is depleted or expired.

For questions regarding orders for Hiberix, email TXVaccineOrders@dshs.texas.gov.

Thank you for your continued partnership.
