## Health Resources and Services Administration (HRSA) Description:

Referral for Health Care and Support Services (RHCS) directs a client to needed core medical or support services in person or through telephone, written, or other type of communication. Activities provided under this service category may include referrals to assist HRSA Ryan White HIV/AIDS Program (RWHAP) eligible clients to obtain access to public or private programs for which they may be eligible.

## Program Guidance:

Agencies should report referrals for health care and support services provided by Outpatient/Ambulatory Health Services professionals under the Outpatient/Ambulatory Health Services (OAHS) category.

Agencies should report referrals for health care and support services provided during a Medical Case Management (MCM) or Non-Medical Case Management (NMCM) visit in the appropriate case management service category (i.e., MCM or NMCM). Agencies can report referral services an MCM or NMCM-enrolled client receives under RHCS only if someone other than the client’s case manager provided services outside a case management visit. Agencies should take steps to ensure they do not report services in duplicate across different service categories.

Recipients can use RWHAP Part B and State Services (RW and SS) funds to provide

transitional social services to establish or reestablish linkages to the community. Referral services that link a soon-to-be-released incarcerated person with primary care are an example of appropriate transitional social services. Transitional social services may not exceed 180 days, per DSHS Policy 591.00 Limitations on Ryan White and State Service Funds for Incarcerated Persons in Community Facilities, Section 5.3.

## **Limitations:**

Recipients cannot use RHCS funds to duplicate services provided through other service categories.

## **Services:**

Referrals for Core Medical and Support Services provide clients with assistance in accessing medical and support services to improve engagement in the health care system and the HIV continuum of care. Referral for Health Care and Support Services includes application assistance, benefits and entitlement counseling, and referral to medical and support services.

RHCS providers may assist RWHAP-eligible clients with obtaining needed HIV Care Services medical or support services, and services available through the [Texas HIV Medication Program \(THMP\)](#) including:

- AIDS Drug Assistance Program (ADAP)
- State Pharmaceutical Assistance Program (SPAP)
- Texas Insurance Assistance Program (TIAP and TIAP-PLUS)

Benefits counseling services facilitate a client's access to public or private health and disability benefits and programs. This service category works to maximize public funding by assisting clients in identifying available health and disability benefits supported by funding streams other than RW and SS funds. Agencies educate clients about and assist with accessing and securing available public and private benefits and entitlement programs.

Referrals may include benefits counseling and application assistance programs for Marketplace plans, health insurance, Medicaid, Medicare, and medication payment plans or programs. These services focus on assisting a client's entry into and movement through the care service delivery network such that RW and SS funds are the payer of last resort.

## **Universal Standards:**

Service providers for Referral for Healthcare and Support Services follow [HRSA and DSHS Universal Standards](#) 1-63 and 195-196.
