## ITDX Data Dictionary Element Details

The pages below are descriptions of each data element in the ITDX data dictionary.

### Null Values

The following values may be used within the ITDX data standard.

The acceptable null values are:

- 1      Not Applicable (NA)
- 2      Unknown/Not Documented (UNK/NOT)

#### [Additional Information](#)

- Each ITDX data element includes an “*accepts null values*” indication.
  - Yes = accepting null values for this data element
  - No = not accepting null values for this data element
- Not Applicable (NA): This null value code is appropriate if the data element was “Not Applicable” to the patient during the time of prehospital or hospitalization. For example, prehospital data elements would be “Not Applicable” if a patient arrives at the hospital via private vehicle.
- Unknown/Not Documented (UNK/NOT) This null value applies if the information for the data element is not known or knowable by the patient or family or if the data is not recorded in patient documentation by any health care provider. This value documents that information was attempted to be found but was unsuccessful. An example would be “Unknown/Not Documented” if the patient was discovered and no one knew the injury time. Another example would be if an EMS run sheet was not available, the scene vitals signs would be “Unknown/Not Documented.”

# ITDX Data Element Details – Demographics

## Patient's Home ZIP / Postal Code

### Overview

The patient's home ZIP/Postal code of primary residence.

<b>Field Values</b>	1. Patient Chemically Sedated or Paralyzed
	2. Obstruction to the Patient's Eye
	3. Patient Intubated
	4. Valid GCS: Patient Not Sedated, Not Intubated, and Did Not Have Obstruction to Eye

## Initial ED / Hospital GCS 40 - Eye

### Overview

First recorded Glasgow Coma Score 40 (Eye) in the ED/hospital within 30 minutes or less of ED/hospital arrival.

---

NTDS Core	
Tag Name	Gcs40Eye
Data Type	Integer
Tag Group	ItdxRecord
Tag Usage	Mandatory
Accepts Null Values	Yes

## Initial ED / Hospital Height

### Overview

First recorded height after ED/hospital arrival.

NTDS Core	
Tag Name	Height
Data Type	Decimal
Tag Group	ItidxRecord
Tag Usage	Mandatory
Accepts Null Values	Yes

## Initial ED / Hospital Weight

### Overview

First recorded, measured or estimated baseline weight upon ED/Hospital arrival.

---

NTDS Core	
<b>Extension Rationale</b>	To allow patient's weight to be collected regardless of the time it was collected.
<b>Tag Name</b>	Weight
<b>Data Type</b>	Decimal
<b>Tag Group</b>	ItdxRecord
<b>Tag Usage</b>	Mandatory
<b>Accepts Null Values</b>	Yes

## Alcohol Screen

### Overview

A blood alcohol concentration (BAC) test was performed on the patient within 24 hours after first hospital encounter.

---

NTDS Core	
<b>Tag Name</b>	AlcoholScreen
<b>Data Type</b>	Integer
<b>Tag Group</b>	ItdxRecord
<b>Tag Usage</b>	Mandatory
<b>Accepts Null Values</b>	Yes

---

Field Values	1. Yes
	2. No

## Alcohol Screen Results

## Trauma Team Involvement

### Overview

Indicates if the trauma team was activated at any level including a trauma consult. The goal is to identify if a member of the trauma team was involved in the care of the patient in any capacity.

---

ITDX Extension	
Extension Rationale	This is a helper field which could be used in determining inclusion criteria for the patient record.
Tag Name	TraumaTeamInvolvement
Data Type	Integer
Tag Group	ItidxRecord
Tag Usage	Mandatory
Accepts Null Values	Yes

---

Field Values	1. Yes
	2. No

## Signs of Life

### Overview

Indication of whether patient arrived at ED/Hospital with signs of life.

---

ITDX Extension	
Extension Rationale	For data consistency and continuity of data collect, signs of life data element will be retained despite being retired from the NTDS data dictionary.
Tag Name	DeathInED
Data Type	Integer
Tag Group	ItidxRecord
Tag Usage	Mandatory
Accepts Null Values	Yes

---

Field Values	1. Arrived with NO Signs of Life 2. Arrived with Signs of Life

NTDS Core	
Tag Name	EDDischargeOrdersWrittenTime
Data Type	Time
Tag Group	ItidxRecord
Tag Usage	Mandatory
Accepts Null Values	Yes

---

## ED Discharge Physical Date

### Overview

The date the patient was physically discharged from the ED.

---

ITDX Extension	
Extension Rationale	Allows collection of both physical/actual ED discharge date to support computation of the actual length of stay (LOS) for continuity and analytic purposes.
Tag Name	EDDischargePhysicalDate
Data Type	Date
Tag Group	ItidxRecord
Tag Usage	Mandatory
Accepts Null Values	Yes

---

## ED Discharge Physical Time

### **Information**

## Last Modified Date Time

### Overview

The date/time that the ITDX source record was last modified in its Trauma Registry.

---

ITDX Extension	
Extension Rationale	Tracking field to allow for centralized deduplication of submitted records.
Tag Name	LastModifiedDateTime
Data Type	Datetime
Tag Group	ItidxRecord
Tag Usage	Mandatory

## Record Linkage Type

### Overview

The type of record referenced in the linked record; for example, Prehospital.

---

ITDX Extension	
<b>Extension Rationale</b>	Allows for the association of multiple standardized record linkages to a trauma patient record (such as EMS ePCR linkage, hospital interfacility transfer linkage, EMR linkage, Rehab linkage).
<b>Tag Name</b>	LinkageType
<b>Data Type</b>	Integer
<b>Tag Group</b>	RecordLinkages (up to 20 times)

## Record Linkage State Identifier

### Overview

NEMSIS v3 State ID for EMS linkage. NEMSIS v3.5 Agency Number for EMS linkage upon State adoption.

---

ITDX Extension	
<b>Extension Rationale</b>	Allows for system-wide ID assignments/schemes to be correlated to individual trauma records to support linkages of many types with other state/system registries.
<b>Tag Name</b>	LinkageStateId
<b>Data Type</b>	String
<b>Tag Group</b>	RecordLinkages (up to 20 times)

## Record Linkage Facility Identifier

### Overview

NEMSIS v3 Agency Number for EMS linkage. NEMSIS v3.5 Agency Number for EMS linkage upon State adoption. The universally unique identifier (UUID) of the patient care report (PCR) of each emergency service (EMS) unit treating the patient from the time of injury to arrival at your ED/hospital. Must be represented in canonical form, matching the following regular expression: [a-fA-F0-9]{8}-[a-fA-F0-9]{4}-[1-5][a-fA-F0-9]{3}-[89abAB][a-fA-F0-9]{3}-[a-fA-F0-9]{12}

ITDX Extension	
<b>Extension Rationale</b>	Identification of the organization ID providing a data source linked to the trauma registry record (e.g. an EMS agency ID or hospital ID number). To support industry-wide immutable globally unique identifiers (GUIDs) initiatives to help support unambiguous data linkage to other centralized registries from submitted trauma registry records.
<b>Tag Name</b>	LinkageFacilityId

## **ITDX Explicit Negatives**

## Explicit Negatives - Element Type

### Overview

The element type for which this explicit negative is being defined (e.g. complication, comorbidity).

---

ITDX Extension	
<b>Extension Rationale</b>	Allows for the unlimited future expansion of the explicit negative innovation for items such as complications, comorbidities, etc. This allows the continued collection of positive only selections to streamline registrar data entry and provide critical continuity for analytics and reporting. This is achieved by allowing a separate explicit negatives list to capture only the rare events of unknown and not applicable selections. This data is stored separately from the affirmative responses. Collecting the information this way avoids having to enter “no” values for items such as comorbidities and complications on every record. The Element Type provides the name of the data point to which the explicit negative fields are associated, such as comorbidity or complications.
<b>Tag Name</b>	ElementKey
<b>Data Type</b>	Integer
<b>Tag Group</b>	ExplicitNegatives (up to 54 times)
<b>Tag Usage</b>	Mandatory
<b>Accepts Null Values</b>	Yes

---

<b>Field Values</b>	1. Hospital Events
	2. Pre-existing Conditions

## Explicit Negatives – Menu Value

### Overview

The menu value for the element defined in the ElementKey.

---

ITDX Extension	
<b>Extension Rationale</b>	Elements with multiple values, such as comorbidity and complications, need a distinct menu value to which to associate the explicit negative value. These correspond to the menu value in the specific field. E.g. hospital events are based on the values in the hospital events list.
<b>Tag Name</b>	ValueKey
<b>Data Type</b>	Integer
<b>Tag Group</b>	ExplicitNegatives (up to 54 times)

## **ITDX Explicit Timeliness**

## Explicit Timeliness - Element Type

### Overview

The element type for which this explicit timeliness information is being defined (for example, height and weight).

ITDX Extension	
<b>Extension Rationale</b>	Allows for unlimited ability to associate timeliness and/or specific times to an underlying data point. This allows the underlying data point to be captured irrespective of timeliness, so local and centralized registries can consistently have access to the data regardless of any national rules requiring limited reporting. Allows for continued collection of patients' height/weight regardless of the timeliness and therefore supports analytics and computation of measures such as BMI for all patients in hospital and state registries. The Element Type provides the data point or element group to which the explicit timeliness values are associated, such as height, weight, or initial hospital vitals.
<b>Tag Name</b>	TimelinessKey
<b>Data Type</b>	Integer
<b>Tag Group</b>	ExplicitTimeliness (up to 30 times)
<b>Tag Usage</b>	Mandatory
<b>Accepts Null Values</b>	Yes

<b>Field Values</b>	1. Height
	2. Weight
	3. Initial Prehospital Vitals
	4. Initial ED Vitals

## Explicit Timeliness - Date

### Overview

The date the timeliness element was recorded.

---

ITDX Extension	
Extension Rationale	This is the explicit date associated with the element type data point or group.
Tag Name	EtDate
Data Type	Date
Tag Group	ExplicitTimeliness (up to 30 times)
Tag Usage	Mandatory
Accepts Null Values	Yes

---

## Explicit Timeliness - Time

### Overview

The time the timeliness element was recorded.

---

ITDX Extension	
<b>Extension Rationale</b>	This is the explicit time associated with the element type data point or group.
<b>Tag Name</b>	EtTime
<b>Data Type</b>	Time
<b>Tag Group</b>	ExplicitTimeliness (up to 30 times)
<b>Tag Usage</b>	Mandatory
<b>Accepts Null Values</b>	Yes

---

## Explicit Timeliness

### Overview

The explicit negative value for the selected timeliness element, usually one of: Yes, No, N/A or Unknown.

---

ITDX Extension	
<b>Extension Rationale</b>	This is the explicit timeliness grade (Yes/No) associated to the element type data point or group. Fields which have a corresponding explicit timeliness field are considered timely unless this field is explicitly answered as "No".
<b>Tag Name</b>	EtTimely
<b>Data Type</b>	Integer
<b>Tag Group</b>	ExplicitTimeliness (up to 30 times)
<b>Tag Usage</b>	Mandatory
<b>Accepts Null Values</b>	Yes

---

Field Values	2. No
--------------	-------

## Appendix A – Registry Best Practices

### Explicit Timeliness

The ITDX data standard does not require the use of the explicit timeliness fields; rather, they are designed to allow flexibility around data collection. Vital signs and other questions for which the timeliness questions apply should be considered timely unless the dates/times indicate that the information was not timely or the explicit timeliness fields are answered as “No”. For example, if the height and/or weight is provided without any explicit timeliness designation, the value is to be considered timely.

### Explicit Negatives

The ITDX data standard does not require the use of the explicit negative fields; rather, they are designed to allow flexibility around data collection. If Comorbidities and Hospital Events are not explicitly selected or answered with an explicit negative of “No” the assumption is that the comorbidity or hospital event did not occur and therefore a “No” will be transmitted. Explicit Negatives can also be used to indicate “Unknown” or “Not Applicable” for any Comorbidity or Hospital Event if needed and when required.
