State Health Analytics and Reports Platform (SHARP) Report Quick Guide

Key: Reports for all users | Reports for EMS users | Reports for Hospital users

Please note: Regional Advisory Council (RAC) users can run all reports except the EMS Patient Care and Trauma Care (patient-level) summaries.

Report Name	Available To	Description	Use Case
Entity No Reportable Data	**All EMSTR users**	Provides a dashboard of months with "no reportable data" (NRD) attestations for a facility / agency.	I want to check a facility/ agency successfully submitted NRD reports and for which months.
Entity Reference Codes Reports	**All EMSTR users**	Lists all facilities/ agencies, their DSHS IDs, and other basic information for putting into Patient Care Reports (PCR)/ data logs/ records.	I want to search for a facility / agency to find its DSHS Identification number (ID) number, address, and zip code.
EMS Records Submitted by PSAP Report	**EMS users**	Provides total record counts submitted on the Public Safety Answering Points (PSAP) call time relative to dispatch date.	I want to review how many successful submissions an EMS provider or agency made for each month.
Hospital Admission Report	**Hospital users**	Provides total record counts with line details for DSHS ID, entity name, and groups batch submissions by month of the patient's hospital admission.	I want to check if there are any gaps or missing data in a facility's submissions.
EMS Records Submission Report	**EMS users**	Provides total submitted record counts for an EMS agency by submission date and user.	I want to check the date of a facility's / agency's last submission. I want a list of a facility's / agency's recent submissions and their submission date.
Hospital Records Submission Report	**Hospital users**	Provides total submitted record counts for a hospital facility by submission date and user.	I want to check who completed submissions for a facility / agency.

Report Name	Available To	Description	Use Case
EMS Data Validity Report	**EMS users**	Compiles aggregate data (listed by county) monthly, quarterly, and yearly by individual element and element group and valid responses.	I want to sort and analyze patients record completion by certain variables and our performance.
Hospital Data Validity Report	**Hospital users**	Includes record counts, percentage of valid, valid null, and invalid records for specific element groups.	
EMS Patient Care Report	**EMS Users**	Provides a line listing of all patient cases submitted for a specific facility / agency during a specified timeframe.	I want to check all patients from a facility / agency have records in EMSTR. I want to know the total number of patients at a facility during a specified timeframe.
Trauma Care Report	**Hospital users**	Provides a listing of all patients admitted to a facility for a given year and their primary injury, among other characteristics.	I want to look up the record, or confirm receipt, of a specific patient.
EMS Custom Report	**EMS Users**	Provides a comparison of an agency's request time against statewide averages, with filters including incident type and day of the week.	I want to understand how an agency's response time compares to statewide averages.
Trauma Aggregate Data Report	**Hospital users**	Provides insight into aggregate case counts by entity ID for facilities or regions with the option to include different variables. Listed by county.	I want to sort and analyze patients records by certain variables.
