

Entering Texas Wristband Information in the Emergency Medical Services and Trauma Registries (EMSTR) using ImageTrend

Background for EMS Providers

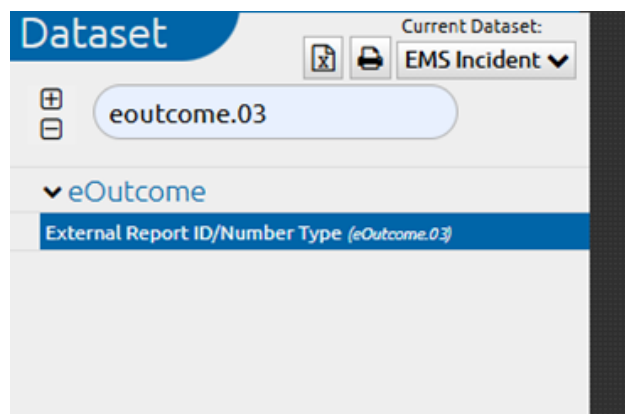

The Texas Wristband is a band, applied by EMS to a patient, providing a unique alpha-numeric value. It can be used to improve tracking of EMS patients throughout the continuum of definitive care, during a disaster, and for field-triage during mass-casualty incidents. EMSTR uses the National EMS Information System (NEMSIS) eOutcome.03 (External ID/Type) and eOutcome.04 (External ID Number) fields to uniformly document wristband information from providers across the U.S.

Wristband Entry Instructions

Please Note: These instructions only specify the process for Texas EMS Providers using ImageTrend products for State Submissions

1. This process is best setup by the **agency's data manager**

2. Navigate to the Dataset Manager and search for eOutcome.03.

Entering the Texas Wristband using ImageTrend

3. **Ensure** the check-mark next to option 7 is **marked 'Active'**.

Entering the Texas Wristband using ImageTrend

5. **Add** the ID/Type to your Numbers-Grid. **Search eOutcome.03** on the right-hand side of your screen and ensure it has been **activated** at the bottom of the page.

The screenshot shows a 'Dataset' window with a search bar containing 'eoutcome.03'. Below the search bar, there is a section titled 'Fields' with a dropdown arrow. Under 'Fields', the text 'External Report ID/Number Type (eOutcome.03)' is visible.The screenshot shows a 'Form Field Properties' dialog box. The title bar reads 'Form Field Properties External Report ID/Number Type - eOutcome.03'. Inside, there is a 'Name:' field with the value 'ID Type'. To the right, the 'Status:' is set to 'Active' with a checked checkbox, and 'Read-only' is unchecked.

6. **Upon creating a new incident**, the ID Type and Texas Wristband subcategory will be available.

The screenshot shows a 'Patient ID Numbers' dialog box. At the top left is a '+ Add' button. Below it is a large text area with a close button (X) in the top right corner. Inside this area, there is a label 'ID Type:' followed by a dropdown menu showing 'Texas Wristband' with a close button (X) on the left and a dropdown arrow and a list icon on the right. Below this is a label 'Medical Record Number:' followed by a text input field containing '123456789'. At the bottom center is an 'OK' button with a checkmark icon.

Entering the Texas Wristband using ImageTrend

Please Note:

- If you are treating **multiple patients**, please record a unique patient wristband for each patient care record. The patient should maintain the same wristband if they are transferred between facilities.
- **If a patient wristband is not available, do not delay patient transport OR patient care record transmission to the receiving facility. You can resubmit the record to EMSTR with the wristband number added at a later date. This will overwrite any existing record.**
- The entire wristband/syntax should be input (i.e. TX**PH**123456).

Please contact injury.web@dshs.texas.gov if you experience any technical issues with your EMSTR account or the state submission process.
