

Entering Texas Wristband Information in the Emergency Medical Services and Trauma Registries (EMSTR) using Sansio

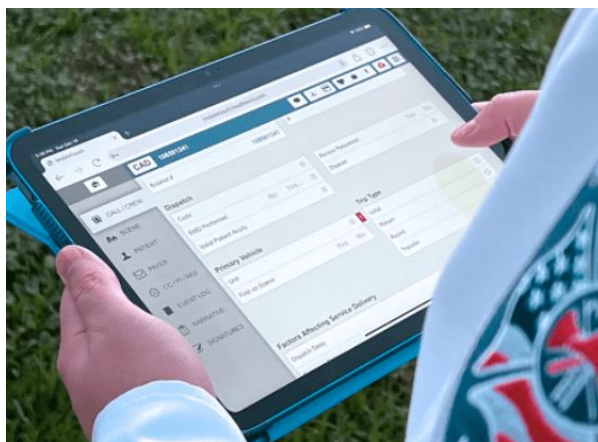

Background for EMS Providers

The Texas Wristband is a band, applied by EMS to a patient, providing a unique alpha-numeric value. It can be used to improve tracking of EMS patients throughout the continuum of definitive care, during a disaster, and for field-triage during mass-casualty incidents. EMSTR uses the National EMS Information System (NEMSIS) eOutcome.03 (External ID/Type) and eOutcome.04 (External ID Number) fields to uniformly document wristband information from providers across the U.S.

Wristband Entry Instructions

Please Note: These instructions only specify the process for entry of the Texas Wristband using Sansio Products for state submissions.

1. Navigate to the **Call/Crew tab** after creating a new record.

Entering the Texas Wristband in EMSTR using Sansio

3. **Locate** 'External Report Type' Then **select** 'Add' from the Menu

Other Responding Agencies

+ ADD

No agencies added

External Report Type

REPORT TYPE	ID/NUMBER	OTHER REGISTRY TYPE	+ ADD
-------------	-----------	---------------------	------------------

4. **Input** the report type as '**Other**' and the ID/Number with your Patient Wristband serial number.

External Report Type

REPORT TYPE	ID/NUMBER	OTHER REGISTRY TYPE	+ ADD
<u>Other</u>	≡ <u>TXPH123456</u>	Blood	≡ ✕

Please Note: The information on your page will need to be saved if you plan to complete the rest of the record at a later date/time.

Entering the Texas Wristband in EMSTR using Sansio

Please Note:

- If you are treating **multiple patients**, please record a unique patient wristband for each patient care record. The patient should maintain the same wristband if they are transferred between facilities.
- **If a patient wristband is not available, do not delay patient transport OR patient care record transmission to the receiving facility. You can resubmit the record to EMSTR with the wristband number added at a later date. This will overwrite any existing record.**

Please contact injury.web@dshs.texas.gov if you experience any technical issues with your EMSTR account or the submission process.
