Assurance

How to Apply

The only way to apply for Newborn Screening (NBS) jobs with DSHS is to go through the Health and Human Services job portal: <https://jobshrportal.hhsc.state.tx.us/ENG/careerportal/>

Create a profile or log into a profile you previously created. Once a profile is created, your information will remain in the system. Adjust and adapt your application for each job you apply to.

Keywords to Search for when Looking for Available Jobs

• Newborn • Screening • Infants • Children • Diagnoses • Laboratory • NBS •

Narrow Your Search By Selecting an Agency

Dept of State Health Services

Tips for Success

You must complete an application for each position you are interested in. Describe how you meet the requirements. Review your application to make sure your preferences (shift, location, hours, and days you can work) match the requirement for the job you are applying to. Sign and submit your application.

Examples of Entry Level Jobs in Newborn Screening

- **Data Entry Operator**
 - Enters patient, specimen, and test information into the laboratory computer system.
 - Verifies patient/specimen demographics and information.
 - Run end-of-day reports, run newborn screen queries, pick up newborn screen submission forms, and respond to emails from lab personnel in a timely manner.
- **Laboratory Technician**
 - Receives and processes specimens and samples received at the laboratory.
 - Enter test requests, search for patient demographic information, and track information for cataloging and auditing purposes.
 - Completes and documents all required quality control steps.
- **Public Health and Prevention Specialist**
 - Follow-up on infants and children with one or more of the disorders identified by the newborn screen to coordinate re-testing, evaluation, and treatment.
 - Educate others on relevant literature, guidelines, protocols, and other information about the program and the screened disorders.
- **Preferred skills:** Knowledge of, and ability to work with confidential medical records/files/information. Skill to perform tasks with a high degree of accuracy and pay close attention to detail. Ability to handle specimens and samples quickly, accurately, and safely. Ability to follow standard operating procedures and protocols accurately.
