(1) an applicant for, or holder of:

(A) a radioactive material license issued in accordance with §289.252 of this title (relating to Licensing of Radioactive Material), or §289.259 of this title (relating to Licensing of Naturally Occurring Radioactive Material (NORM)); or

(B) a general license acknowledgment issued in accordance with §289.251 of this title (relating to Exemptions, General Licenses, and General License Acknowledgments); or

(C) a certificate of registration for radiation machines and/or services, or sources of laser radiation, issued in accordance with §289.226 of this title (relating to Registration of Radiation Machine Use and Services), §289.230 of this title (relating to Certification of Mammography Systems and Mammography Machines Used for Interventional Breast Radiography), a certificate of registration for dental radiation machines in accordance with §289.232 of this title (relating to Radiation Control Regulations for Dental Radiation Machines), a certificate of registration for radiation machines used in veterinary medicine in accordance with §289.233 of this title (relating to Radiation Control Regulations for Radiation Machines Used in Veterinary Medicine), §289.234 of this title (relating to Mammography Accreditation), or §289.301 of this title (relating to Registration and Radiation Safety Requirements for Lasers and Intense-Pulsed Light Devices); or

(2) the holder of a fixed nuclear facility construction permit or operating license issued by the United States Nuclear Regulatory Commission (NRC) in accordance with Title 10, Code of Federal Regulations, Part 50; or

(3) the operator of any other fixed nuclear facility.

(c) Definitions. The following words and terms when used in this section shall have the following meaning, unless the context clearly indicates otherwise.

(1) Contiguous properties--Those locations adjacent to an existing licensed or permitted area.

(2) Decontamination services--Providing deliberate operations to reduce or remove residual radioactivity from equipment, facilities, and land owned, possessed, or controlled by other persons to a level that permits release of equipment, facilities, and land for unrestricted use and/or termination of a license.

(3) Emergency planning and implementation--The development and application of those capabilities necessary for the protection of the public and the environment from the effects of an accidental or uncontrolled release of radioactive materials, including the equipping, training and periodic retraining of response personnel.

(4) Fixed nuclear facility--The following are considered fixed nuclear facilities:

(A) any nuclear reactor(s) at a single site;

(B) any facility designed or used for the assembly or disassembly of nuclear weapons; or

(C) any other facility using special nuclear material for which the agency conducts off-site environmental surveillance and/or emergency planning and implementation to protect the public health and safety or the environment.
