

Texas Department of State Health Services Public Health Region 8

Notifiable Conditions Report: September 2025

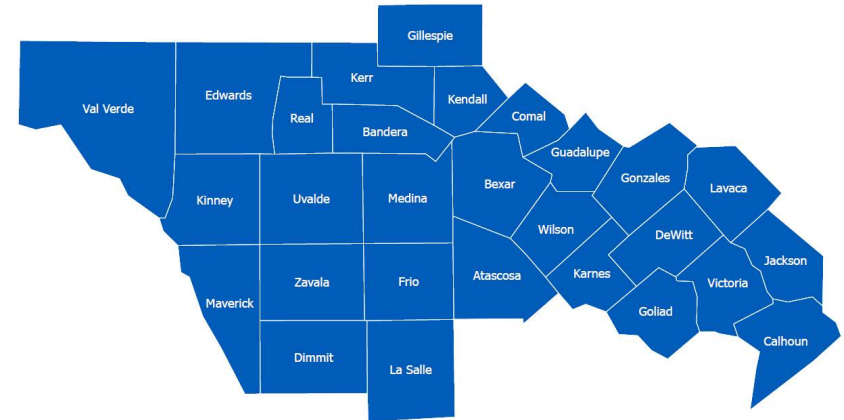

This report includes all notifiable conditions reported to the Texas Department of State Health Services (DSHS) Public Health Region 8 (PHR 8) Epidemiology and Zoonosis Control Programs that meet confirmed or probable case criteria and have an event date occurring in the report month. Event date is the first date available of: symptom onset date, lab collection date, lab result date or date of report to public health.

This report includes all counties within DSHS PHR 8, excluding Bexar County where all infectious disease investigations are conducted by the San Antonio Metropolitan Health District. The infectious diseases included in this report are received and investigated by DSHS PHR 8 Epidemiology and Zoonosis programs, the Comal County Office of Public Health, or the Victoria County Public Health Department.

Data are obtained from the National Electronic Disease Surveillance System (NEDSS). All data are subject to change pending quality assurance analysis.

A list of all Texas Notifiable Conditions is available at:
[Notifiable Conditions | Texas DSHS](#)

Please contact Region8.Epi@dshs.texas.gov with questions about this report.

Summary of Condition Types

Food and Waterborne

Food and waterborne illnesses spread when people consume contaminated food products or water. These germs can cause illness, hospitalization and death. Common symptoms are diarrhea, stomach cramps, nausea, vomiting and fever. The best way to prevent food and waterborne illnesses is to wash your hands often and clean the surfaces where you prepare food in your home. Keep raw meat, chicken, seafood and eggs separate from other foods to prevent cross-contamination and ensure your drinking water is clean and safe. To learn more about food and waterborne conditions, visit:

[Foodborne Illness | Texas DSHS](#)

[About Food Safety | Food Safety | CDC](#)

[Preventing Drinking Water-Related Illnesses | Drinking Water | CDC](#)

Invasive and Respiratory

Invasive and respiratory infections can cause serious complications such as pneumonia and sepsis. These conditions can be spread in different ways - some are caused by bacteria found in the environment and some are caused by viruses that sick people spread through droplets. To learn more about different invasive and respiratory conditions, visit:

[Pneumococcal Disease Surveillance and Trends | Pneumococcal | CDC](#)

[Legionella \(Legionnaires' Disease and Pontiac Fever\) | Legionella | CDC](#)

Vaccine Preventable

Vaccines have been developed to protect people from many diseases, including diseases that can be deadly. Vaccines can make some diseases less severe, and sometimes they completely stop people from getting sick. Children, adolescents, teens and adults need different vaccines. Talk with your doctor about which vaccines are right for you and your family. For more information on vaccines and vaccine preventable diseases, visit:

[Vaccine Preventable Diseases | Texas DSHS](#)

[Vaccines and the Diseases they Prevent | Vaccines & Immunizations | CDC](#)

Zoonoses

Zoonotic diseases are caused by germs that spread from animals to humans. Petting or touching animals, living in shared environments with animals, and getting bites from animals or insects are all ways that zoonotic diseases can spread to humans. You can protect yourself against zoonotic diseases in several ways. Always wash your hands after coming in contact with animals. Do not touch or approach wild animals, especially if they seem sick. Protect yourself from insect and animal bites when outdoors. Keep your pets and livestock healthy by vaccinating them and having regular visits with your veterinarian. For more information about zoonotic diseases, visit:

Condition Type ▲	Condition ▲	Count ▼
Food & Waterborne	Salmonellosis	5
	Cryptosporidiosis	4
	Campylobacteriosis	3
	Shigellosis	1

If no conditions are listed in the table above, no notifiable conditions were reported this month.

Jackson County Summary

Current Month Overview:

Most Common Condition this Month:

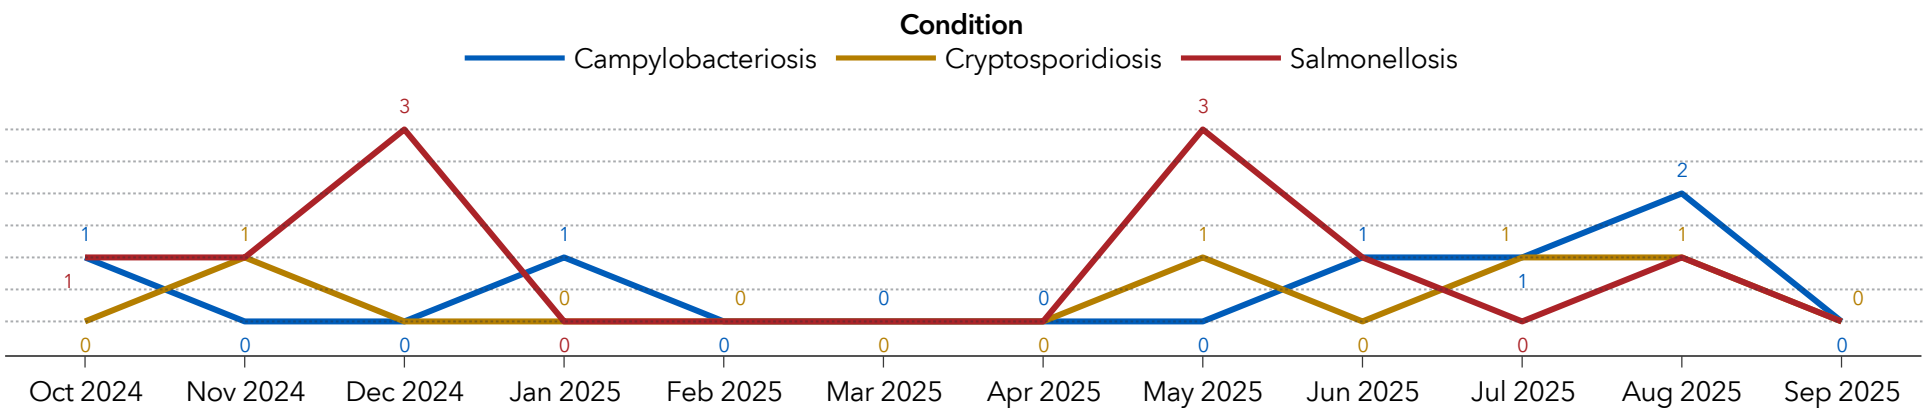

1
Cyclosporiasis

Count of Condition Types Reported this Month:

If no data are displayed in the area above, no notifiable conditions were reported this month.

Top 3 Most Common Conditions over the Past Year:

Jackson County All Conditions

All Notifiable Conditions Reported this Month:

Condition Type ▲	Condition ▲	Count ▼
Food & Waterborne	Cyclosporiasis	1

If no conditions are listed in the table above, no notifiable conditions were reported this month.

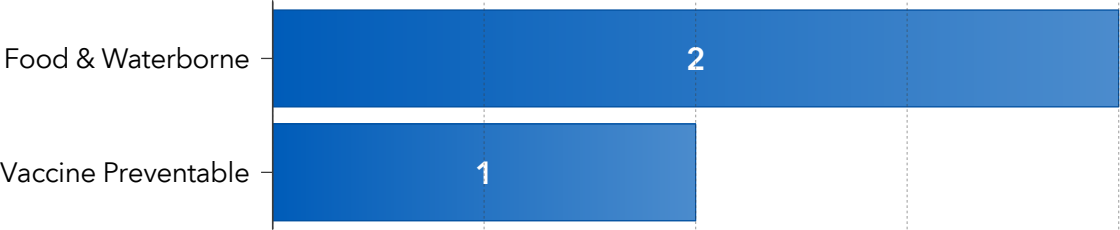

Karnes County Summary

Current Month Overview:

Most Common Condition this Month:

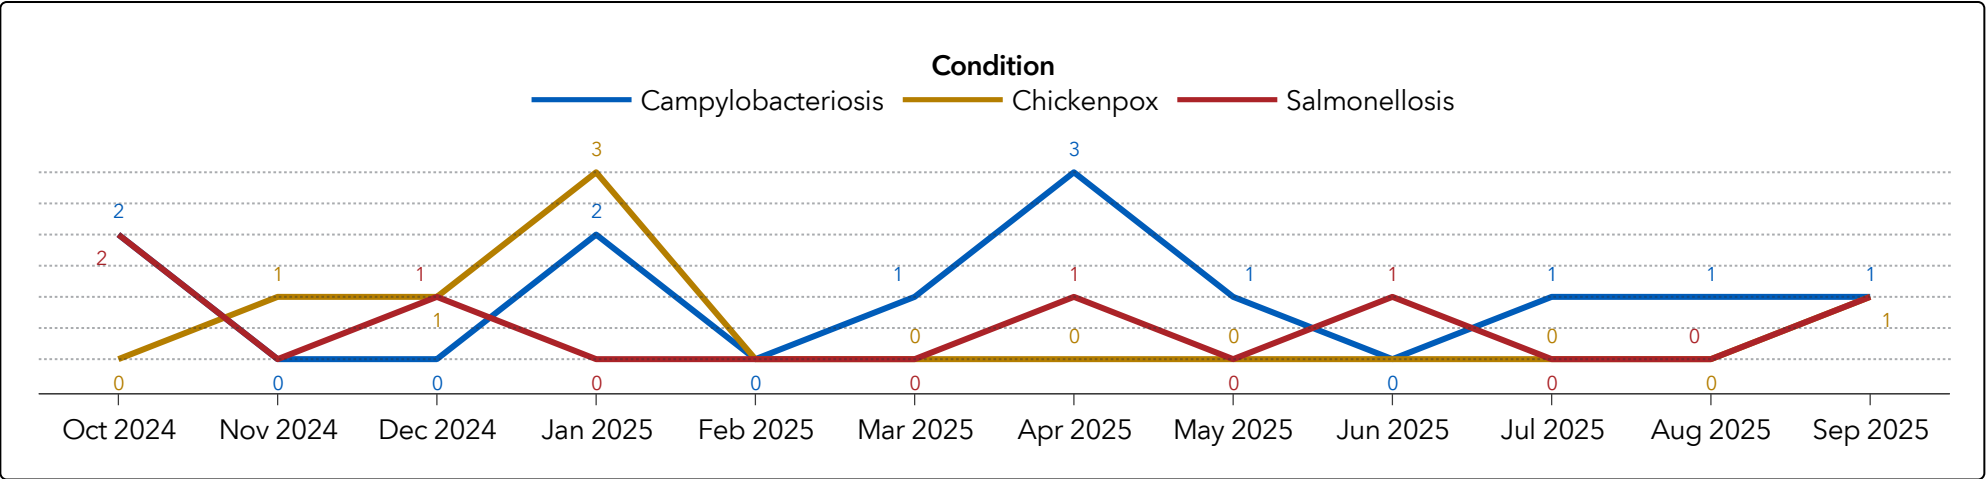

Count of Condition Types Reported this Month:

If no data are displayed in the area above, no notifiable conditions were reported this month.

Top 3 Most Common Conditions over the Past Year:

Karnes County All Conditions

All Notifiable Conditions Reported this Month:

Condition Type ▲	Condition ▲	Count ▼
Food & Waterborne	Campylobacteriosis	1
	Salmonellosis	1
Vaccine Preventable	Chickenpox	1

If no conditions are listed in the table above, no notifiable conditions were reported this month.

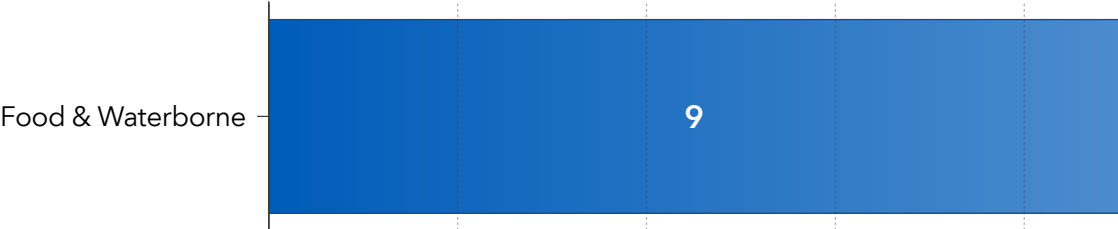

Kendall County Summary

Current Month Overview:

Most Common Condition this Month:

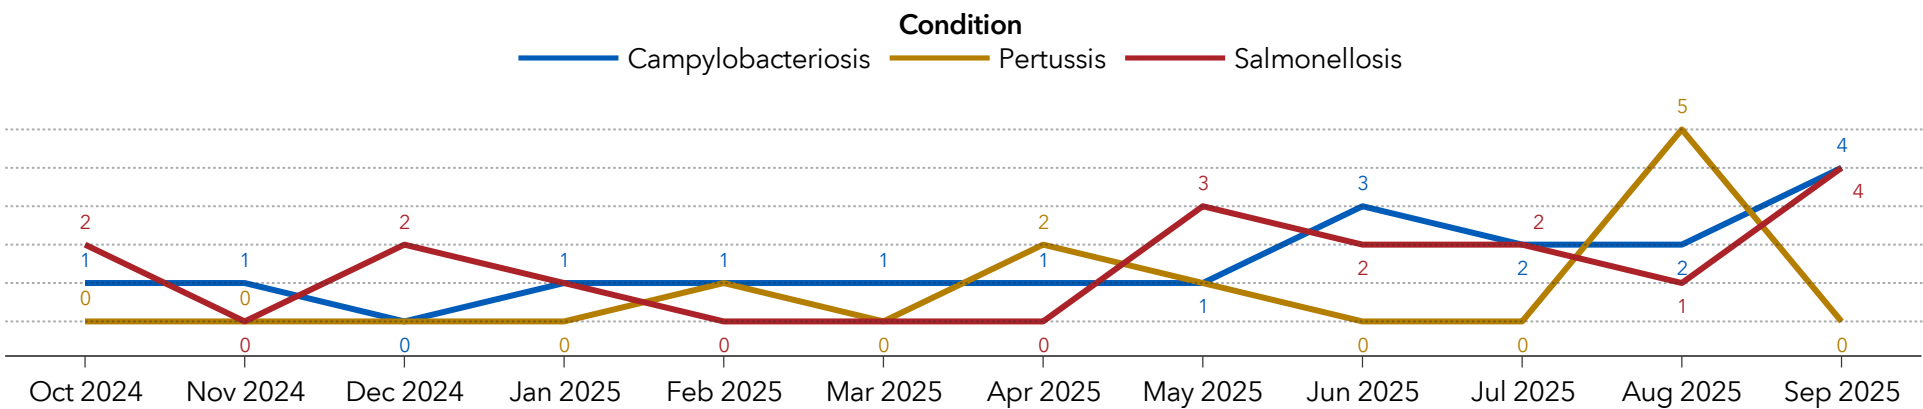

Count of Condition Types Reported this Month

If no data are displayed in the area above, no notifiable conditions were reported this month.

Top 3 Most Common Conditions over the Past Year:

Kendall County All Conditions

All Notifiable Conditions Reported this Month:

Condition Type ▲	Condition ▲	Count ▼
Food & Waterborne	Campylobacteriosis	4
	Salmonellosis	4
	Cryptosporidiosis	1

If no conditions are listed in the table above, no notifiable conditions were reported this month.

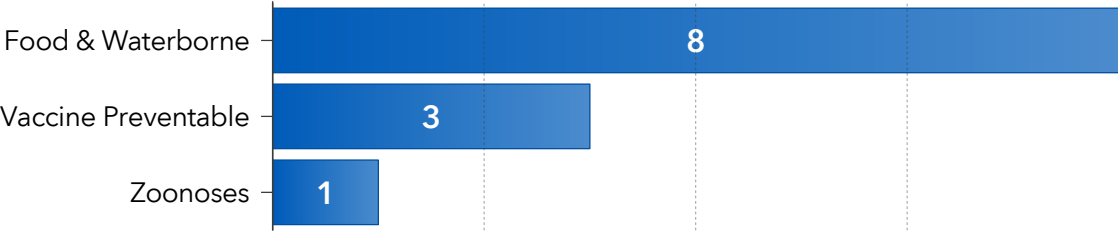

Kerr County Summary

Current Month Overview:

Most Common Condition this Month:

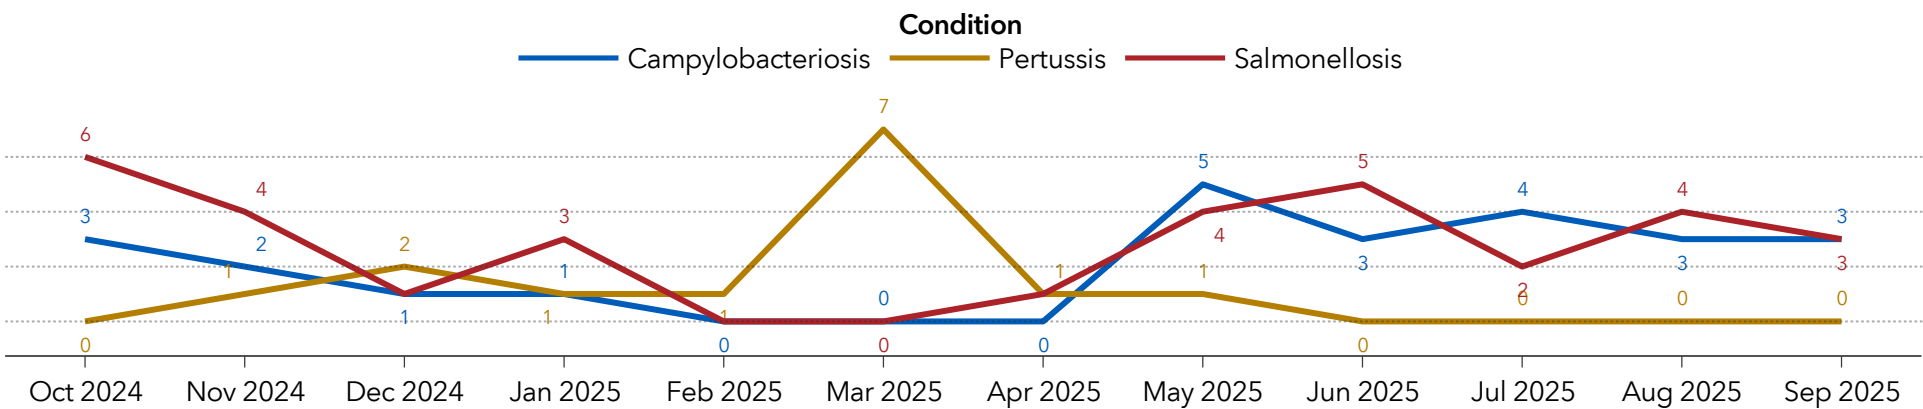

Count of Condition Types Reported this Month:

If no data are displayed in the area above, no notifiable conditions were reported this month.

Top 3 Most Common Conditions over the Past Year:

Kerr County All Conditions

All Notifiable Conditions Reported this Month:

Condition Type ▲	Condition ▲	Count ▼
Food & Waterborne	Campylobacteriosis	3
	Salmonellosis	3
	Cryptosporidiosis	1
	Yersiniosis	1
Vaccine Preventable	Chickenpox	3
Zoonoses	Rabies (animal)	1

If no conditions are listed in the table above, no notifiable conditions were reported this month.

Kinney County Summary

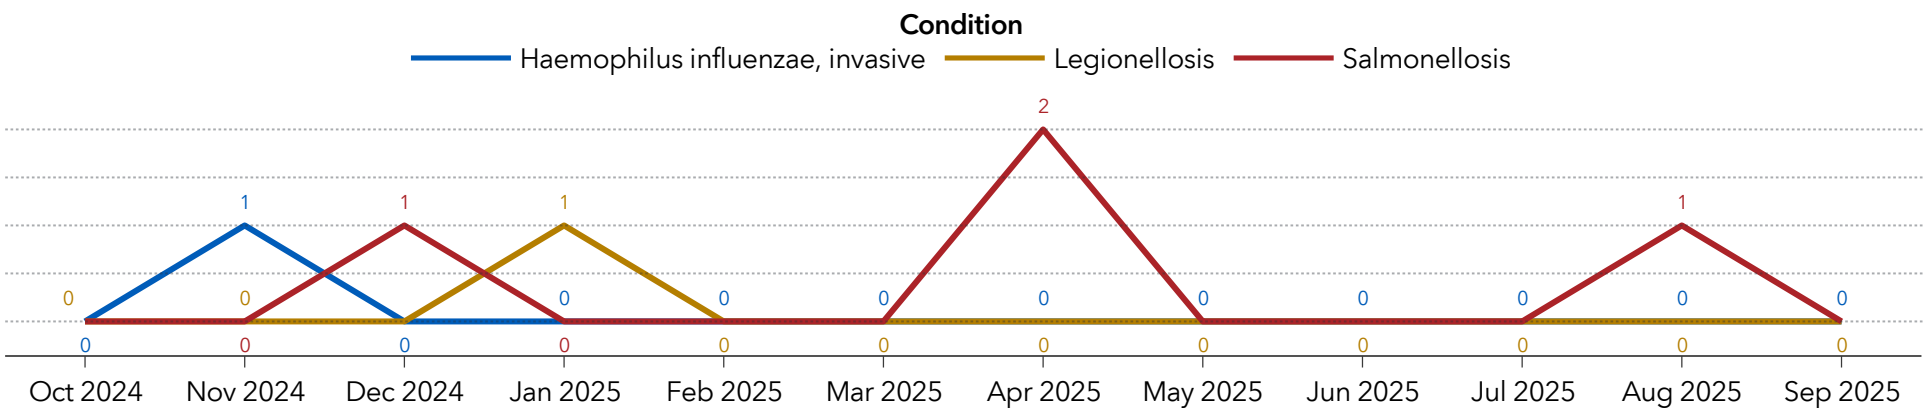

Current Month Overview:

Most Common Condition this Month:

Count of Condition Types Reported this Month:

If no data are displayed in the area above, no notifiable conditions were reported this month.

Top 3 Most Common Conditions over the Past Year:

Kinney County All Conditions

All Notifiable Conditions Reported this Month:

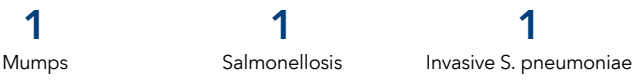

Condition Type	Condition	Count

If no conditions are listed in the table above, no notifiable conditions were reported this month.

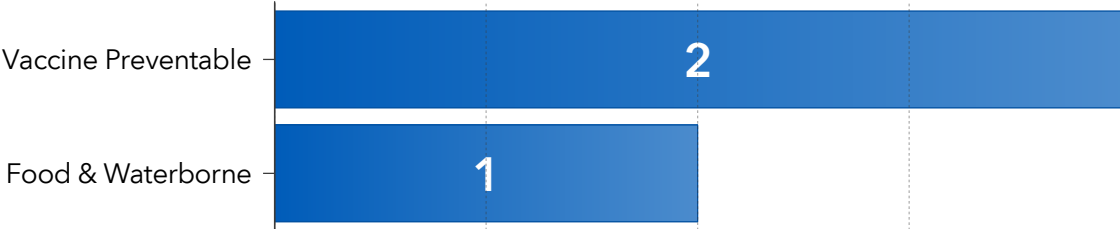

La Salle County Summary

Current Month Overview:

Most Common Condition this Month:

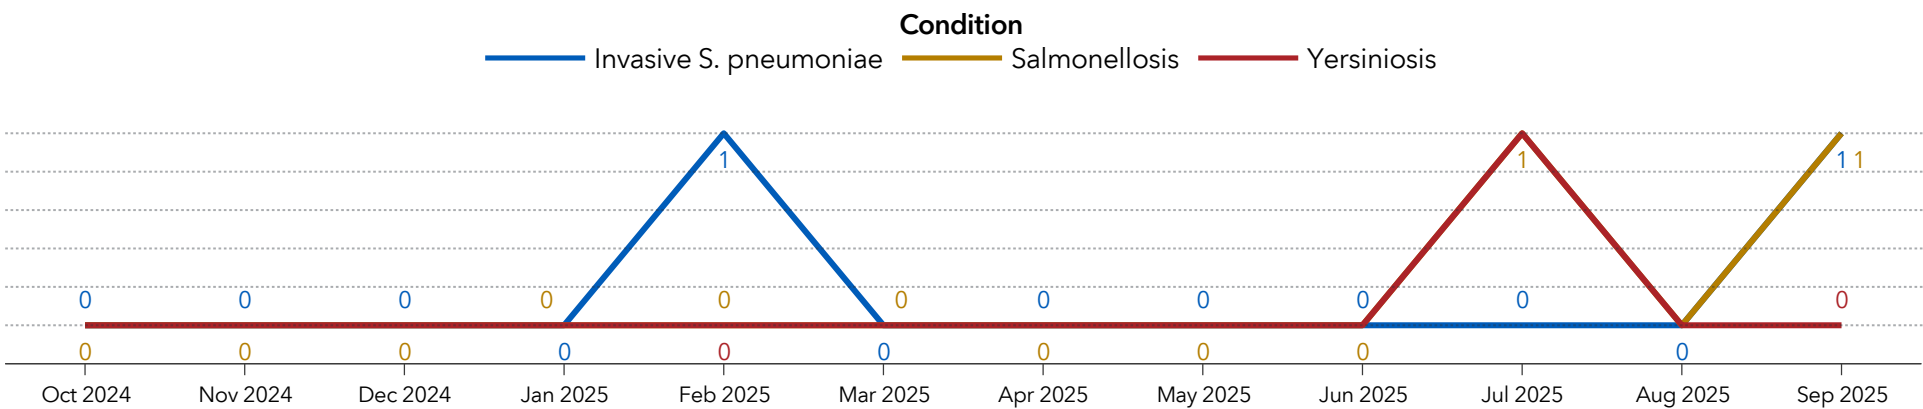

Count of Condition Types Reported this Month:

If no data are displayed in the area above, no notifiable conditions were reported this month.

Top 3 Most Common Conditions over the Past Year:

La Salle County All Conditions

All Notifiable Conditions Reported this Month:

Condition Type ▲	Condition ▲	Count ▼
Food & Waterborne	Salmonellosis	1
	Invasive S. pneumoniae	1
	Mumps	1
Vaccine Preventable		

If no conditions are listed in the table above, no notifiable conditions were reported this month.

Lavaca County Summary

Current Month Overview:

Most Common Condition this Month:

2

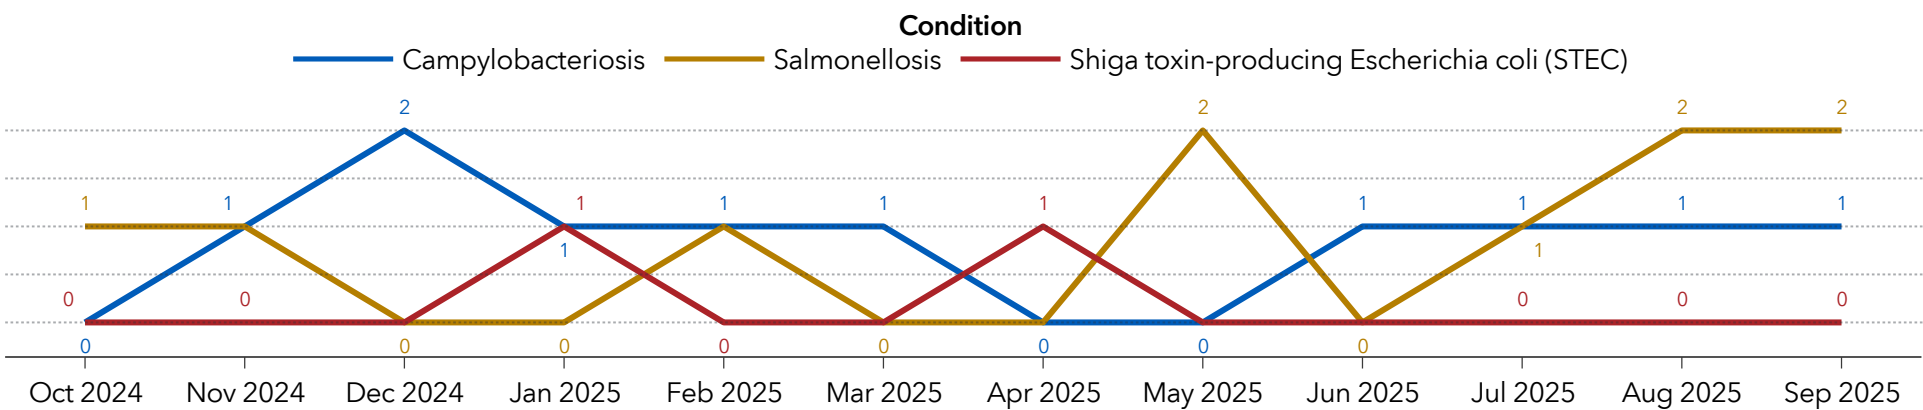

Salmonellosis

Count of Condition Types Reported this Month:

If no data are displayed in the area above, no notifiable conditions were reported this month.

Top 3 Most Common Conditions over the Past Year:

Lavaca County All Conditions

All Notifiable Conditions Reported this Month:

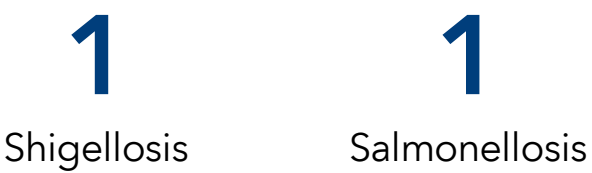

Condition Type ▲	Condition ▲	Count ▼
Food & Waterborne	Salmonellosis	2
	Campylobacteriosis	1

If no conditions are listed in the table above, no notifiable conditions were reported this month.

Maverick County Summary

Current Month Overview:

Most Common Condition this Month:

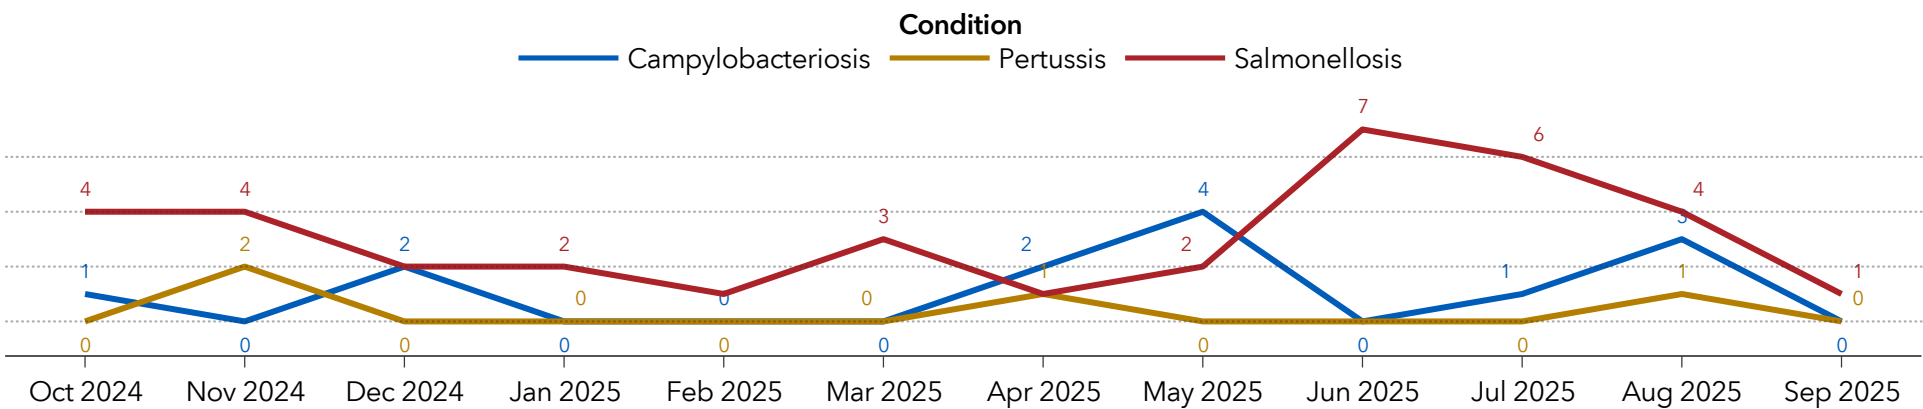

Count of Condition Types Reported this Month:

If no data are displayed in the area above, no notifiable conditions were reported this month.

Top 3 Most Common Conditions over the Past Year:

Maverick County All Conditions

All Notifiable Conditions Reported this Month:

Condition Type ▲	Condition ▲	Count ▼
Food & Waterborne	Salmonellosis	1
	Shigellosis	1

If no conditions are listed in the table above, no notifiable conditions were reported this month.

Medina County Summary

Current Month Overview:

Most Common Condition this Month:

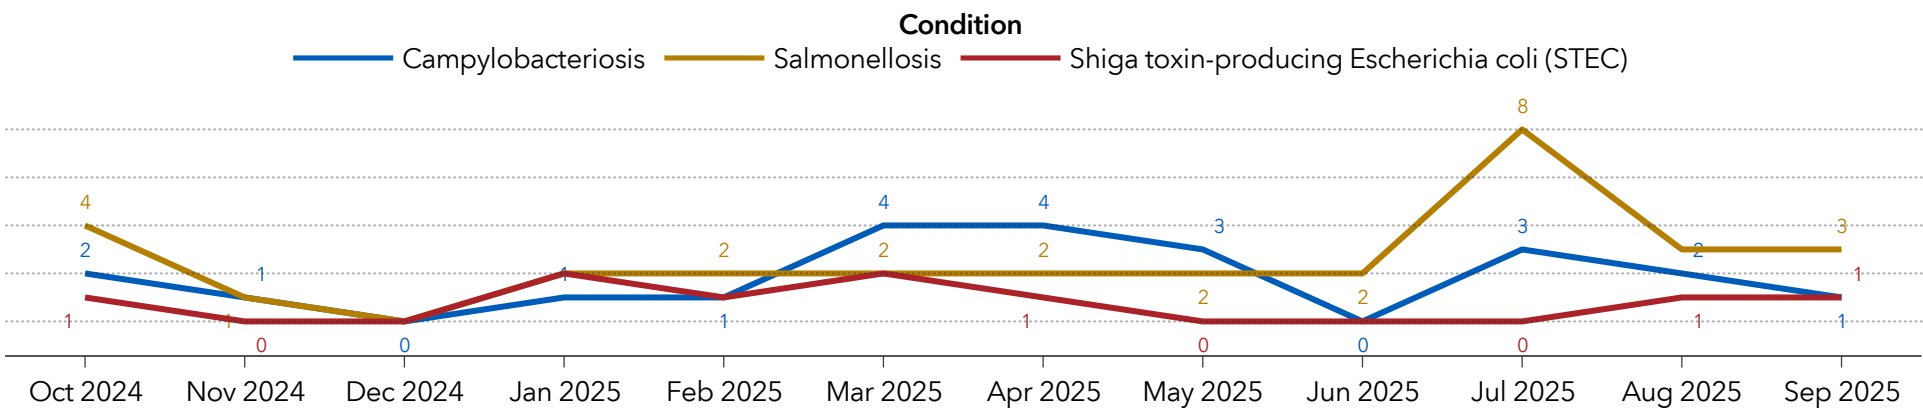

3
Salmonellosis

Count of Condition Types Reported this Month:

If no data are displayed in the area above, no notifiable conditions were reported this month.

Top 3 Most Common Conditions over the Past Year:

Medina County All Conditions

All Notifiable Conditions Reported this Month:

Condition Type ▲	Condition ▲	Count ▼
Food & Waterborne	Salmonellosis	3
	Campylobacteriosis	1
	Shiga toxin-producing Escherichia coli (STEC)	1

If no conditions are listed in the table above, no notifiable conditions were reported this month.

Real County Summary

Current Month Overview:

Most Common Condition this Month:

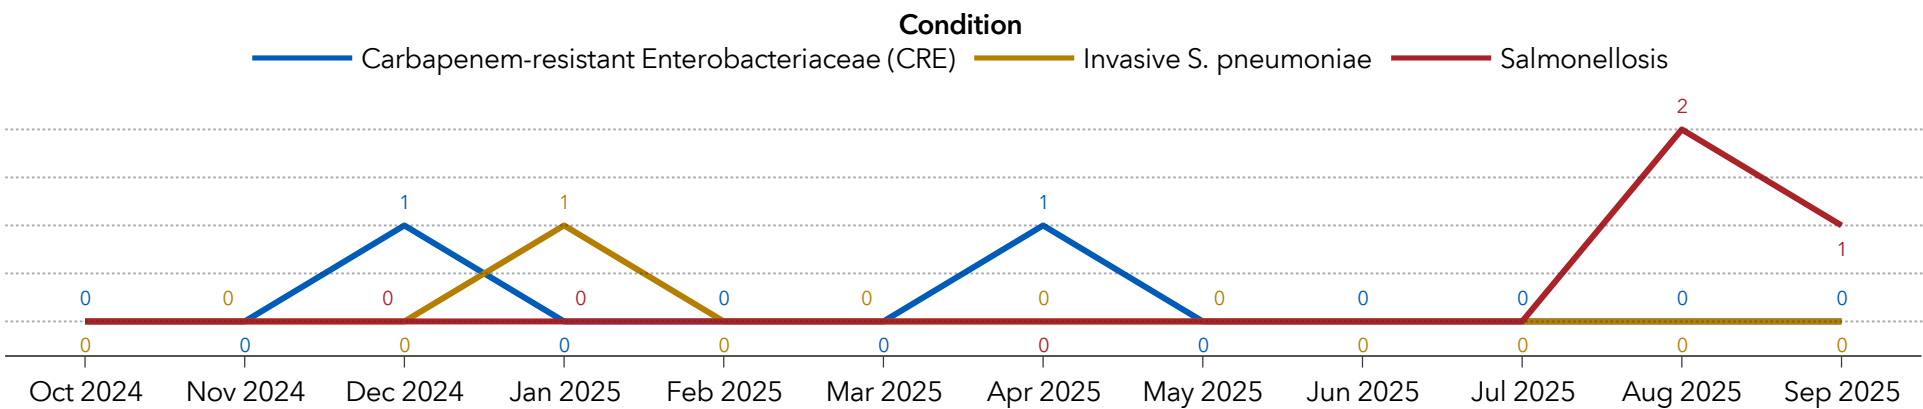

1
Salmonellosis

Count of Condition Types Reported this Month:

If no data are displayed in the area above, no notifiable conditions were reported this month.

Top 3 Most Common Conditions over the Past Year:

Real County All Conditions

All Notifiable Conditions Reported this Month:

Condition Type ▲	Condition ▲	Count ▼
Food & Waterborne	Salmonellosis	1

If no conditions are listed in the table above, no notifiable conditions were reported this month.

Uvalde County Summary

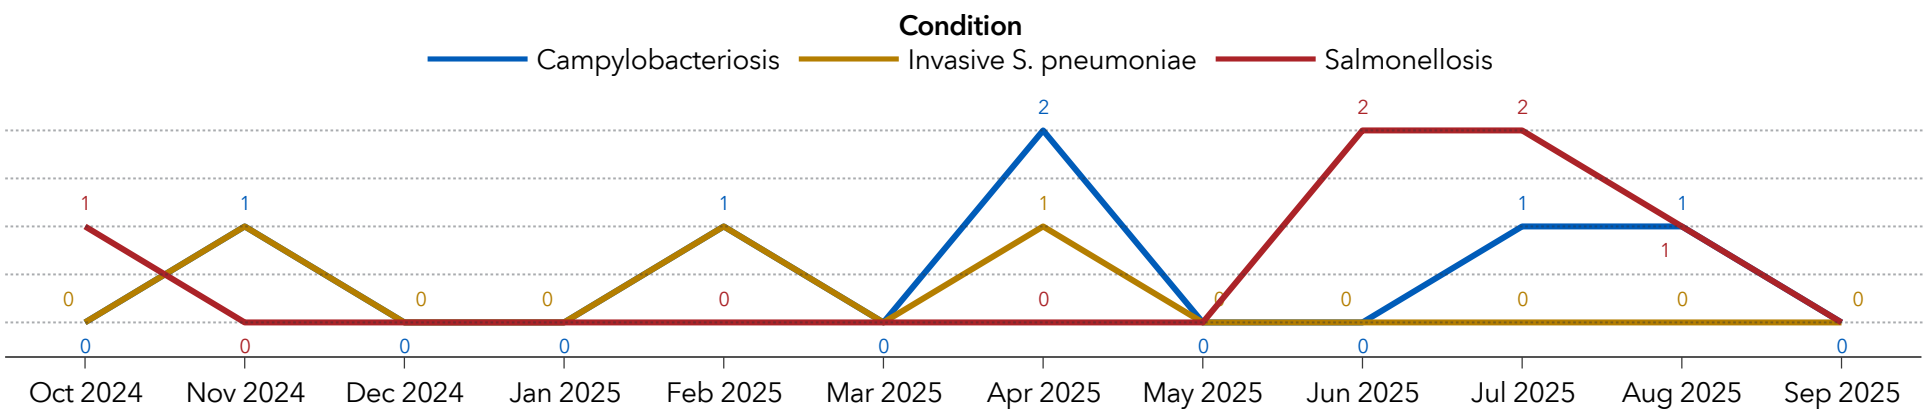

Current Month Overview:

Most Common Condition this Month:

Count of Condition Types Reported this Month:

If no data are displayed in the area above, no notifiable conditions were reported this month.

Top 3 Most Common Conditions over the Past Year:

Uvalde County All Conditions

All Notifiable Conditions Reported this Month:

Condition Type	Condition	Count

If no conditions are listed in the table above, no notifiable conditions were reported this month.

Val Verde County Summary

Current Month Overview:

Most Common Condition this Month:

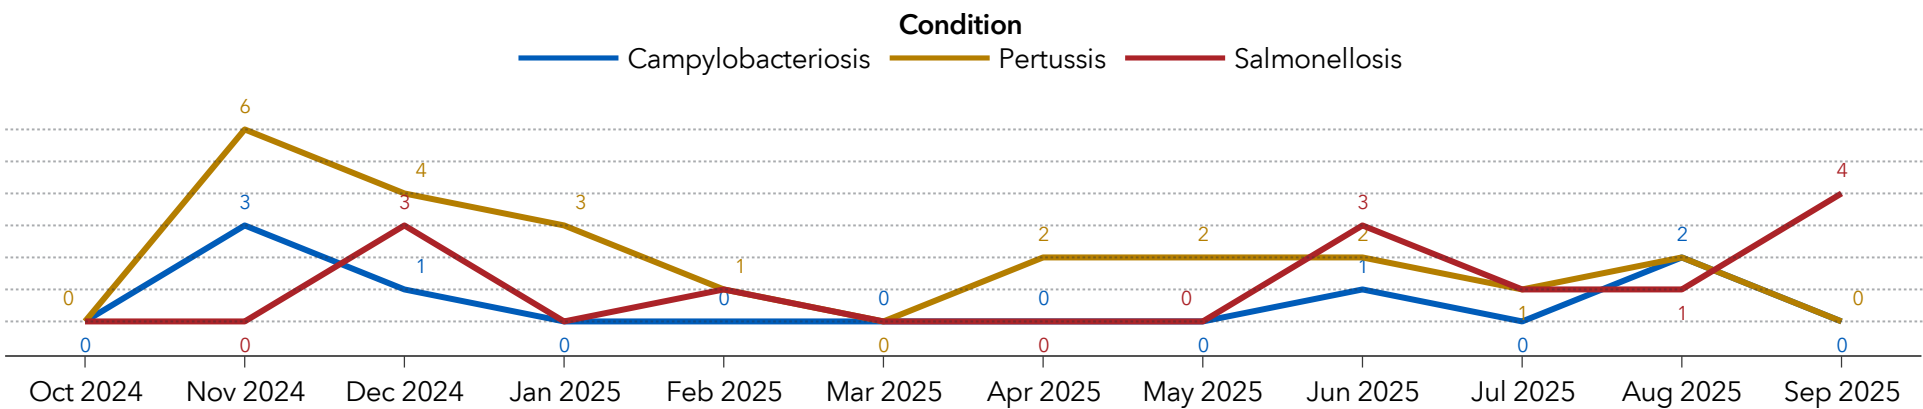

4
Salmonellosis

Count of Condition Types Reported this Month:

If no data are displayed in the area above, no notifiable conditions were reported this month.

Top 3 Most Common Conditions over the Past Year:

Val Verde County All Conditions

All Notifiable Conditions Reported this Month:

Condition Type ▲	Condition ▲	Count ▼
Food & Waterborne	Salmonellosis	4
	Cyclosporiasis	1
	Shiga toxin-producing Escherichia coli (STEC)	1
Healthcare Associated	Carbapenem-resistant Enterobacteriaceae (CRE)	1

If no conditions are listed in the table above, no notifiable conditions were reported this month.

Victoria County Summary

Current Month Overview:

Most Common Condition this Month:

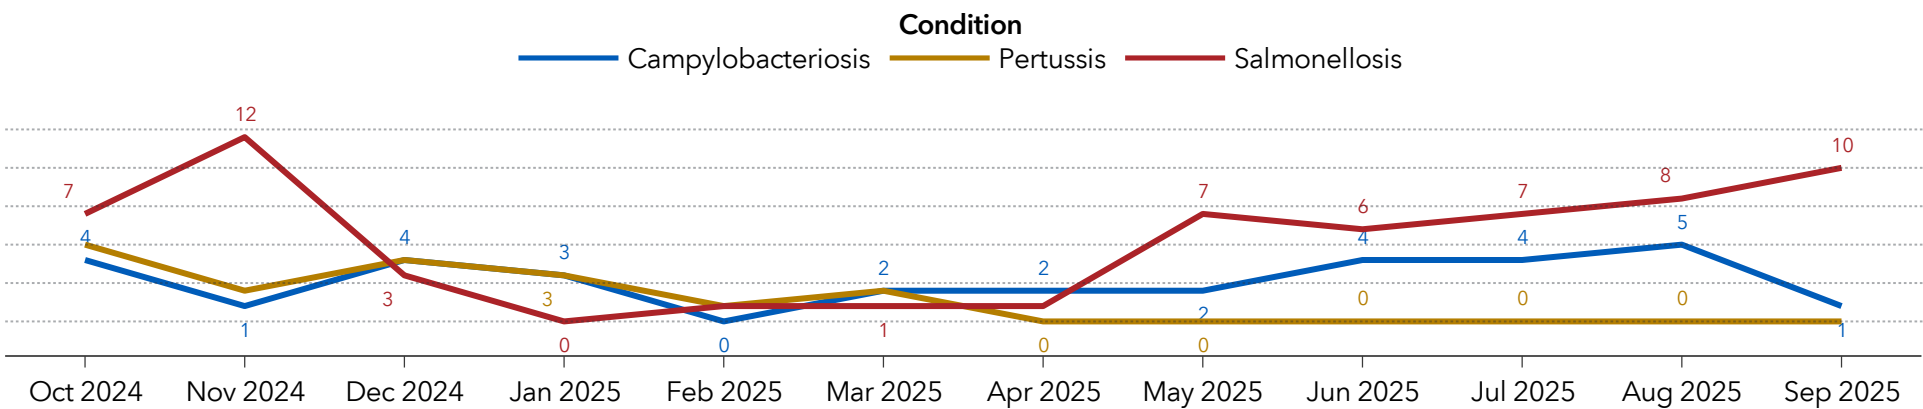

10
Salmonellosis

Count of Condition Types Reported this Month:

If no data are displayed in the area above, no notifiable conditions were reported this month.

Top 3 Most Common Conditions over the Past Year:

Victoria County All Conditions

All Notifiable Conditions Reported this Month:

Condition Type ▲	Condition ▲	Count ▼
Food & Waterborne	Salmonellosis	10
	Campylobacteriosis	1
	Cryptosporidiosis	1
Other	Mpox	1
Zoonoses	Chagas	1

If no conditions are listed in the table above, no notifiable conditions were reported this month.

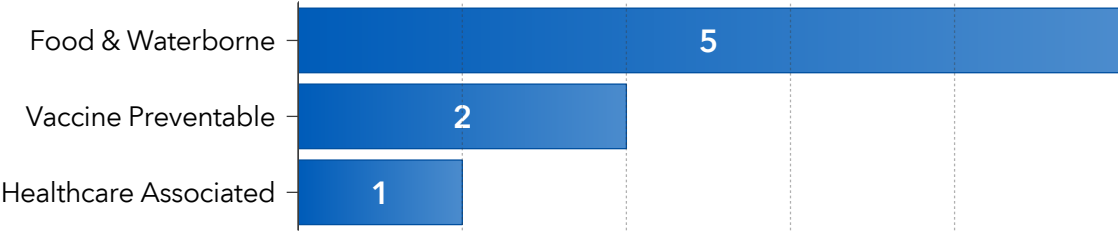

Wilson County Summary

Current Month Overview:

Most Common Condition this Month:

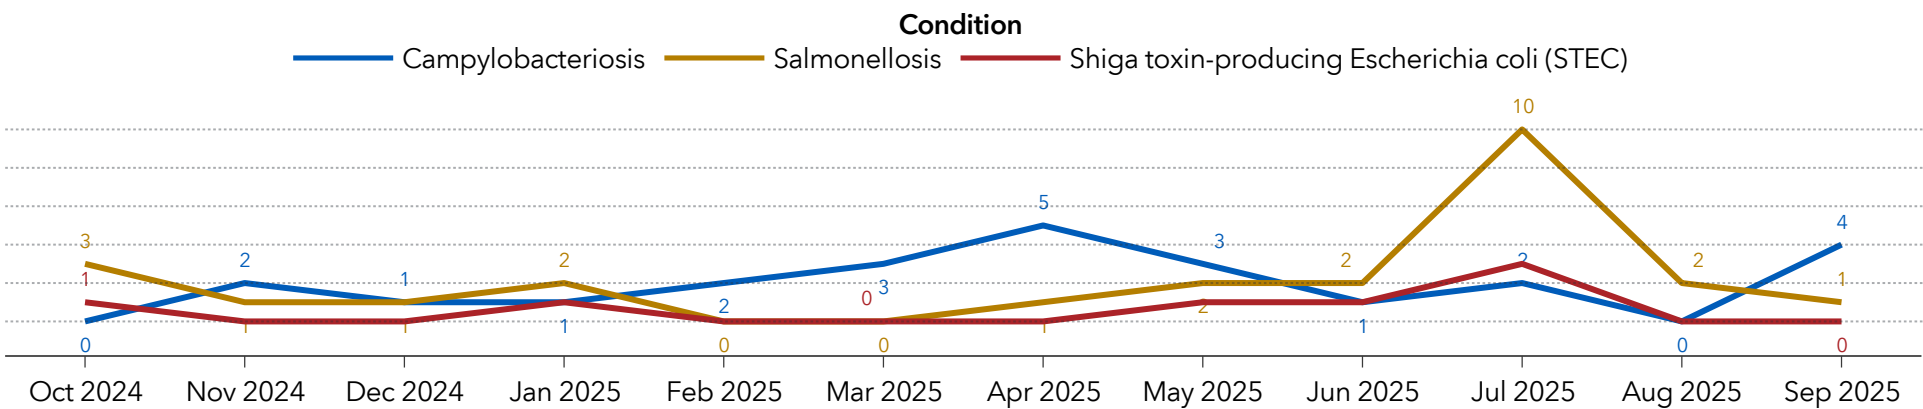

4
Campylobacteriosis

Count of Condition Types Reported this Month:

If no data are displayed in the area above, no notifiable conditions were reported this month.

Top 3 Most Common Conditions over the Past Year:

Wilson County All Conditions

All Notifiable Conditions Reported this Month:

Condition Type ▲	Condition ▲	Count ▼
Food & Waterborne	Campylobacteriosis	4
	Salmonellosis	1
Healthcare Associated	Candida auris	1
Vaccine Preventable	Chickenpox	1
	Invasive S. pneumoniae	1

If no conditions are listed in the table above, no notifiable conditions were reported this month.

Zavala County Summary

Current Month Overview:

Most Common Condition this Month:

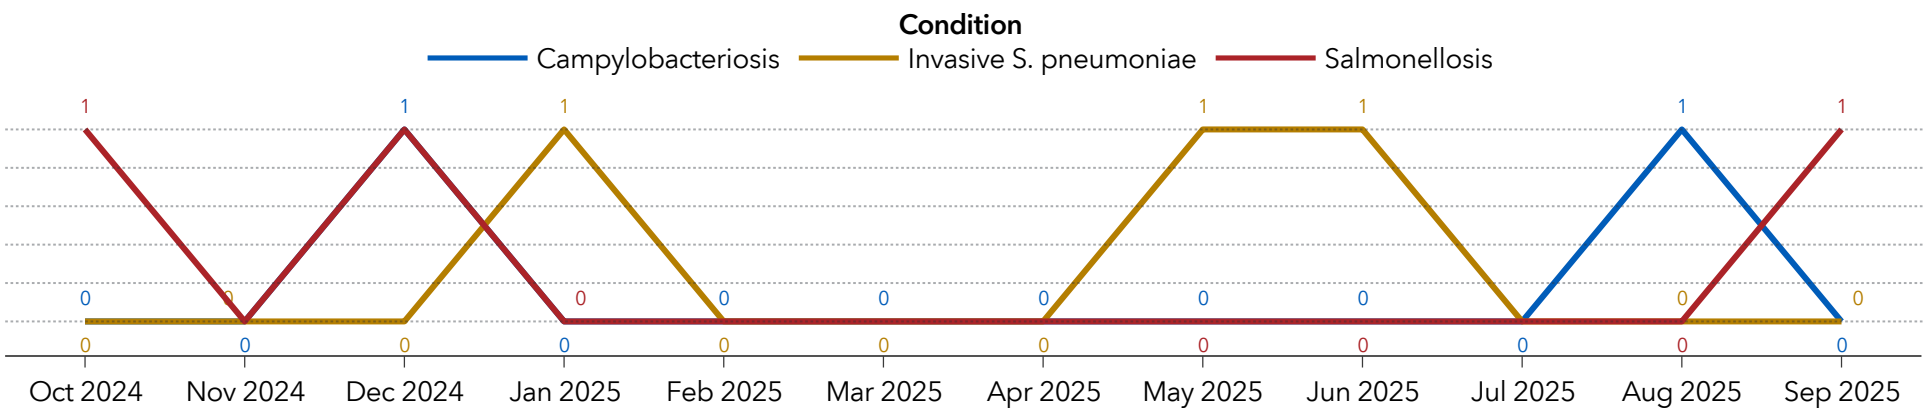

1
Salmonellosis

Count of Condition Types Reported this Month:

If no data are displayed in the area above, no notifiable conditions were reported this month.

Top 3 Most Common Conditions over the Past Year:

Zavala County All Conditions

All Notifiable Conditions Reported this Month:

Condition Type ▲	Condition ▲	Count ▼
Food & Waterborne	Salmonellosis	1

If no conditions are listed in the table above, no notifiable conditions were reported this month.
