Data is submitted to meet statutory requirements. Conclusions could be erroneous
due to communication difficulties in reporting complete data by reporting
constraints, subjectivity in assignment of codes, system mapping and normal
clerical error. Deadlines may prevent inclusion of all applicable cases. This
represents claims data at the time of preset deadlines. Data may be incomplete
due to field limitations and be cautiously used to evaluate health care quality
and compare outcomes.

THCIC audits have been corrected with the FER reported 100% accuracy. There may be duplicates or missing claims. An issue with payer mapping is being researched. Due to the difficulty in rerunning informational claims in Epic without negatively impacting operations, any attempt to rerun claims will cause significantly decreased volume and will not be an accurate accounting of our volume.
