Order Removing Approved Cannabidiol Drugs from Schedule V, the Addition of Cenobamate to Schedule V and the addition of Isotonitazene to Schedule I Temporarily Scheduled Substances

The Drug Enforcement Administration (DEA) issued an interim final rule to codify statutory amendments to the Controlled Substances Act (CSA) made by the Agriculture Improvement Act of 2018 (AIA), regarding the scope of regulatory controls over marihuana-related constituents. This interim final rule was published in the Federal Register. Volume 85, Number 163, Pages 51639-51645, and takes effect August 21, 2020.

The order removes from schedule V a "drug product in finished dosage formulation that has been approved by the U.S. Food and Drug Administration that contains cannabidiol (2-[1R-3-methyl-6R-(1-methyl-ethenyl)-2-cyclohexen-1-yl]-5-pentyl-1,3-benzenediol) derived from cannabis and no more than 0.1% (w/w) residual tetrahydrocannabinols."

The Drug Enforcement Administration issued a final rule adopting, without change, an interim final rule with request for comments published in the Federal Register on March 10, 2020, placing cenobamate ([1R]-1-(2-chlorophenyl)-2-(tetrazol-2-yl)ethyl) carbamate, including its salts, in schedule V of the Controlled Substances Act. This final rule was published in the Federal Register. Volume 85, Number 162, pages 51340-51342, and takes effect August 20, 2020.

The Acting Administrator of the Drug Enforcement Administration issued a temporary order to schedule \( N,N \)-diethyl-2-(2-(4-isoproxybenzyl)-5-nitro-1H-benzimidazol-1-yl)ethan-1-amine (commonly known as isotonitazene), including its isomers, esters, ethers, salts, and salts of isomers, esters, and ethers whenever the existence of such isomers, esters, ethers, and salts is possible, in schedule I. This temporary scheduling action was published in the Federal Register. Volume 85, Number 162, pages 51342-51346, and takes effect August 20, 2020. The action was taken for the following reasons:

1. Isotonitazene has high potential for abuse;
2. There is currently no accepted medical use in treatment in the United States;
3. There is a lack of accepted safety for use under medical supervision; and
4. Control of isotonitazene is necessary to avoid an imminent hazard to public safety.

Pursuant to Section 481.034(g), as amended by the 75th legislature, of the Texas Controlled Substances Act, Health and Safety Code, Chapter 481, at least thirty-one days have expired since notice of the above referenced actions were published in the Federal Register. In the capacity as Commissioner of the Texas Department of State Health Services, John Hellerstedt, M.D., does hereby order the removal of approved cannabidiol drugs from Schedule V, adoption of a final rule placing cenobamate in schedule V, and the placement of isotonitazene into schedule I temporarily controlled substances.
