Note 1: Use code 450 for localized tumor ONLY if no information is available to assign codes 100 through 400.

Note 2: Use code 775, 810, or 815 if the physician's assignment of T category is the ONLY information available about the extent of the tumor

LarynxSubglottic**CS Lymph Nodes**

Note 1: For head and neck schemas, this field includes all lymph nodes defined as Levels I-VII and Other by AJCC. The complete definitions are provided in the General Instructions.

Note 2: For head and neck schemas, additional information about lymph nodes (size of involved nodes, extracapsular extension, levels involved, and location of involved nodes above or below the lower border of the cricoids cartilage) is coded in Site-Specific Factors 1-7.

Note 3: If laterality of lymph nodes is not specified, assume nodes are ipsilateral. Midline nodes are considered ipsilateral.

Note 4: For head and neck cancers, if lymph nodes are described only as "supraclavicular", try to determine if they are in Level IV (deep to the sternocleidomastoid muscle, in the lower jugular chain) or Level V (in the posterior triangle, inferior to the transverse cervical artery) and code appropriately. If the specific level cannot be determined, consider them as Level V nodes.

Note 5: The description of lymph nodes has been standardized across the head and neck schemas. All lymph node levels and groups listed here are considered regional nodes for AJCC staging.

Summary Stage 1977 and Summary Stage 2000 divide these nodes into regional and distant groups.

Note 6: Level II nodes moved from code 100 in CSv1 to code 105, Level III nodes moved from code 100 to code 110, Level IV nodes added to code 110.

^ For codes 100-120, 200-220, 300-320, 400-420, 500-520, and 800 ONLY, the N category for AJCC 7th Edition staging is assigned based on the value of Site-Specific Factor 1, Size of Lymph Nodes, using the extra table Lymph Nodes Size Table for this site.

* For codes 100-120, 200-220, 300-320, 400-420, 500-520, and 800 ONLY, the N category for AJCC 6th Edition staging is assigned based on the value of Site-Specific Factor 1, Size of Lymph Nodes, using the extra table Lymph Nodes Size Table for this site.
